A savage indictment of religious extremism and man’s inhumanity to man, Lajja was banned in Bangladesh, but became a bestseller in the rest of the world. The Duttas—Sudhamoy and Kironmoyee, and their children, Suranjan and Maya—have lived in Bangladesh all their lives. Despite being members of a small, vulnerable Hindu community, they refuse to leave their country, unlike most of their friends and relatives. Sudhamoy believes with a naive mix of optimism and

idealism that his motherland will not let him down. And then, on 6 December 1992, the Babri Masjid is demolished. The world condemns the incident, but its immediate fallout is felt most acutely in Bangladesh, where Muslim mobs begin to seek out and attack Hindus. The nightmare inevitably arrives at the Duttas' doorstep, and their world begins to fall apart.

This Handbook is designed to assist Army Commanders in taking proper immediate action when faced with a variety of legal issues that might arise during your command. In its day, it - along with its sister publications FM 100-2-1 and 100-2-2 - was the "definitive source of unclassified information on Soviet ground forces and their interaction with other services in combined arms warfare." St. Michael Publishing House has re-printed these so that the military scholar and student of history may learn from other nation's way of war. This manual provides guidance on performing detailed site surveys of military installation facilities and civil works projects. Technical specifications, procedural guidance, and quality control criteria are outlined for developing large-scale site plans used for engineering drawings of planned projects, or detailed as-built feature mapping of completed facilities.

The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

This series covers the entire scope of rotary drilling operations in five units of technical information and review questions. These units are published in cooperation with the International Association of Drilling Contractors. In some cases, previous editions are available in Spanish, while supplies last, for \$14. Open-book comprehensive tests covering Units I, II, III, and V of the Rotary Drilling Series are available. This totally rewritten lesson deals with the proper handling and maintenance of the crown and traveling blocks and the drilling line. It also covers inspection procedures for equipment and programs for increasing drilling line service life. All measurements are given in both U.S. and SI units. Illustrations, summary boxes, and study questions enhance the student's learning experience.

Almost every dog has some degree of prey drive - it's in his genes - some more than others. You may experience it when your otherwise well mannered dog suddenly takes off chasing after a rabbit, squirrel, or a jogger. The old approach to solving this problem

involved the use of "corrective" devices like choke chains and electronic fences. A better approach includes training and management techniques that reward your dog for choosing to focus on and stay near you, the owner. Clarissa von Reinhardt has been working on the issue of how to deal with unwanted predatory behavior for many years. In this fascinating and inspiring book, she takes the readers step by step through her training methods, inviting them to learn more about a dog's complex spectrum of behavior, and ultimately to maintain as much control as possible over the urge to chase prey.
