This book explores how capital-labour relations and antagonisms structure forms of militancy in Vietnam and shows that Vietnamese labour militancy is in line with global trends of worker activism. Vietnamese labour politics is undergoing significant changes, with a new Labour code that became law in 2021 allowing workers to join 'worker representative organisations' not subordinate to the state-led union or the ruling Communist Party. This book reflects on the nature of Vietnamese labour politics on the cusp of reform. It focuses on nominally formal labour within the garment and footwear industry in the southern part of the country, the author argues that while employment in the formal economy is

expanding in terms of the absolute numbers of people working in formally registered firms, capital employs various ways to make conditions inside these companies increasingly insecure. In response, workers organise in forms of decentralised resistance. The book analyses two of these in detail; wildcat strikes and 'microstrikes'—short collective work stoppages that occur inside workplaces. Arguing that labour resistance is structured in relation to capital's behaviour, and not only because of weak labour relations institutions and mechanisms, this book makes a valuable contribution to the field of labour and social movement studies, development studies, sociology, and political economy and Southeast Asian Studies.

dimensions to in-house practice and how legal risk is defined and managed by in-house lawyers and others. The growing significance and status of the role of General Counsel has been accompanied by growth in legal risk as a phenomenon of importance. In-house lawyers are regularly exhorted to be more commercial, proactive and strategic, to be business leaders and not (mere) lawyers, but they are increasingly exposed for their roles in organisational scandals. This book poses the question: how far does going beyond being a lawyer conflict with or entail being more ethical? It explores the role of in-housers by calling on three key pieces of empirical research: two tranches of interviews with senior in-house lawyers and senior compliance staff; and an unparalleled large survey of in-house lawyers. On the basis of this evidence, the authors explore how ideas about in-house roles shape professional logics; how far professional notions such as independence play a role in those logics; and the ways in which ethical infrastructure are managed or are absent from in-house practice. It concludes with a discussion of whether and how in-house lawyers and their regulators need to take professionalism and professional ethicality more seriously.

stupidity of war and its horrors. Today, the Middle East is in flames, Israelis are fighting the Palestinians; there is killing each day in Syria, Afghanistan, Iraq, Yemen, and other parts of the world; cities are destroyed by incessant bombing. Victims are fleeing the killing, and emigration to Europe is at an all-time high. But contrary to the young soldiers in the US who learn about the inhumanness of war when they are sent to Vietnam or the Middle East, Alain Corcos lived through War World II as a teenager, then escaped with his brother from Nazi France across the Spanish border and joined the Allied Forces in Casablanca in March 1944, three months before D-Day. As an old man today, Corcos had time to reflect on war, and in his book *The Folly of War* he paints the pains that soldiers and civilians go through in any kind of war. He wonders if humanity is ready for peace. Wouldn't it be more reasonable to work together than killing each other for foolish reasons? We face many challenges -- the threat of nuclear war, overpopulation, climate change, and worldwide pandemics, to name a few. Corcos explores real solutions that offer hope instead of continued destruction. An urgent and passionate plea for a new and ecologically sustainable vision of the good life. The reality of runaway climate change is inextricably linked with the mass consumerist, capitalist society in which we live. And the cult of endless growth, and endless consumption of cheap disposable commodities isn't only destroying the world, it is damaging ourselves and our

way of being. How do we stop the impending catastrophe, and how can we create a movement capable of confronting it head-on? In *Post-Growth Living*, philosopher Kate Soper offers an urgent plea for a new vision of the good life, one that is capable of delinking prosperity from endless growth. Instead, she calls for a renewed emphasis on the joys of being, one that is capable of collective happiness not in consumption but by creating a future that allows not only for more free time, and less conventional and more creative ways of using it, but also for more fulfilling ways of working and existing. This is an urgent and necessary intervention into debates on climate change.

To successfully conduct an epidemiological study, academic subject knowledge must be combined with careful consideration of the practical elements involved. From an academic perspective, insights into the basis of epidemiology, the concepts behind how we study diseases, and the challenges and limitations of the results that emerge are prioritised. However, the success of the academic analysis depends on how, when, and where the data used is collected. *Epidemiological Studies: A Practical Guide* focuses on the practical challenges of epidemiological data collection. Essential topics, such as how to choose the population to study, how to maximise participation and retention, and how to frame questions so that subjects provide the information required, are the core of the material presented. The book explains the skills needed to conduct a study where data is collected and presented accurately, and in appropriate formats. In addition to presenting a step-by-step guide to epidemiological investigations, the chapters in the book are accompanied by examples of how to phrase the letters and forms needed for each stage of conducting a study. Focusing on measurement, study designs, statistics, methodological issues, and key skills, the book

provides a valuable background to epidemiological study. With detailed tables and figures, a clear chapter outline, and a straightforward index, the information presented is easily accessible and can quickly be applied to the reader's own work. Extensively revised, this new edition includes updates on case-crossover, Mendelian randomisation, and case-cohort. New chapters have been added to reflect the areas a student is now likely to encounter in an introductory epidemiological course, such as evidence synthesis, use of routine data, association or causation, feasibility, and pilot studies. *Epidemiological Studies: A Practical Guide* is ideal for students in epidemiology, public health, health research, and health services research. It is also highly relevant to post-graduate research students, and early stage clinical and non-clinical researchers.

The Symphonic Poem in Britain 1850-1950 aims to raise the status of the genre generally and in Britain specifically. The volume reaffirms British composers' confidence in dealing with literary texts and takes advantage of the contributors' interdisciplinary expertise by situating discussions of the tone poem in Britain in a variety of historical, analytical and cultural contexts. This book highlights some of the continental models that influenced British composers, and identifies a range of issues related to perceptions of the genre. Richard Strauss became an important figure in Britain during this time, not only in terms of the clear impact of his tone poems, but the debates over their value and even their ethics. A focus on French orchestral music in Britain represents a welcome addition to scholarly debate, and links to issues in several other chapters. The historical development of the genre, the impact of compositional models, issues highlighted in critical reception as well as programming strategies all contribute to a richer understanding of the symphonic poem in Britain. Works by British composers discussed in more detail include William Wallace's *Villon* (1909), Gustav Holst's *Beni Mora* (1909-10), Hubert Parry's *From Death to Life* (1914), John Ireland's *Mai-Dun* (1921), and Frank Bridge's orchestral 'poems' (1903-15).

Aimed at addressing issues relating to Brexit that affect every aspect of British society, this book seeks to not just list the problems but to offer viable solutions for “the way forward”. Divided into three parts, this book presents a comprehensive yet accessible discussion of the impact of Brexit on the United Kingdom. Part I brings together three social studies that reveal that Brexit may be the result of international nationalist narratives, and that the choice to leave the EU is already affecting Brits abroad and the future opportunities for British students. Part II turns its attention to national legal issues that are affected such as the Irish border, waste management, moral copyright, and the support of local enterprises. Lastly, Part III investigates commercial law touching on important topics such as international litigation, insolvency and tax law. As this publication suggests eventual solutions to several issues caused by Brexit, it may be of interest to not only other academics working in the field, but also to policy makers and relevant stakeholders.

This timely book explains how recognition and misrecognition have the power to fuel conflict and to initiate reconciliation. Constance Duncombe presents a detailed conceptual and empirical investigation of one of the most significant flashpoints in global politics: the fraught bilateral relations between the US and Iran. Duncombe uses this relationship to explore the importance of representation in shaping the identity of a state, as well as how it is recognised by others on the world stage. In 2015, Iran and the US reached an agreement on the framework for a long-term deal that allows Iran limited nuclear technological capacity in exchange for the lifting of debilitating economic sanctions. In light of decades of animosity between Iran and the US, which previously thwarted attempts on both sides to reach an amicable agreement, this book asks how we can best explain the initial success of this deal given the Trump administration's 2018 US withdrawal from the agreement.

This textbook explores the growing area of human-environment interaction. We live in the Anthropocene, an era dominated by humans, but also by the positive yet destructive environmental feedbacks that are poised to completely reset the relationships between nature and society. Modern and historic political, social, and cultural processes and physical landscape responses determine the intensity of these impacts. Yet different cultural groups, political and economic entities view, react to, and impact these human-environmental processes in spatially distinct and divergent ways. Providing an accessible, up-to-date, approach to human-environment interactions with balanced coverage of both social and natural science approaches to core environmental issues, this textbook is an integrative, multi-disciplinary offering that discusses environmental issues and processes within the context of human societies. The book begins by addressing the three most pressing issues of our time: climate change, threshold exceedance, and the 6th mass extinction. From there the authors identify within chapters on resources, population, agriculture and urbanization what precipitated and continues to sustain these three issues. They end with a chapter outlining some practical solutions to our human-environment crises. The book will be a valuable resource for interdisciplinary environment related courses bridging the gap between the social

become paralysed and almost voiceless since the second Intifada. However, despite the stagnation around the Israeli-Palestinian Peace Process, this book argues that other important groups have emerged that present new ways to challenge the status quo. These are radical groups that act in solidarity with the Palestinians and human rights organisations and whose aim is to reveal the realities of the occupation and hold the government to account. Leonie Fleishmann argues that these groups have been, and remain, the agenda setters, pushing the more moderate groups to mobilise more quickly and encouraging them to take up more confrontational ideas. Using social movements theory, and based on 50 interviews and participant observation, this book sheds light on contemporary Israeli peace activism. Denmark, Finland, Iceland, Norway and Sweden have led the way for modern family and gender policy. This report shows that improvements in gender equality have contributed considerably to their economic growth.

podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It’s why we’re here.” Whether you’ve read *Daring Greatly* and *Rising Strong* or you’re new to Brené Brown’s work, this book is for anyone who wants to step up and into brave leadership.
