In the tradition of Scott Turow's *One L* and Atul Gawande's *Better* comes a real-time, real-life chronicle from an impassioned young doctor on the front lines of high-stakes cardiology. It takes drive, persistence, and plenty of stamina to practice cardiology at the highest level. The competition for training fellowship spots is intense. Hundreds of applicants from all over the world compete to be accepted into the Cardiovascular Disease Training Fellowship at Johns Hopkins. Only nine are chosen each year. This is the story of one of those fellows. In *Alpha Docs*, Daniel Muñoz, M.D., recounts his transformation from wide-eyed young medical student to caring, empathetic professional—providing a rare inside

look into the day-to-day operations of one of the world's most prestigious medical institutions. The training is arduous and often unforgiving, as Muñoz and his colleagues are schooled by a staff of brilliant and demanding physicians. How they learn the art and science of untangling cardiac mysteries, how they live up to the standards of an iconic institution, how they survive the pressures and relentlessly push themselves to reach the top ranks of American medicine, supplies the beating heart of this gripping narrative. Readers accompany Muñoz as he interacts with his mentors, diagnoses and treats patients, counsels worried family members, and struggles to stay awake for days and nights on end. Lives are saved—and sometimes lost. But the rewards are immediate and the incentives powerful. As Muñoz confides after helping to rescue one man from the throes of a heart attack: “I knew where I wanted to be: not watching but doing, on the side of the glass where I can help shape a patient’s fate. I would be a cardiologist.” A unique yet universal story about striving to be the best in a high-risk, high-impact field, *Alpha Docs* provides fresh perspective on the state of America’s healthcare system as it captures all the fulfillment and frustrations of life as a doctor in the twenty-first century. Praise for *Alpha Docs* “From the book’s beginning, Dr. Daniel Muñoz captivates readers with [the] life-changing story that decided his future. . . . Thoroughly allows readers to understand how cardiologists are made. Highly recommended.”—Medical Library Association “In simple, compelling prose, *Alpha Docs* captures the reader’s attention with gripping case histories, the astonishing breadth and complexity of top-notch medical training, and often wry, sometimes pointed character sketches of the attending physicians.”—Hopkins Medicine magazine “An insider’s view of the high-stakes world of cardiology, *Alpha Docs* offers a vivid and fast-paced exploration of the cauldron that creates doctors in the twenty-first century.”—Danielle Ofri, M.D., Ph.D., author of *What Doctors Feel* “[A] heartfelt medical-education memoir . . . a successful portrayal of just how hard it is, intellectually, emotionally, and physically, to train as a physician specialist.”—Booklist “This engaging book will interest those considering a career in medicine as well as readers who want to learn more about cardiology.”—Library Journal “Muñoz begins to find his niche in the medical world, and his journey will inspire doctors in training and patients alike.”—Publishers Weekly “[A] satisfying immersion into what medical specialization requires . . . There is polish to the patient vignettes, giving them deeply human appeal.”—Kirkus Reviews

Whether you’re studying for the interventional cardiology board exam, preparing for recertification, or simply want a concise review of the field, *SCAI Interventional Cardiology Review, 3rd Edition*, brings you up to date with recent changes in interventional cardiology while also preparing you for exam success. Companion volume to: Mayo Clinic internal medicine board review. 10th ed. c2013.

The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association (ACVC) of the ESC. Cardiovascular diseases (CVDs) are a major cause of premature death worldwide and a cause of loss of disability-adjusted life years. For most types of CVD early diagnosis and intervention are independent drivers of patient outcome. Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients. This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care, not only cardiologists but also critical care specialists, emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues, cooperation among professionals, and interaction with other specialities in medicine. SECTION 1 focusses on the definition, structure, organisation and function of ICCU's, ethical issues and quality of care. SECTION 2 addresses the pre-hospital and immediate in-hospital (ED) emergency cardiac care. SECTIONS 3-5 discuss patient monitoring, diagnosis and specific procedures. Acute coronary syndromes (ACS), acute decompensated heart failure (ADHF), and serious arrhythmias form SECTIONS 6-8. The main other cardiovascular acute conditions are grouped in SECTION 9. Finally SECTION 10 is dedicated to the many concomitant acute non-cardiovascular conditions that contribute to the patients' case mix in ICCU. This edition includes new chapters such as low cardiac output states and cardiogenic shock, and pacemaker and ICDs: troubleshooting and chapters have been extensively revised. Purchasers of the print edition will also receive an access code to access the online version of the textbook which includes additional figures, tables, and videos to better to better illustrate diagnostic and therapeutic

techniques and procedures in IACC. The third edition of the ESC Textbook of Intensive and Acute Cardiovascular Care will establish a common basis of knowledge and a uniform and improved quality of care across the field.
