Will there be peace? Will there be war? Find out with Mundane Astrology. Here, in one volume, are three classic books on the astrology of nations and states, by H.S. Green, Raphael, and C.E.O. Carter: H.S. Green organizes his book planet-by-planet. He tells what each planet will do in the 12 houses. Raphael organizes the topic by house. He tells how mundane houses work when planets are in them. In addition, both authors deal with solar and lunar eclipses, and earthquakes. Green shows the effects of eclipses in the houses, while Raphael describes them by decanate (100 sections of the zodiac). Both mention the effects of comets, although little about these mysterious bodies is known astrologically. Charles Carter, writing after WWII, discusses why astrologers failed to predict the war and what that means for mundane astrology. His plea for better data has largely been met, but the need for more study remains. All three authors give astrological rulerships for countries and cities. These are centuries old and are weighted to England and Europe. Carter's rulers are the most up-to-date. These are the essential texts for serious study of mundane astrology. About the Authors H.S. Green was an astrologer associated with Alan Leo's astrological revival back in the first decade of the 20th century. His various books are highly regarded (all but this one out of print, sadly), but biographical details are sketchy. Raphael was the pen-name of one Robert Cross, 1850-1923. He was the sixth in a series of astrological writers who used the name "Raphael" & remains the best known of them all. He wrote books on virtually all astrological topics. His book on mundane astrology dates from 1910. Charles E.O. Carter, 1887-1968, was one of the outstanding British astrologers of the 20th century. He succeeded Alan Leo as head of the Astrological Lodge of the Theosophical Society, a post he held from 1920 to 1952. He was editor of Astrology, The Astrologer's Quarterly, from 1926 to 1959. Carter's persistent genius reestablished astrology as a serious discipline in England, after two centuries of decline. He wrote his book on Mundane Astrology in reaction to the failure of astrologers to forecast WWII. In 1939, astrologers in London knew there was a full-scale war on in China, they knew the situation with Germany was tense, but they had studied the charts for the year, they knew the fuss would blow over. And they were wrong. Carter set out to discover why, his book was the result.

Reinhold Ebertin's first edition of this book was revised and updated in 1974 and contains a treasure of information on comparative charts for marriage. This detailed textbook presents numerous examples of the relationship between the cosmos, man and marital compatibility. Keys are given on how to recognize whether a cosmic marriage will develop harmoniously or not. Rules of comparative analysis and significant aspects include the Ascendant, Midheaven and Moon's Node. Most of the examples are given using the traditional delineation of chart connections, however midpoints and the use of Ebertin's 90 degree wheel in Cosmobiology are given as well.

'Understanding Stellar Evolution' is based on a series of graduate-level courses taught at the University of Washington since 2004, and is written for physics and astronomy students and for anyone with a physics background who is interested in stars. It describes the structure and evolution of stars, with emphasis on the basic physical principles and the interplay between the different processes inside stars such as nuclear reactions, energy transport, chemical mixing, pulsation, mass loss, and rotation. Based on these principles, the evolution of low- and high-mass stars is explained from their formation to their death. In addition to homework exercises for each chapter, the text contains a large number of questions that are meant to stimulate the understanding of the physical principles. An extensive set of accompanying lecture slides is available for teachers in both Keynote(R) and PowerPoint(R) formats.

The basis for this book was a publication by Elsbeth Ebertin entitled *Sternenwandel und Weltgeschehen*. It contained cases of her own investigations and records. Her son, Reinhold Ebertin, and Georg Hoffman, Elsbeth's coworker, edited the text and added many new sources of information. Like Ptolemy's astronomical handbook, *Almagest*, this is the basis for much of the current information on fixed stars. Modern astrologers recognized that fixed stars carry an influence into the horoscope if conjunction a natal planet by longitude and even more so if by latitude. A prominent star on the Ascendant or Midheaven is said to be an indication of recognition achieved in the lifetime. The character of the star indicates the kind of influence the aspect will have. This book contains 73 major stars and describes their essential nature.

Readers of 'Astrological Counselling' will be delighted that Christina Rose has written a new book. In *Tapestry of Planetary Phases* she expands the phases introduced in Dane Rudhyar's Lunation cycle into interpretations for each pair of planets in their individual phases. A fascinating and in-depth work that will transform your chart interpretation, and a very worthy addition to any bookshelf.

A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs *The Book of Why*.

Use the power of the cosmos to harness your financial life. Get an edge in trading. Stay ahead of big economic trends that can affect your 401(k). Be prepared for upcoming economic shifts in business. "Trading In Sync With Commodities-Introducing Astrology To Your Technical Toolbox" combines Susan Abbott Gidel's expertise and passion for both the commodity markets and astrology into a book valuable to traders, investors and astrologers. Get a trading edge by anticipating dates for potential market highs and lows. Plan your investment strategy based on long-term economic and market outlook. Add commodity markets to your understanding of financial astrology. See when six major markets might make highs and lows through 2020. Written for those who might be unfamiliar with either commodities or astrology, Susan includes "101" chapters on each topic, as well as an astrological glossary. In addition, she covers how astrology can help you discover which markets you might be most attuned to trading. When Markets Peak and Bottom Susan researched six major commodity futures markets-S&P 500, Gold, Soybeans, Crude Oil, Euro FX and U.S. 10-year T-notes-and their connection to astrological transits, the ever-changing position of planets in the sky. To her delight, she found that each market showed tendencies to make important price highs and price lows when certain planets made certain connections to the horoscope chart cast for when each market began trading. This breakthrough research in the commodity markets required having the exact first-trade time and date. Susan obtained those dates and times with painstaking digging into exchange and news archives that sometimes revealed typos and errors in publicly available government documentation. This is where Susan's 40-year career in the commodity industry served her well and enabled her to spot potential discrepancies in first-trade data in order to find true, accurate information, which is essential to first-class astrological analysis.

Since the 1st edition of this book was published in 1991, it has been a widely used reference book for many astrologers and their students who have recognized the value and importance in horoscope interpretation of the midpoints--the halfway point between any two planets or a planet and a highly significant point such as Midheaven, Ascendant or the north or south Node of the Moon. The format of this edition is very similar to the first edition, but you will find that the author has updated the interpretive text, so do read it carefully...and if you have not used midpoints routinely before, you will soon realize how significant they can be in chart interpretation! Following are a few comments from well-known astrologers familiar with the first edition and midpoint techniques.

Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort r sum s, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction

Part 1 - "Setting the Scene," explains how to read the client before reading their chart. Body language, mind reading, and the elements are touched upon. Part 2 - "The Major Players," depicts specific planetary combinations and what they entail in regard to emotional responses, relationships, and the future. Part 3 - "Transformation Methods," teaches ways to expand awareness of the problem at hand, reframe the reading, expand sensory skills, and discover new communications systems. She asserts that card reading is a perfect metaphor for life, and "We can have the life of our dreams using card reading techniques." A rare gem.

Evolution of Stars and Stellar Populations is a comprehensive presentation of the theory of stellar evolution and its application to the study of stellar populations in galaxies. Taking a unique approach to the subject, this self-contained text introduces first the theory of stellar evolution in a clear and accessible manner, with particular emphasis placed on explaining the evolution with time of observable stellar properties, such as luminosities and surface chemical abundances. This is followed by a detailed presentation and discussion of a broad range of related techniques, that are widely applied by researchers in the field to investigate the formation and evolution of galaxies. This book will be invaluable for undergraduates and graduate students in astronomy and astrophysics, and will also be of interest to researchers working in the field of Galactic, extragalactic astronomy and cosmology. comprehensive presentation of stellar evolution theory introduces the concept of stellar population and describes "stellar population synthesis" methods to study ages and star formation histories of star clusters and galaxies presents stellar evolution as a tool for investigating the evolution of galaxies and of the universe in general *The Combination of Stellar Influences* is a well-known and popular book that explains the development of cosmobiology, which uses the 90-degree dial, and teaches the methods of this progressive school of astrology. This basic cosmobiology textbook was first printed in Germany (1949) under the title *The 90° Dial in Practice*. It has since had additions and improvements. Written by the acknowledged master, cosmobiology takes the fundamentals of the basic horoscope one step further by condensing the wheel to 90° by placing the planets into their groups of cardinal, fixed and mutable. The analysis then becomes very simplified, yet with details that are astounding. Explained are the methods, interpretations, use of solar arc directions, graphic ephemeris and more. See for yourself how using cosmobiology makes astrology become a quicker and more useful tool.

This book is an English translation of Book 17 of the *Astrologia Gallica*. In the First Section, Morin explains the Cabala of the Twelve Houses and their natural foundation. The Second Section is devoted to different methods of House Division. Several horoscopes are shown. The Third Section discusses the formal reasons for the natures of the Houses and their mathematical basis. Morin was a physician who became the most renowned of all French astrologers. He was appointed Royal Mathematician to King Louis XIII and was summoned to be present at the birth of the royal heir, the future King Louis XIV. James Herschel Holden, the translator, is Research Director of the American Federation of Astrologers and has been especially interested in the Morin Method of horoscope interpretation.

Using both a practical and a humanistic approach, Zip Dobyns guides the reader through the proven techniques used to rectify a birth chart. The precise methods she outlines to find the correct birth time are easy to follow, and include the use of various methods of planetary and angle progression, solar arc directions, local house cusps, transits, and more. She also discusses less dependable techniques. About destiny, Zip wrote: "Materialistic science assumes that destiny (experience) creates character. Materialistic astrology assumes that the planets create both character and destiny. Humanistic astrology assumes that our attitudes and actions (including unconscious desires and habit patterns) create our destiny, that we are born when our character-destiny matches the state of the cosmos, and that the planets offer a useful blueprint of the cosmic order, but do not create it. All approaches agree that internal nature and external circumstances match, so that we can understand one more clearly in the light of the other. They differ in where they place the power: in chance and matter (science), in the planets (materialistic astrology), or in the mind (humanistic astrology)."

A huge 466 page book full of essential knowledge. *How To Become Supernatural Man, The Universe and Cosmic Mystery* is an exploration of the universe and man's place in it. Rodney Collin examines 20th-century scientific discoveries and traditional esoteric teachings and concludes that the driving force behind everything is neither procreation nor survival, but expansion of awareness. Collin sets out to reconcile the considerable contradictions of the rational and imaginative minds and of the ways we see the external world versus our inner selves. For readers familiar with Gurdjieff's cosmology will here find further examinations of the systems outlined in by Ouspensky in *Search of the Miraculous*.

Synastry is the branch of astrology that tells us how we relate to other people. How Joe relates to Mary & what Mary may think of that. In this complete, classic guide to astrology & relationships, Robson goes far beyond the usual "his planets vs: her planets." He studies the overall weight of the two charts, the fertility of the inner planets, the condition of the 7th house. He compares her-planets-to- his-planets as well as his-houses-to-her-houses. Robson considers how strongly the individual wants relationships - and how many, whether he/she will marry early or late - or not at all, the likelihood of children, the possibility of divorce. He gives rules for wedding dates. In an extraordinary appendix, he lists some 266 classified rules & aphorisms, culled from many ancient sources. This is perhaps the finest book ever written on astrology & relationships. About the author: Vivian Erwood Robson lived from 1890 to 1942. By trade he was a librarian. Like many librarians he had a natural bent for research, and, in his particular case, astrology. He studied ancient astrologers closely, including Ptolemy & William Lilly. His books on electional astrology, fixed stars, and relationships, are 20th century classics.

Hellenistic astrology is a tradition of horoscopic astrology that was practiced in the Mediterranean region from approximately the first century BCE until the seventh century CE. It is the source of many of the modern traditions of astrology that still flourish around the world today, although it is only recently that many of the surviving texts of this tradition have become available again for astrologers to study. Hellenistic Astrology: The Study of Fate and Fortune is one of the first comprehensive surveys of this tradition in modern times. The book covers the history, philosophy, and techniques of ancient astrology, with a special focus on demonstrating how many of the fundamental concepts underlying the practice of western astrology originated during the Hellenistic period.
