A proven program for enhancing students' thinking and comprehension abilities Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy-to-implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms.

The HOPE Teacher Rating Scale is designed to help guide teachers in identifying gifted students for programming. It is unique in several ways. First, it is short, with only 11 items that measure academic and social/affective components of giftedness, making it easy to use. Second, it is invariant when used to identify students from low-income and culturally diverse families. Third, it can be used across grade levels, K-12. Finally, local norms ensure that the data are relevant to the specific school populations. With multiple measures and multiple pathways crucial for reversing the inequities in identifying culturally, economically, and linguistically diverse students, a teacher-nomination instrument like the HOPE Teacher Rating Scale is an important component of identification systems. The HOPE Teacher Rating Scale items have been well-developed and subjected to research using more than 12,000 diverse students in five validity studies to date. This manual is useful in understanding and interpreting the electronic scores generated from teachers' ratings of their students. This instrument is a must-have for any administrator or gifted-program coordinator involved in student identification. Grades K-12
