

## The Book Of Mysteries

Everybody loves a good mystery and sometimes the questions can be more interesting than the answers. Will Pearson investigates twenty unique mysteries with their broad spectrum of strangeness. Some, like the sudden disappearance of the sailing ship *Mary Celeste's* passengers and crew have gained universal currency. Was the Wow! Signal a radio transmission from deep space, or was it the ambient resonating frequency of a passing comet? Cryptids like Bigfoot and the Loch Ness Monster teeter on the boundaries of probable and improbable, hoax and reality, fact and fiction. Whether it be the intrigue of lost civilisations, like Göblekli Tepe in Turkey, sensationalist interest in The Zodiac Killer, or the elusive Shugborough Code that neither Dickens nor Darwin could crack, each unsolved mystery presents a challenge in its own way. Occasionally, it can feel as if there's a conspiracy at work - one in which scientists, journalists and 'professional explainers' want to put an end to anything and everything mysterious in life. Thankfully, not everything can be nailed down, sucked dry of its secrets and turned into a factoid. Mysteries do still exist - and continue to tease us. Sceptic or believer, the fun lies in probing them.

From Atlantis to Nostradamus, Masons to Templars, Lionel and Patricia Fanthorpe have explored some of the greatest mysteries in this world and beyond. Now they attempt to answer even more questions about vampires, Sasquatch, and the Pyramids. No element of the unknown is safe from the Fanthorpes scrutinizing eyes.

THE POSTHUMOUS MASTERWORK FROM "ONE OF THE GREATEST AND MOST INFLUENTIAL MODERN WRITERS" (JAMES WOOD, THE NEW YORK TIMES BOOK REVIEW) Composed in the last years of Roberto Bolaño's life, 2666 was greeted across Europe and Latin America as his highest achievement, surpassing even his previous work in its strangeness, beauty, and scope. Its throng of unforgettable characters includes academics and convicts, an American sportswriter, an elusive German novelist, and a teenage student and her widowed, mentally unstable father. Their lives intersect in the urban sprawl of SantaTeresa—a fictional Juárez—on the U.S.-Mexico border, where hundreds of young factory workers, in the novel as in life, have disappeared.

The Book of Unsolved Mysteries features more than 230 fascinating true stories across eleven chapters. Topics include unsolved deaths, unusual disappearances, haunted homes, unexplained phenomena, creepy creatures, and ghostly appearances. Learn about the Zodiac Killer, Jack the Ripper, the Bermuda Triangle, the Georgia Guidestones, Amelia Earhart, and much more! 632 pages Padded hardcover

A future archeologist finds the remnants of a mysterious ancient people—us—in a wry satire that is “a marvel of imagination and . . . wonderfully illustrated” (The New York Times). It is the year 4022, and the entire ancient country of Usa has been buried under many feet of detritus from a catastrophe that occurred back in 1985. Howard Carson, an amateur archeologist, is crossing the perimeter of an abandoned excavation site when he feels the ground give way beneath him. Suddenly, he finds himself at the bottom of a shaft, which, judging from the DO NOT DISTURB sign hanging from an archaic doorknob, is clearly the entrance to a still-sealed burial chamber. Carson's incredible discoveries, including the remains of two bodies, one laid to rest on a ceremonial bed facing an altar that appeared to be a means of communicating with the

Gods and the other lying in a porcelain sarcophagus in the Inner Chamber. These dramatic discoveries give Carson all the clues he needs to piece together the entire civilization—which he gets utterly wrong. The acclaimed author and illustrator of *Castle and Pyramid*, David Macaulay presents a wonderfully tongue-in-cheek satire of both historical presumption and American self-importance.

Day by day throughout the calendar year, "takes the readers on a journey of divine revelation through ancient scriptures, the laws of creation, the deep of God's word, the hidden streams of history, the most important keys of spiritual truth, end-time mysteries, and the secrets of life"--Amazon.com.

One man's quest to find the oldest Bible scrolls in the world and uncover the story of the brilliant, doomed antiquarian accused of forging them. In the summer of 1883, Moses Wilhelm Shapira—archaeological treasure hunter and inveterate social climber—showed up unannounced in London claiming to have discovered the oldest copy of the Bible in the world. But before the museum could pony up his £1 million asking price for the scrolls—which discovery called into question the divine authorship of the scriptures—Shapira's nemesis, the French archaeologist Charles Clermont-Ganneau, denounced the manuscripts, turning the public against him. Distraught over this humiliating public rebuke, Shapira fled to the Netherlands and committed suicide. Then, in 1947 the Dead Sea Scrolls were discovered. Noting the similarities between these and Shapira's scrolls, scholars made efforts to re-examine Shapira's case, but it was too late: the primary piece of evidence, the parchment scrolls themselves had mysteriously vanished. Tigay, journalist and son of a renowned Biblical scholar, was galvanized by this peculiar story and this indecipherable man, and became determined

to find the scrolls. He sets out on a quest that takes him to Australia, England, Holland, Germany where he meets Shapira's still aggrieved descendants and Jerusalem where Shapira is still referred to in the present tense as a "Naughty boy". He wades into museum storerooms, musty English attics, and even the Jordanian gorge where the scrolls were said to have been found all in a tireless effort to uncover the truth about the scrolls and about Shapira, himself. At once historical drama and modern-day mystery, *The Lost Book of Moses* explores the nineteenth-century disappearance of Shapira's scrolls and Tigay's globetrotting hunt for the ancient manuscript. As it follows Tigay's trail to the truth, the book brings to light a flamboyant, romantic, devious, and ultimately tragic personality in a story that vibrates with the suspense of a classic detective tale. from Mary Osborne. Karen Cushman, Newberry Award winner.

Canada's beloved comic genius tells his own story for the first time. What is Rick Mercer going to do now? That was the question on everyone's lips when the beloved comedian retired his hugely successful TV show after 15 seasons—and at the peak of its popularity. The answer came not long after, when he roared back in a new role as stand-up-comedian, playing to sold-out houses wherever he appeared. And then Covid-19 struck. And his legions of fans began asking again: What is Rick Mercer going to do now? Well, for one thing, he's been writing a comic masterpiece. For the first time, this most private of public figures has turned the spotlight on himself, in a memoir that's as revealing as it is hilarious. In riveting anecdotal style, Rick charts his rise from highly unpromising schoolboy ("Rick still owes 15 dollars to the chocolate bar fundraiser" was one of the less brutal items on a typical report) to heights of TV fame, by way of an amazing break as a teenager when his one-man show, "Show Me the Button, I'll Push It. Or, Charles Lynch Must Die," became an overnight sensation—thanks in part to a bizarre ambush by its target, Charles Lynch himself. That's one story you won't soon forget, and this book is full of them. There's the tale of how little Rick stole a tree from the neighbours that's set to become a new Christmas classic. There's Rick the aspiring actor—hitting the road as a new young punk in a vanload of hippies and appearing on stage in Shakespeare—and a wealth of behind-scenes revelations about *This Hour Has 22 Minutes*, *Made in Canada*, *Talking to Americans* and the coming of the mega-hit *Rick Mercer Report*. It's a life so packed with incident and laughter we can only hope that a future answer to "What is Rick Mercer going to do now?" is: "Write volume two."

The wisdom tradition of ancient Israel, represented in the Hebrew Bible by Proverbs, Job, and Ecclesiastes and in the Apocrypha by Ben Sira and the Wisdom of Solomon, is also well-attested in the texts from Qumran. 4QInstruction (1Q26, 4Q415–418, 4Q423), the largest wisdom text of the Dead Sea Scrolls, is considered a sapiential text primarily because of its explicit and insistent pedagogical nature. To make this significant wisdom text more widely available, this volume offers a critical edition, translation, and commentary on the main fragments of 4QInstruction. It examines particular texts of 4QInstruction as well as broader issues, including its date, genre, main themes, and place in Second Temple Judaism. Finally, in order to contextualize this pivotal work, 4QInstruction's relationship to the sapiential and apocalyptic traditions is also explored.

As we grow older - most of all, in what we remember and what we dream - we live in the past. Sometimes, we live more vividly in the past than in the present. As an older man, Juan Diego will take a trip to the Philippines, but his dreams and memories will travel with him; he is most alive in his childhood and early adolescence in Mexico. 'An aura of fate had marked him,' John Irving writes. 'The chain of events, the links in our lives - what leads us where we're going, the courses we follow to our ends, what we don't see coming, and what we do - all this can be mysterious, or simply unseen, or even obvious.'

This visionary and engaging book provides a mathematical perspective on the fundamental ideas of numbers, space, life, evolution, the brain and the mind. The author suggests how a development of mathematical concepts in the spirit of category theory may lead to unravelling the mystery of the human mind and the design of universal learning algorithms. The book is divided into two parts, the first of which describes the ideas of great mathematicians and scientists, those who saw sparks of light in the dark sea of unknown. The second part, Memorandum Ergo, reflects on how mathematics can contribute to the understanding of the mystery of thought. It argues that the core of the human mind is a structurally elaborated object that needs a creation of a broad mathematical context for its understanding. Readers will discover the main properties of the expected mathematical objects within this context, called ERGO-SYSTEMS, and readers will see how these "systems" may serve as prototypes for design of universal learning computer programs. This is a work of great, poetical insight and is richly illustrated. It is a highly attractive read for all those who welcome a mathematical and scientific way of thinking about the world.
