If you've ever handled live sound, you know the recipe for creating quality live sound requires many steps. Your list of ingredients, shall we say, requires an understanding of sound and how it behaves, the know-how to effectively use a sound system), and the knowledge to choose and use your gear well. Add a dash of miking ability, stir in a pinch of thinking on your feet for when your system starts to hum or the vocals start to feed back, and mix. In practice, there really is no "recipe" for creating a quality performance. Instead, musicians and engineers who effectively use sound systems have a wealth of knowledge that informs their every move before and during a live performance. You can slowly gather that knowledge over years of live performance, or you can speed up the process with The SOS Guide to Live Sound. With these pages, you get practical advice that will allow you to accomplish your live-sound goals in every performance. Learn how to choose, set up, and use a live-performance sound system.
