The authors of the volume set themselves an almost impossible task. They have put together, with very well done short annotations, an impressive array of bibliographical information on the contibution of religion to social change. Choice This bibliographic survey focuses on one aspect of religion: situations in which organized religious groups have served as active agents in social change. These situations have been studied by sociologists, historians, anthropologists, and political scientists, and in this work Wolcott and Bolger discuss the literature and provide a guide to the main sources in English. The concentration is on religious-based social movements in modern societies since the industrial revolution, and in Third World countries from the beginning of their independence movements. In addition, there are sections on such topics as messianic movements, the religious radical-right, and sacral kingship. The volume is organized into two major sections, an introductory survey and an annotated bibliography. The introductory survey includes discussions of the comparative study of religious social action, the role that religious organizations play in modern societies, contemporary studies of other societies, and churches and social action throughout history. The annotated bibliography contains over 600 items covering all the major religions and is arranged in the same organizational scheme as the survey. Each entry is numbered consecutively, and references throughout the text refer to the item numbers. The book concludes with author, title, and subject indexes. This reference work will be an important source for courses in religious studies, history, and the social sciences, as well as a valuable addition to both academic and public libraries.

Combining current knowledge of what works in teaching and learning with the most enduring philosophies of classical education, this book challenges readers to develop the skills, attitudes, knowledge, and habits of mind of strong writers.

"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

Case method teaching immerses students in realistic business situations--which include incomplete information, time constraints, and conflicting goals. The class discussion inherent in case teaching is well known for stimulating the development of students' critical thinking skills, yet instructors often need guidance on managing that class discussion to maximize learning. Teaching with Cases focuses on practical advice for instructors that can be easily implemented. It covers how to plan a course, how to teach it, and how to evaluate it. The book is organized by the three elements required for a great case-based course: 1) advance planning by the instructor, including implementation of a student contract; 2) how to make leading a vibrant case discussion easier and more systematic; and 3) planning for student evaluation after the course is complete. Teaching with Cases is ideal for anyone interested in case teaching, whether basing an entire course on cases, using cases as a supplement, or simply using discussion facilitation techniques. The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of Writing a Research Paper (by Lionel Menasche, 1998) and partly a companion to The ESL Writer's Handbook. Like WRP, teachers can move through the writing process in stages to end up with a thorough and coherent research paper. Like a handbook, the text is less dense, with explanations provided in sections for easy comprehension and practice exercises included.

This lively chronicle of the years 1847–1947—the century when the Jewish people changed how we see the world—is "[a] thrilling and tragic history…especially good on the ironies and chain-reaction intimacies that make a people and a past" (The Wall Street Journal). In a hundred-year period, a handful of men and women changed the world. Many of them are well known—Marx, Freud, Proust, Einstein, Kafka. Others have vanished from collective memory despite their enduring importance in our daily lives. Without Karl Landsteiner, for instance, there would be no blood transfusions or major surgery. Without Paul Ehrlich, no chemotherapy. Without Siegfried Marcus, no motor car. Without Rosalind Franklin, genetic science would look very different. Without Fritz Haber, there would not be enough food to sustain life on earth. What do these visionaries have in common? They all had Jewish origins. They all had a gift for thinking in wholly original, even earth-shattering ways. In 1847, the Jewish people made up less than 0.25% of the world's population, and yet they saw what others could not. How? Why? Norman Lebrecht has devoted half of his life to pondering and researching the mindset of the Jewish intellectuals, writers, scientists, and thinkers who turned the tides of history

and shaped the world today as we know it. In Genius & Anxiety, Lebrecht begins with the Communist Manifesto in 1847 and ends in 1947, when Israel was founded. This robust, magnificent, beautifully designed volume is "an urgent and moving history" (The Spectator, UK) and a celebration of Jewish genius and contribution.
