"How to Trade Forex and Currency Markets: A Beginner's Guide to Professional Forex Trading" is a practical and easy-to-follow workbook for people interested in forex (foreign exchange) trading.

Geared for newcomers to currency trading, the book takes its readers through the fundamentals of the market and provides easily-understood explanations of basic principles and terminology. One particularly interesting feature that distinguishes Zac Zarr's book from other publications on forex trading is that it provides its readers with a novel way of gaining insight into market developments. As Zarr points out early in the book, forex trading is the playground of two basic types of traders: individuals like Zarr (and presumably his readers), and what he terms the "big players." It's a dramatically uneven playing field, pitting relatively inexperienced amateurs trading alone with their own limited funds against corporate professionals trading with the advice and copious budgets of their employers. The ability of these solitary traders to influence the directions of markets is negligible, while the big players have the money and the volume to place their collective hands on the steering wheel. So, Zarr concluded early in his ten-year trading career, if you can't beat them, join them - not by applying for a job with your corporate competitors, but by getting inside their heads and figuring out how they think. That way, you can not only understand their moves, you can also anticipate

them. Unlike some of his counterparts, Zac Zarr is no snake oil salesman. He offers no wild promises of amazing profits for just following a few simple directions. Zarr does, however, establish a warm and empathetic relationship with his readers as he provides straightforward step-by-step explanations with hundreds of examples based on his own real-life forex trading experiences. Although "How to Trade Forex and Currency Markets: A Beginner's Guide to Professional Forex Trading" was written primarily for beginners, it's a book that many veteran traders will also want to read to gain new insights into the workings of currency markets.

Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first

beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you
