The main objective of *À votre tour!* is to advance students to a level at which they can comfortably express themselves on a variety of French and francophone topics. Avoiding the excessive rigor of most intermediate texts, *À votre tour!* immerses students in authentic language and cultural contexts to achieve three key objectives: to build and reinforce oral and written communicative skills, to develop reading skills and cultural awareness, and to forge a strong linguistic base. New! *Tête à tête* communicative activities require one student to use communicative skills to elicit unknown details from another student in order to complete a task, with basic vocabulary and grammar structures recycled to reinforce previously learned material. New! Integrated video correlates to the *Français Pratique* section of each unit and to corresponding video activities provided in the Student Activities Manual. New! Updated cultural material highlights recent cultural trends, such as prices expressed in euros, French phone numbers with appropriate area codes; reflects the current political realities; and offers many entry points for further development of cultural awareness, grammar, and lexical points. A broad introduction to French and Francophone cultures provides authentic language and cultural contexts without an intense grammar curriculum—adapted for students who might take French as a minor, rather than a major. Accessible presentation enables students with basic conversational and grammar skills to achieve success through careful pacing, cyclical review and re-entry of structures and vocabulary, and engaging conversational material. Solid grammar review builds a framework by first covering basic structures and expressions, then adding more advanced concepts to expand students' linguistic abilities.

"The Second Edition of Andy Field's Discovering Statistics Using SPSS is an excellent book and a valuable addition to the teaching of statistics in the behavioral

sciences. The title of the book accurately reflects the approach taken. This is not simply a primer on how to use SPSS, but is a very good statistics text using SPSS as a vehicle for illustrating and expanding on the statistical content of the book. At the same time it also serves as a manual for SPSS, and has taught me things that I had not known about the software. I find this flexible approach to the blending of content and software to be an effective way of teaching the material. It is impossible to review this book without commenting on Andy's particular style. I enjoyed it immensely and think that it would appeal to both students and their instructors. It is refreshing to see someone who doesn't take himself too seriously." -- David C Howell, Professor Emeritus, University of Vermont

A little over ten years ago, Janine Marsh and her husband Mark gave up their city jobs in London to chase the good life in the countryside of northern France. Having overcome the obstacles of starting to renovate her dream home - an ancient, dilapidated barn - and fitting in with the peculiarities of her new neighbours, Janine is now the go-to expat in the area for those seeking to get to grips with a very different way of life. In the Seven Valleys, each season brings new challenges as well as new delights. Freezing weather in February threaten the lives of some of the four-legged locals; snow in March results in a broken arm, which in turn leads to an etiquette lesson at the local hospital; and a dramatic hailstorm in July destroys cars and houses, ultimately bringing the villagers closer together. With warmth and humour, Janine showcases a uniquely French outlook as two eternally ambitious expats drag a neglected farmhouse to life and stumble across the hidden gems of this very special part of the world _____ Praise for Janine Marsh's My Good Life in France: 'Warm, uplifting, and effervescent ...

Janine's voice and humor bubble right off the page, making you want to pack your bags and visit her fixer-upper home in rural France' - Samantha Verant, author of Seven Letters from Paris 'If you've ever dreamed of discovering "the real France", you won't want to miss this delightful book' - Keith Van Sickle, author of One Sip at a Time: Learning to Live in Provence

Argues that teachers should engage in research to increase their skills in the classroom and improve the quality of education for their students.

The Instructor's Guide provides a suggested framework that outlines each class session, complete with detailed assignments and rubrics for assessment. Teacher research is a tool that can help you continue to learn throughout your career. Pursuing your own questions has the potential to foster genuine understandings of educational methods, re-invigorate your teaching practices, and re-shape your curriculum for the benefit of your students. The Power of Questions makes connections between investigating issues related to your practice and designing research curricula for your students. Beverly Falk and Megan Blumenreich carefully illustrate and scaffold the research process for you by breaking it into smaller steps. They cite examples of real teacher researchers' studies as they provide advice, study questions, and exercise that help you: formulate a research question design a study investigate prior research on the subject choose the best tools for collecting evidence analyze your findings and apply them to the issues and dilemmas in your teaching life share what you've learned with others make research a regular part of your practice. Unlike any other book on teacher research, Falk and Blumenreich provide you with analogous research projects for your students that support a classroom environment of inquiry and discovery. For teacher educators, an accompanying online instructor's manual includes rubrics to support and assess teacher professional development. Whether you are a preservice, inservice or veteran teacher, through the inquiry and reflection of teacher research you can learn about your practice and your students and gain a deeper understanding of the potential that the inquiry process has to support powerful student learning.

'What is a self and how can a self come out of inanimate matter?' This is the riddle that drove Douglas Hofstadter to write this extraordinary book. In order to impart his original and personal view on the core mystery of human existence - our intangible sensation of 'I'-ness - Hofstadter defines the playful yet seemingly paradoxical notion of 'strange loop', and explicates this idea using analogies from many disciplines.

Teaching Literature is a challenging re-evaluation of the reasons behind why and how we teach literature. Judy Kravis, an experienced writer and university teacher asks fundamental questions of well known authors and teachers about their work and uncovers their perception of literature and its value to us as we approach the end of the 20th century. In a series of interviews with well known writers and teachers such as Edmund White, Hermione Lee, Andrei Codrescu, Grace Paley, Howard Barker and Anne Waldman, she probes their response to the value of literature for students and considers their different approaches as writers, teachers, academics, poets and performers. A consensus emerges from these interviews in which literature, and books are discussed as part of our relationship with the world - we know them in the same way as we know people, with warmth, familiarity and strangeness.
