In response to public demand, federal legislation now requires testing of most students in the United States in reading and mathematics in grades three through eight. Many educators, parents, and policymakers who have paid little attention to testing policy issues in the past need to have better information on the topic than has generally been available. Kill the Messenger, now in

paperback, fills this gap. This is perhaps the most thorough and authoritative work in defense of educational testing ever written. Phelps points out that much research conducted by education insiders on the topic is based on ideological preference or profound self-interest. It is not surprising that they arrive at emphatically anti-testing conclusions. Much, if not most, of this hostile research is passed on to the public by journalists as if it were neutral, objective, and independent. Kill the Messenger explains and refutes many of the common criticisms of testing; describes testing opponents' strategies, through case studies of Texas and the SAT; illustrates the profound media bias against testing; acknowledges testing's limitations, and suggests how it can be improved; and finally, outlines the consequences of losing the "war on standardized testing.

State education departments and school districts face an important challenge in implementing a new law that requires disadvantaged students to be held to the same standards as other students. The new requirements come from provisions of the 1994 reauthorization of Title I, the largest federal effort in precollegiate education, which provides aid to "level the field" for disadvantaged students. Testing, Teaching, and Learning is written to help states and school districts comply with the new law, offering guidance for designing and implementing assessment and accountability systems. This book examines standards-based education reform and reviews the research on student assessment, focusing on the needs of disadvantaged students covered by Title

I. With examples of states and districts that have track records in new systems, the committee develops a practical "decision framework" for education officials. The book explores how best to design assessment and accountability systems that support high levels of student learning and to work toward continuous improvement. Testing, Teaching, and Learning will be an important tool for all involved in educating disadvantaged students—state and local administrators and classroom teachers.

Many students graduate from high school unprepared for the rigorous reading required in entry-level college and career work. This brief builds on a recent report (Wilkins et al. 2010) that used the Lexile measure (a method for measuring the reading difficulty of prose text and the reading capability of individuals) to estimate the proportion of Texas grade 11 public school students in 2009 ready for entry-level college reading in English. The previous study examined the overall grade 11 Texas student population; this brief uses the same methodology to present similar readiness estimates for student subgroups as defined by 10 characteristics that Texas uses for its state accountability system. An Excel[R] tool was created to enable school administrators to more easily compare the preparation of grade 11 students to read entry-level English textbooks from University of Texas (UT) system schools with that of students overall or selected subgroups of students statewide. Using a linguistic theory-based method for measuring reading difficulty (the Lexile[R] Framework for Reading), this study assessed reading readiness for subgroups of grade 11 students who took the annual Texas state

assessment. It describes the percentage of students who were prepared to read and comprehend entry-level college English textbooks. The study addressed the following questions: (1) How prepared are grade 11 Texas students to read and comprehend textbooks used in entry-level college English courses in the UT system as measured by the Lexile[R] Framework for Reading?; and (2) How does preparedness vary by student subgroup? Results are provided for subgroups defined by 10 characteristics. These subgroups are the reporting categories in the Academic Excellence Indicator System, the system that Texas uses to evaluate its K-12 schools and districts for state and federal accountability reporting: (1) Gender; (2) Race/ethnicity; (3) Economically disadvantaged status; (4) At-risk status; (5) Limited English proficiency status; (6) English as a second language status; (7) Gifted and talented education status; (8) Career and technical education status; (9) Special education status; and (10) Version of the grade 11 TAKS or TAKS-Accommodated. Across subgroups, gifted and talented (GT) students were the most prepared for college-level reading, followed by Asian and White students. Within specific sets of subgroup comparisons, results for very well prepared (able to read 95-100 percent of entry-level college English textbooks) students showed that: (1) Female students (55 percent) were more prepared than male students (46 percent); (2) Asian (69 percent), White (64 percent), and American Indian (56 percent) students were more prepared than Hispanic (40 percent) and Black (37 percent) students; (3) Economically

disadvantaged (37 percent) students were less prepared than those who were not economically disadvantaged (62 percent); (4) At-risk (28 percent) students were less prepared than those who were not at-risk (74 percent); (5) Limited English proficient (LEP) students (5 percent) were less prepared than those who were not LEP (54 percent); (6) English as a second language (ESL) students (4 percent) were less prepared than those who were not ESL (53 percent); (7) Students receiving GT services (88 percent) were more prepared than students not receiving GT services (47 percent); (8) Students taking at least one career and technical education course (49 percent) were slightly less prepared than those not taking such a course (56 percent); and (9) Students receiving special education services (9 percent) were less prepared than those who were not receiving such services (54 percent). This report includes a link to an online Excel[R] tool that can be downloaded to compare the college reading readiness levels of local students with the statewide normative results over-all and for each subgroup. The tool can be used compare the reading preparedness of any of the subgroups examined in this study. The main report provides examples illustrating how a district can use these comparisons. Appended are: (1) Sample text accompanied by estimated Lexile values derived using the Lexile[R] Framework for Reading; (2) Description of grade 11 exit-level Texas Assessment of Knowledge and Skills for English language arts and reading; (3) Subgroup descriptions; (4) Textbooks used by the University of Texas system schools; (5) The University of Texas system schools; (6)

One of the sinuous and subtly crafted stories in Tobias Wolff's new collection--his first in eleven years--begins with a man biting a dog. The fact that Wolff is reversing familiar expectations is only half the point. The other half is that Wolff makes the reversal seem inevitable: the dog has attacked his protagonist's young daughter. And everywhere in *The Night in Question*, we are reminded

that truth is deceptive, volatile, and often the last thing we want to know. A young reporter writes an obituary only to be fired when its subject walks into his office, very much alive. A soldier in Vietnam goads his lieutenant into sending him on increasingly dangerous missions. An impecunious mother and son go window-shopping for a domesticity that is forever beyond their grasp. Seamless, ironic, dizzying in their emotional aptness, these fifteen stories deliver small, exquisite shocks that leave us feeling invigorated and intensely alive.

A classic tale by Newbery Medalist Kate DiCamillo, America's beloved storyteller. One summer's day, ten-year-old India Opal Buloni goes down to the local supermarket for some groceries – and comes home with a dog. But Winn-Dixie is no ordinary dog. It's because of Winn-Dixie that Opal begins to make friends. And it's because of Winn-Dixie that she finally dares to ask her father about her mother, who left when Opal was three. In fact, as Opal admits, just about everything that happens that summer is because of Winn-Dixie. Featuring a new cover illustration by E. B. Lewis and an excerpt of Kate
