

Sunderland Industrial Giant Recollections Of Working Life

China and Russia are rising economic and political powers that share thousands of miles of border. Despite their proximity, their interactions with each other - and with their third neighbour Mongolia - are rarely discussed. Although the three countries share a boundary, their traditions, languages and worldviews are remarkably different. Frontier Encounters presents a wide range of views on how the borders between these unique countries are enacted, produced, and crossed. It sheds light on global uncertainties: China's search for energy resources and the employment of its huge population, Russia's fear of Chinese migration, and the precarious independence of Mongolia as its neighbours negotiate to extract its plentiful resources. Bringing together anthropologists, sociologists and economists, this timely collection of essays offers new perspectives on an area that is currently of enormous economic, strategic and geo-political relevance.

In this #1 New York Times bestseller, Nora Roberts takes readers deep into the rugged hills of South Dakota, where the shadows keep secrets, hunters stalk the land, and a friendship matures into something more.... Cooper Sullivan spent the summers of his youth on his grandparents' South Dakota ranch, sharing innocent games and stolen kisses with the neighbor girl, Lil Chance. Now, twelve years after they last walked together hand in hand, fate has brought them back to the Black Hills. Though the memory of Coop's touch still haunts her, Lil has let nothing stop her dream of opening the Chance Wildlife Refuge, but something—or someone—has been keeping a close watch. When small pranks and acts of destruction escalate into a heartless attack on Lil's beloved cougar, memories of an unsolved murder have Coop springing to action to keep Lil safe. Both of them know the natural dangers that lurk in the wild landscape of the Black Hills. But a killer of twisted and unnatural instincts has singled them out as prey....

Ecosystem research has emerged in recent decades as a vital, successful, and sometimes controversial approach to environmental science. This book emphasizes the idea that much of the progress in ecosystem research has been driven by the emergence of new environmental problems that could not be addressed by existing approaches. By focusing on successes and limitations of ecosystems studies, the book explores avenues for future ecosystem-level research.

"Atkinson and Jewell invite each of us to reimagine one's connection to the land while cultivating nature close to home. A must-read for anyone searching for inspired solutions for designing or refining a garden." —Emily Murphy, founder of Pass the Pistil From windswept deserts to misty seaside hills and verdant valleys, the natural landscapes of the American West offer an astounding variety of climates for gardens. Under Western Skies reveals thirty-six of the most innovative designs—all embracing and celebrating the very soul of the land on which they grow. For the gardeners featured here, nature is the ultimate inspiration rather than something to be dominated, and Under Western Skies shows the strong connection each garden has with its place. Packed with Atkinson's stunning photographs and illuminated by Jewell's deep interest in the relationships between people and the spaces they inhabit, Under Western Skies offers page after page of encouraging ingenuity and inventive design for passionate gardeners who call the West home.

Explore the secret history of Sunderland through a fascinating selection of stories, facts and photographs.

How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battened down. But that changed the following year, when a Harvard Law School graduate student named Ray Riepen founded a radio station that played music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN, creativity and countercultural politics ruled: there were no set playlists; news segments anticipated the satire of The Daily Show; on-air interviewees ranged from John and Yoko to Noam Chomsky; a telephone "Listener Line" fielded questions on any subject, day and night. From 1968 to Watergate, Boston's WBCN was the hub of the rock-and-roll, antiwar, psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and scenes of joyousness on Boston Common. Interwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the "news dissector" Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein's documentary WBCN and the American Revolution is available as a DVD sold separately.

Shortly after William Henry Fox Talbot announced his invention of photography in 1839, the dedicated amateur botanist Anna Atkins, daughter of a prominent British scientist, began to experiment with the new medium. In 1843 she turned to her friend Sir John Herschel's recently discovered cyanotype process to publish her growing collection of native seaweeds--a daring way to introduce photography into book illustration. At regular intervals over the next decade, Atkins printed and issued these bracingly modern, deeply-hued photograms to her "botanical friends" in the form of hand-stitched fascicles of a book she entitled Photographs of British Algæ: Cyanotype Impressions . The first book to be illustrated by photography and the earliest sustained application of photography to science, British Algæ is a landmark in the histories of publishing and photography. Of the nearly two dozen substantially complete or partial copies known to exist, each is distinct in its appearance and often in its number and arrangement of plates. The set of 13 parts she gave to Sir John Herschel--now in the Spencer Collection of The New York Public Library--is especially important and was carefully preserved by generations of the Herschel family exactly as Sir John received it. This sumptuous facsimile edition reproduces the recto and verso of each plate, presenting the work as its creator intended: as bound volumes to linger over, studied and admired, page by extraordinary page.

Sunderland was once one of Britain's industrial giants. Famous for its shipyards, mines and glass-making, it thrived at a time when its country needed it most. After the Second World War the town saw incredible change, as the heavy industry that seemed so permanent, faded and died. How do you cope with the loss of centuries of working tradition? These are the stories of the people who worked through this evolution, watched their town change around them and become a city – the people who saw the end of one era and the beginning of a challenging new one.

An ethologist shows man to be a gene machine whose world is one of savage competition and deceit
An off-the-beaten-path tour of the city's hidden highlights, and the stories behind them. London is full of curiosities. Who knew that beneath the Albert Memorial lies a chamber resembling a church crypt? Or that there are catacombs under Camden? Who would expect to find a lighthouse in East London, sphinxes in South London, dummy houses in West London, or a huge bust of film director Alfred Hitchcock in North London? How many of those who walk past Cleopatra's Needle pause to consider why a 3,000-year-old Egyptian monument stands beside the Thames? How many know that what was once London's smallest police station can be seen in Trafalgar Square? Or that pineapples are used in the architectural design of so many buildings? Or why there are memorials to the Mayflower and Pilgrim Fathers in Rotherhithe? Learn more about the capital of curiosities in this delightful guide for lovers of history, trivia, and travel.

Continuing the story of General Stilwell's experiences in the CBI between October 1943 and his recall in October 1944, this volume chronicles the seizure of Myitkyina in Burma and the Salween River fighting in China.

A National Bestseller, a New York Times Notable Book, and an Entertainment Weekly Best Book of the Year from the author of Extra Life "By turns a medical thriller, detective story, and paean to city life, Johnson's account of the outbreak and its modern implications is a true page-turner." —The Washington Post "Thought-provoking." —Entertainment Weekly It's the summer of 1854, and London is just emerging as one of the first modern cities in the world. But lacking the infrastructure-garbage removal, clean water, sewers-necessary to support its rapidly expanding population, the city has become the perfect breeding ground for a terrifying disease no one knows how to cure. As the cholera outbreak takes hold, a physician and a local curate are spurred to action-and ultimately solve the most pressing medical riddle of their time. In a triumph of multidisciplinary thinking, Johnson illuminates the intertwined histories of the spread of disease, the rise of cities, and the nature of scientific inquiry, offering both a riveting history and a powerful explanation of how it has shaped the world we live in.

In Revolutionary Iran, Michael Axworthy guides us through recent Iranian history from shortly before the 1979 Islamic revolution through the summer of 2009, when Iranians poured into the streets of Tehran by the hundreds of thousands, demanding free, democratic government. Axworthy explains how that outpouring of support for an end to tyranny in Iran paused and then moved on to other areas in the region like Egypt and Libya, leaving Iran's leadership unchanged. The Iranian Revolution of 1979 was a defining moment of the modern era. Its success unleashed a wave of Islamist fervor across the Middle East and signaled a sharp decline in the appeal of Western ideologies in the Islamic world. Axworthy takes readers through the major periods in Iranian history over the last thirty years: the overthrow of the old regime and the creation of the new one; the Iran-Iraq war; the reconstruction era following the war; the reformist wave led by Mohammed Khatami; and the present day, in which reactionaries have re-established control. Throughout, he emphasizes that the Iranian revolution was centrally important in modern history because it provided the world with a clear model of development that was not rooted in Western ideologies. Whereas the world's major revolutions of the previous two centuries had been fuelled by Western, secular ideologies, the Iranian Revolution drew its inspiration from Islam. Revolutionary Iran is both richly textured and from one of the leading authorities on the region; combining an expansive scope with the most accessible and definitive account of this epoch in all its humanity.

A sampling of the writings of Chinese women poets from ancient times to the twentieth century is accompanied by brief biographies and a discussion of their influence on Chinese literature.

One of the preeminent political philosophers of the 20th century makes a compelling argument for the political cogency of literary writing in this book which among to his intellectual autobiography and an introduction to his work.

"Advice and Support: The Early Years, 1941-1960" describes the activities of the U.S. Army in Vietnam during World War II, military advice and assistance to the French government during the immediate postwar years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, Ronald Spector's interesting book is a fitting introduction to the overall study of the conflict in Vietnam.

Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

Every team needs a leader, but why do we so often take that to mean that the appropriate workplace team needs to consist of one gem of a worker complemented with a bunch of obedient order-takers and yes men? What if the complementary fits between the team members were not with how well they performed the tasks handed down to them but with how they all used their unique strengths to share knowledge, push the envelope, and lead together in the challenge before them?The team of authors behind A Team of Leaders wants to show readers how to design systems within their organization and management procedures that nurture

the leadership potential of every employee, not just the ones they ear-marked as having potential for promotion. The proven principles and techniques within these invaluable pages include:• The Five-Stage Team Development Model that maps the transition from traditional to self-directed teams• Best practices in team process design • A Team Value Creation Tool that allows members to appreciate the significance of what they contribute each day• Visual Management • And moreThe key to your company's success is creating successful teams of leaders combining their individual talents and strengths into a single, unstoppable driving force. The fresh approach taught in this indispensable guide will transform passive groups of disparate people into the effective teams of leaders you didn't know was possible to have.

Do you have a real relationship with God, or do you just have a religion? Do you know God, or do you just know about God? In *How Big Is Your God?* Paul Coutinho, SJ, challenges us to grow stronger and deeper in our faith and in our relationship with God—a God whose love knows no bounds. To help us on our way, Coutinho introduces us to people in various world religions—from Hindu friends to Buddhist teachers to St. Ignatius of Loyola—who have shaped his spiritual life and made possible his deep, personal relationship with God.

Part personal history, part biography, *Dotter of Her Father's Eyes* contrasts two coming-of-age narratives: that of Lucia, the daughter of James Joyce, and that of author Mary Talbot, daughter of the eminent Joycean scholar James S. Atherton. Social expectations and gender politics, thwarted ambitions and personal tragedy are played out against two contrasting historical backgrounds, poignantly evoked by the atmospheric visual storytelling of award-winning graphic novel pioneer Bryan Talbot. Produced through an intense collaboration seldom seen between writers and artists, *Dotter of Her Father's Eyes* is smart, funny, and sad an essential addition to the evolving genre of graphic memoir. * Bryan Talbot is recognized worldwide as one of the true original voices in graphic fiction. * Bryan Talbot's *Grandville Mon Amour* was nominated for a 2011 Hugo Award.

A pioneering neuroscientist argues that we are more than our brains To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities of mental function. We ignore bodily influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.

A History of Sunderland deals in a lucid manner with the fascinating story of human activity on Wearside, a story that begins thousands of years ago when the Sunderland area was covered in dense woodland and Stone Age hunter-gatherers were at large. Subsequently, the Romans came and were followed by monks who transformed Wearmouth into a place of renown, best known for its associations with the famous scholar, Bede. During the Middle Ages, Sunderland became a borough and was affected by Scottish raids and the Black Death. In the Tudor period, it was described as 'in great decay of buildings and inhabitants', but change was at hand. The development of industry, particularly the coal trade, brought about a transformation—Sunderland began to thrive and its population grew. As the 18th century drew to a close, Sunderland's shipbuilding industry began a remarkable process of expansion, adding to the town's prosperity. But prosperity was not enjoyed by all. Some residents led lives blighted by grinding poverty in parts of Sunderland infamous for filth and squalor. Poverty was again prevalent during the Depression, when Sunderland had an unenviable reputation for high unemployment and overcrowding. The Second World War brought work, but it also brought death and destruction, and in the post-war years Sunderland witnessed remarkable house building programmes aimed at addressing its shortage of decent accommodation. Many other changes have occurred, such as the end of traditional heavy industries, the establishment of Nissan, and the granting of city status in 1992. 'There was a real need for a scholarly, readable, overall history of the city from its origins. Tom Corfe gave us one over twenty years ago, and now we ... [have] another, with new insights and up-to-date information.' Geoffrey Milburn—former Senior Lecturer in History, Sunderland Polytechnic. Illustrated throughout with 125 black and white images.

Abandoned factories, shipyards, warehouses, and refineries are features of many industrialized cities around the world. But despite their state of decline, these derelict sites remain vitally connected with the urban landscapes that surround them. In this enlightening new book, Alice Mah explores the experiences of urban decline and post-industrial change in three different community contexts: Niagara Falls, Canada/USA; Newcastle-upon-Tyne, UK; and Ivanovo, Russia.

Employing a unique methodological approach that combines ethnographic, spatial, and documentary methods, Mah draws on international comparisons of the landscapes and legacies of industrial ruination over the past forty years. Through this, she foregrounds the complex challenges of living with prolonged uncertainty and deprivation amidst socioeconomic change. This rich comparative study makes an essential contribution to far-reaching debates about the decline of manufacturing, regeneration, and identity, and will have important implications for urban theory and policy.

A book in which Wilf Mannion rubs shoulders with *The Sunderland Skinhead: recollections of Len Shakleton* blight the lives of village shoppers: and the appointment of Kevin Keegan as manager of Newcastle is celebrated by a man in a leather stetson, crooning 'For The Good Times' to the accompaniment of a midi organ, *THE FAR CORNER* is a tale of heroism and human frailty, passion and the perils of eating an egg mayonnaise stottie without staining your trousers. The story of the team that caused the last, great FA Cup upset... Today, it seems inconceivable that a team from the lower reaches of the Championship could beat the likes of Chelsea or Manchester United in the FA Cup Final. Yet, on 5 May 1973 that is exactly what happened. Six months earlier, Bob Stokoe took on an ailing Sunderland team, struggling at the bottom of the second division. But the long road to Wembley sees them beating Arsenal and Manchester City to reach the final, where they face Don Revie's mighty Leeds United in a game few expect them to win. Yet what lies ninety minutes ahead is the greatest FA Cup Final shock of all time. Sunderland's victory was, arguably, the last fairytale of recent footballing times. In *STOKOE, SUNDERLAND AND '73*, Lance Hardy talks to all the Sunderland players who turned out at Wembley that day and to the family of Bob Stokoe, to produce the definitive account of an unforgettable game.

The 2018 World Cup edition of the international bestseller and "the most intelligent book ever written about soccer" (San

Francisco Chronicle) is updated throughout and features new chapters on the FIFA scandal, why Iceland wins, and women's soccer. Named one of the Best Books of the Year by the Guardian, Slate, Financial Times, Independent (UK), and Bloomberg News Written with an economist's brain and a soccer writer's skill, Soccernomics applies high-powered analytical tools to everyday soccer topics, looking at data and revealing counterintuitive truths about the world's most beloved game. It all adds up to a revolutionary new approach that has helped change the way the game is played. This World Cup edition features ample new material, including fresh insights into FIFA's corruption, the surge in domestic violence during World Cups, and Western Europe's unprecedented dominance of global soccer.

For the first time, this in-depth study explores the history behind the construction of the famous 'Sunderland cottages'.
