When it was first published in 1997, The Course Syllabus became the gold standard reference for both new and experienced college faculty. Like the first edition, this book is based on a learner-centered approach. Because faculty members are now deeply committed to engaging students in learning, the syllabus has evolved into a useful, if lengthy, document. Today's syllabus provides details about course objectives, requirements and expectations, and also includes information about teaching philosophies, specific activities and the rationale for their use, and tools essential to student success.

Curating the contributions of Twitter users via hashtags, crowd-sourced syllabi respond to evolving crises and critical questions in real time, resulting in living materials for educators and students. This book showcases how these syllabi are filling a gap in educational efficacy by providing access to forgotten, hidden and unpopular resources.

Can the syllabus constitute the curriculum? In this volume, Rocha explores curriculum theory through the lens of the syllabus. By critiquing curriculum studies and the entire field of education, overrun by the social sciences, Rocha provides an integrated vision of philosophy of education and curriculum theory, rooted in the humanities. Through an original reconceptualization, this text draws from a broad range of sources – ranging from Classical Antiquity to the present – offering a rich context for understanding curriculum as a philosophically salient concept, contained within the syllabus. The Syllabus as Curriculum features actual syllabi created and taught by the author in undergraduate and graduate courses at the University of British Columbia, Canada. These curated syllabi work as exemplars and media, supported by pedagogical commentary and context. Inspired by Augustine's Confessions, each part of the book culminates in a metaphorical "garden," which serves as a meditation on the syllabus in three senses: correspondence, essay, and outline. An original, powerful, and corrective contribution to the literature on curriculum studies, this work invites teachers and scholars from across the foundations of education, especially philosophy of education, art education, and those invested in curriculum theory, to see their contribution in more direct and integral ways.
