A boy provides instructions as he searches high and low for an elephant, which the reader can find in the illustrations.

All the animals are in a panic. The elephant's sneeze would blow the monkeys out of the trees, the feathers off the birds, the stripes off the zebra. Even the fish and the fly, the crocodile and the kangaroo, know what a catastrophe that sneeze would be. "Please don't sneeze!" they beg. . . . The classic story of an enormous sneeze in the marking, told in sprightly nonsense verse, has been newly illustrated in full color to delight a new generation of fans.

This marvelous edition of Audubon's Birds of America displays all 435 of Audubon's brilliant handcolored engravings in exquisite reproductions taken from the original plates of the Audubon Society's archival copy of the rare Double Elephant Folio. Although many attempts have been made to re-create the magnificent illustrations in Audubon's

masterpiece, nothing equals the level of fidelity or scale achieved in this high-quality edition. Organized and annotated by Roger Tory Peterson, America's best-known ornithologist, and issued with the full endorsement and cooperation of the Audubon Society, this magnificent volume is as thorough in scientific classification as it is beautiful. Peterson's fascinating introduction places Audubon in the context of the history of American ornithological art and also reproduces a wide sampling of the work of Audubon's notable predecessors and disciples, including Peterson's own justly famous paintings. This new systematic arrangement of the prints, complete with informative commentaries about each bird, made it possible to correct many of the problems or errors in Audubon's original edition revealed by later scholarship. The colorful captions in the back provide fascinating commentaries on each featured bird. AUTHOR: Roger Tory Peterson has been regarded as America's most notable ornithologist following the publication of *A Field Guide to the Birds* in 1934. Like Audubon, Peterson received many honorary degrees and awards, including the Presidential Medal of Honor. Virginia Marie Peterson is a scientist and an expert on the environmental effects of oil spills. 917 colour illustrations

A vividly illustrated account of John James Audubon's struggle in England to complete his masterpiece, *The Birds of America* Audubon's Elephant was the nickname given to John James Audubon's masterpiece, *The Birds of America*—an oversized folio of 435 life-size ornithological prints that remains to this day the most compelling depiction of bird life in the United States. Born in Haiti and raised in France, Audubon spent much of his adult life as a struggling American businessman on the frontier, where his obsession with birds nearly brought him to financial ruin. In 1826, his ambitious project was also in a precarious position—his folio remained unfinished, without an American publisher willing to fund it. Had Audubon not set sail for England, his artistic triumph might easily have turned into failure. Audubon's Elephant tells the story of the naturalist's unlikely success in Britain as a self-exiled artist in search of the money and inspiration necessary to complete his life's work. During twelve years spent traveling in Liverpool, Edinburgh, London, and Paris, Audubon won the interest of wealthy families, fellow artists, and the public with his eccentric brilliance and woodsman's charisma, ultimately securing enough subscriptions to publish *The Birds of America*. Duff Hart-Davis, himself a naturalist, has written a lively, highly engaging biography of Audubon's heady and memorable days as a great American artist abroad.

The landscapes of Madagascar have long delighted zoologists, who have discovered, in and among the island's baobab trees and thickets, a dizzying array of animals, including something approaching one hundred species of lemur. Madagascar's mammal fauna, for example, is far more diverse, and more endemic, than early explorers and naturalists ever dreamed of. But in the past 2,500 or so years—a period associated with natural climatic shifts and ecological change, as well as partially coinciding with the arrival of the island's first human settlers—a considerable proportion of Madagascar's forests have disappeared; and in the wake of this loss, a number of species unique to Madagascar have vanished forever into extinction. In *Extinct Madagascar*, noted scientists Steven M. Goodman and William L. Jungers explore the recent past of these land animal extinctions. Beginning with an introduction to the geologic and ecological history of Madagascar that provides context for the evolution, diversification, and, in some cases, rapid decline of the Malagasy fauna, Goodman and Jungers then seek to recapture these extinct mammals in their environs. Aided in their quest by artist Velizar Simeonovski's beautiful and haunting digital paintings—images of both individual species and ecosystem assemblages reproduced here in full color—Goodman and Jungers reconstruct the lives of these lost animals and trace their relationships to those still living. Published in conjunction with an exhibition of Simeonovski's artwork set to open at the Field Museum, Chicago, in the fall of 2014, Goodman and Jungers's awe-inspiring book will serve not only as a sobering reminder of the very real threat of extinction, but also as a stunning tribute to Madagascar's biodiversity and a catalyst for further research and conservation.

Elephants do not belong in trees. It's not natural. It makes other animals uncomfortable. This is the story of Larry, an elephant who wanted to live in a tree. This is a story about being the new kid and being a little bit different (okay, A LOT different). A story about acceptance and making friends. When Larry decides he wants to live in the big bushy tree in the middle of the wide-open field, the current residents, Bird, Squirrel and Monkey, are not very welcoming. They throw nuts at him and peck at his head; they tell him to leave and are downright rude. But Larry persists—why can't he live in the tree? When his new home is threatened by something much bigger than all the animals combined, Larry shows everyone that he cares just as much about the tree as they do.

'Birds of America' is one of the best known natural history books ever produced and also one of the most valuable - a complete set sold at auction in December 2010 for 7.3 million, which is a world record.
