The 48 Laws of Power: Chapter by Chapter Summary About This Book of Robert Greene! The desire for power is a fundamental human expression. When one feels that he has no power over others or events, he is likely to be depressed. Everyone wants power. Those who pretend to have no desire for power are either deceiving themselves or attempting to deceive others. Power is like a drug that makes you stronger each time you taste it. The more you get, the more you want. Though a fundamental human behavior, the desire for power is considered impolite and selfish. It is widely held that those who seek power must seem to have no interest in it, and on the contrary they must pretend to care only about others. The one who can disguise his pursuit of power with his care for others ends up becoming the most powerful. This seems paradoxical but the fact remains that you cannot honestly and forthrightly pursue power. You invariably have to disguise both your means and your ends. The 48 Laws of Power by Robert Greene is a collection of "laws" based on historical and philosophical anecdotes. These laws are amoral as they themselves don't take into account any sense of right or wrong. Instead, the laws focus on how one can increase their influence over any situation, regardless of their moral consequences. This book explores the nuances of manipulating people around you for establishing power. The book focuses on how to gain power in any situation, regardless of whether it's morally right or wrong, and it uses specific anecdotes from history to illustrate these "rules of power." These laws may seem scandalously frank, but you can apply them without violating any of the strictures of public morality, which, according to Robert, is the way to get the best results. This concise book summary will help you cut through the 452 page full version of The 48 Laws of Power and quickly understand the key concepts and ideas. For a lot of people, feeling powerless is an unbearable feeling that makes them feel helpless and miserable. Even the most passive people never want less power over their lives and environments. People are always looking for more power. However, this is where things get hairy. If we seem too power hungry, it can be dangerous, and we can be considered a threat to others. For that reason, we have to be subtle when seeking more power in our lives. Think about it in terms of aristocratic courts from centuries ago that you see portrayed on television and in movies. In those times, a court was established around whoever was in power at that time (king, emperor, etc.) and the courtiers were there to serve this person but each courtier had to do this in a way that wouldn't alert other courtiers and make them think that they were volleying for more power through a higher position. If suspicions arose because of this, a courtier might take action against that courtier. To prevent that from happening, things were done in subtle and covert fashions in order to not draw attention. All of this had to happen in a place that was supposed to be the most elegant and refined, too. So not only did everyone have to keep up their refined attitudes, but they also had to be cunning. To do this, most turned to seduction, charm, and properly thought out strategies instead of the usual treachery that most power struggles consist of. Nowadays, things are a lot like those aristocratic courts. You have to be devious to gain the power you're looking for, and you have to do so while still appearing to be a fair and civilized person. To some, power games like this seem evil and wrong, but the truth of the matter is that most people enter into these types of games on some level. Even those who denounce power games and claim to have the moral high ground are more than likely playing a game of their own while trying to appear innocent. At times, these people may even be the biggest players and most manipulative individuals. That is because their constant shunning of power games can make those around them believe that they'd never do anything underhanded leaving them free to play their game undetected. When the world seems to be full of scheming courtiers looking to get ahead, there is really no way you can get through life without playing some kind of power game. Since this game is inescapable, you can only benefit by learning how to play it properly. To do this, you have to look at the world a certain way and learn the laws of power and acquire some basic skills that will allow you to apply those laws easily throughout your life. Basic Skills for Playing the Power Game These aren't hard skills, but you'll want to learn them before moving onto the laws of power. When you master them, you'll see how easy it really is to play the power game to get what you're looking for out of life. Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of The Laws of Human Nature. In the book that People magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of

confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

The pimp has reached nearly mythical status. We are fascinated by the question of how a guy from the ghetto with no startup capital and no credit -- nothing but the words out of his mouth -- comes not only to have a stable of sexy women who consider him "their man," but to drive a Rolls, sport diamonds, and wear custom suits and alligator shoes from Italy. His secret is to follow the "unwritten rules of the game" -- a set of regulations handed down orally from older, wiser macks -- which give him superhuman powers of charm, psychological manipulation, and persuasion. In *Pimpology*, star of the documentaries *Pimps Up*, *Ho's Down* and *American Pimp* and Annual Players Ball Mack of the Year winner Ken Ivy pulls a square's coat on the unwritten rules that took him from the ghetto streets to the executive suites. Ken's lessons will serve any person in any interaction: Whether at work, in relationships, or among friends, somebody's got to be on top. To be the one with the upper hand, you've got to have good game, and good game starts with knowing the rules. If you want the money, power, and respect you dream of, you can't just "pimp your ride," you need to pimp your whole life. And unless you've seen Ray Charles leading Stevie Wonder somewhere, you need Ken's guidelines to do it. They'll reach out and touch you like AT&T and bring good things to life like GE. Then you can be the boss with the hot sauce who gets it all like Monty Hall

In his classic 16th-century treatise that justifies and praises manipulation and occasional brutality as the best tools for those who want to hold power, The Prince, Niccolo Machiavelli wrote, "It is much safer to be feared than loved." About five centuries later, Robert Greene wrote his book, The 48 Laws of Power, re-enforcing the Machiavellian interpretation of power and the means for achieving power. In his book, Robert Greene argues, "The need for power is so fundamental, so essentially human, that when you feel you have no power over people or events, you are likely to be depressed." Greene further describes the laws of power that will show readers how to gain power and influence. Both Machiavelli and Greene want us to believe that achieving and keeping power require coercion, dishonesty and manipulation. Collaboration is increasingly difficult and increasingly necessary Often, to get something done that really matters to us, we need to work with people we don't agree with or like or trust. Adam Kahane has faced this challenge many times, working on big issues like democracy and jobs and climate change and on everyday issues in organizations and families. He has learned that our conventional understanding of collaboration—that it requires a harmonious team that agrees on where it's going, how it's going to get there, and who needs to do what—is wrong. Instead, we need a new approach to collaboration that embraces discord, experimentation, and genuine cocreation—which is exactly what Kahane provides in this groundbreaking and timely book.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

In the book's preface, Greene argues that, at least on the surface, the quest for power has been demonized, the end result of a culture that frowns upon those who seem too eager to get too far ahead in life. From Greene's perspective however, very little has changed in the time between the royal courts of old and the high-intensity board rooms of today; according to Greene, the people who amass the most power are those who can crush their enemies while appearing outwardly benevolent. The essence of Greene's perspective on power dynamics can be aptly summarized by President Teddy Roosevelt: "Speak softly and carry a big stick."
