Prescribed burning is an important tool throughout Southern forests, grasslands, and croplands. The need to control fire became evident to allow forests to regenerate. This manual is intended to help resource managers to plan and execute prescribed burns in Southern forests and grasslands. A new appreciation and interest has developed in recent years for using prescribed fire in grasslands, especially hardwood forests, and on steep mountain slopes. Proper planning and execution of prescribed fires are necessary to reduce detrimental effects, such as the impacts on air and downstream water quality. This book investigates the complex and unpredictable temporalities of waste. Reflecting on waste in the context of sustainability, materiality, social practices, subjectivity and environmental challenges, the book covers a wide range of settings, from the municipal garbage crisis in Beirut, to food rescue campaigns in Hong Kong and the toxic by-products of computer chip production in Silicon Valley. Waste is one of the most pressing issues of the day, central to environmental

challenges and the development of healthier and more sustainable futures. The emergence of the new field of discard studies, in addition to expanding research across other disciplines within the social sciences, is testament to the centrality of waste as a crucial social, material and cultural problem and to the need for multi- and transdisciplinary approaches like those provided in this volume. This edited collection seeks to develop a framework that understands the material properties of different kinds of waste, not as fixed, stable or singular but as dynamic, relational and often invisible. It brings together new and cutting-edge research on the temporalities of waste by a diverse range of international authors. Collectively, this research presents a persuasive argument about the need to give more credence to the capacities of waste to provoke us in materially and temporally complex ways, especially those substances that complicate our understandings of life as bounded duration. This book will be of great interest to students and scholars of the environmental humanities, cultural studies, anthropology and human geography.

The Book That Started the Fermentation Revolution Sandor Ellix Katz, winner of a James Beard Award and New York Times bestselling author, whom Michael Pollan calls the "Johnny Appleseed of Fermentation" returns to the iconic book that started it all, but with a fresh perspective, renewed enthusiasm, and expanded wisdom from his travels around the world. This self-described fermentation revivalist is perhaps best known simply as Sandorkraut, which describes his joyful and demystifying approach to making and eating fermented foods, the health benefits of which have helped launch a nutrition-based food revolution. Since its publication in 2003, and aided by Katz's engaging and fervent workshop presentations, Wild Fermentation has inspired people to turn their kitchens into food labs: fermenting vegetables into sauerkraut, milk into cheese or yogurt, grains into sourdough bread, and much more. In turn, they've traded batches, shared recipes, and joined thousands of others on a journey of creating healthy food for themselves, their families, and their communities. Katz's work earned him the Craig Clairborne lifetime achievement award from the Southern Foodways Alliance, and has been called "one of the unlikely rock stars of the American food scene" by The New York Times. This updated and revised edition, now with full color photos throughout, is sure to introduce a whole new generation to the flavors and health benefits of fermented foods. It features many brand-new recipes—including Strawberry Kvass, African Sorghum Beer, and Infinite Buckwheat Bread--and updates and refines original recipes reflecting the author's ever-deepening knowledge of global food traditions that has influenced four-star chefs and home cooks alike. For Katz, his gateway to fermentation was sauerkraut. So open this book to find yours, and start a little food revolution right in your own kitchen. Praise for Sandor Ellix Katz and his books: "The Art of Fermentation is an extraordinary book, and an impressive work of passion and scholarship."--Deborah Madison, author of Local Flavors "Sandor Katz has proven himself to be the king of fermentation."--Sally Fallon Morell, President, The Weston A. Price Foundation "Sandor Katz has already awakened more people to the diversity and deliciousness of fermented foods than any other single person has over the last century."--Gary Paul Nabhan, author of Growing Food in a Hotter, Drier Land "The fermenting bible." -- Newsweek "In a country almost clinically obsessed with sterilization Katz reminds us of the forgotten benefits of living in harmony with our microbial relatives." -- Grist

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from binging at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a New York Times bestseller, Harari maps out our future.

*Beyond the Mountains* explores the ways in which Appalachia often served as a laboratory for the exploration and practice of American conceptions of nature. The region operated alternately as frontier, wilderness, rural hinterland, region of subsistence agriculture, bastion of yeoman farmers, and place to experiment with modernization. In these various takes on the southern mountains, scattered across time and space, both mountain residents and outsiders consistently believed that the region's environment made Appalachia distinctive, for better or worse. With chapters dedicated to microhistories focused on particular commodities, Drew A. Swanson builds upon recent Appalachian studies scholarship, emphasizing the diversity of a region so long considered a homogenous backwater. While Appalachia has a recognizable and real coherence rooted in folkways, agriculture, and politics (among other things), it is also a region of varied environments, people, and histories. These discrete stories are, however, linked through the power of conceptualizing nature and work together to reveal the ways in which ideas and uses of nature often created a sense of identity in Appalachia. Delving into the environmental history of the region reveals that Appalachian environments, rather than separating the mountains from the broader world, often served to connect the region to outside places.

Elihu Embree and his family were Quakers who were committed to the cause of abolishing slavery in the American South. Over a few short years, he raised the public consciousness in East Tennessee and achieved wide recognition with the publication of *The Emancipator*, the first periodical in the United States devoted solely to the abolitionist cause. The seven issues of the monthly publication are reproduced here, together with a brief history of Elihu and the Embree family's migration from France to Washington County, Tennessee.
