This book brings together a wide range of contributors from across the common law world to identify and debate the principal moral and systemic challenges facing private law in the remaining part of the twenty-first century. The various contributions identify serious problems relating to complexity and overload, threats to research and education, the law's unintelligibility, the unsatisfactory nature of the law reform process and a general lack of public engagement. They consider the respective future roles of statutes, codes, and judge-made law (in the form of both common law and equitable rules). They consider how best to organise the private law system internally, and how to co-ordinate it externally with other public and economic systems (human rights, regulation, insurance markets and social security frameworks). They address the challenges for private law presented by new forms of technology, and by modern demands for the protection of new and intangible forms of moral interest, such as interests in privacy, 'vindication' and 'personal choice'. They also engage with the critical contemporary debates about access to, and the privatisation of, civil justice. The work is designed as a source of inspiration and reference for private lawyers, as well as legislators, policy-makers and students.

included, along with many of the broader topics associated with reserving in practice. The key features of reserving in a range of different contexts in the UK and elsewhere are also covered. The book contains material that will appeal to anyone with an interest in claims reserving. It can be used as a learning resource for actuarial students who are studying the relevant parts of their professional bodies' examinations, as well as by others who are new to the subject. More experienced insurance and other professionals can use the book to refresh or expand their knowledge in any of the wide range of reserving topics covered in the book.

Globalization and market integration have shaped the economic climate in such a way as to give rise to a considerable increase in cross-border mergers, acquisitions and corporate restructurings. However, the primary European Union (EU) legislation in this area – the Acquired Rights Directive – brings about only partial and minimum harmonization, giving rise to differences in the employee protective regime across the EU Member States. This book, the first full analysis of the EU-level private international law implications of the subject, masterfully addresses the plethora of questions that arise and presents well-considered and soundly based recommendations towards the introduction of a new and uniform conflict of laws path for transfers of undertakings throughout the EU. With a methodology that combines comparative, 'black letter', legal historical and empirical approaches, the author addresses such issues and topics as the following: – determination of applicable law both upon and after a transfer; – jurisdictional issues; – the main provisions of the Acquired Rights Directive and their content; – the main differences existing among the relevant laws of the Member States; – special characteristics of the maritime sector and seagoing workers; and – cross-border implications of Brexit. This book critically evaluates the existing rules on international jurisdiction and the conflict of laws relating to cross-border transfers of undertakings, clearly exposing the regime's merits and demerits. Counsel representing any actor involved in a cross-border merger, acquisition, or business restructuring – transferor, transferee, or affected employees – will be well served with this exemplary account of their legal position both before and after the transfer. In addition, policymakers, legislators and interested academics will benefit greatly from the author's clearly presented guidelines on the development of an EU-wide conflict of laws regime for transfers of undertakings.
