The truth is I always wanted to learn how to draw. I envied those who could naturally put on paper what they saw and I didn't have much of a sense of proportion and distance, but the urge to draw never went away. And then I came across the GRID METHOD that changed how I saw and that changed something in me and I began looking at everything differently. I noticed how that line was shaped compared to the line next to it. It was like the whole world opened up differently to me and that REALLY excited me! So when I came across these simple images I was shown how to put them together for the Grid Method and the book began to form. I knew I had to share this so others could experience this mind shift too! So if you've always wanted to learn to draw too, check this book out. Put it in your cart. It gives you the opportunity to trace the drawing so you get a feel of what the curves and straight lines are like. Then you move on

to copying each box in the practice box. What this does is helps to train the mind to see ONLY the box image instead of the whole image. When your mind gets in the way, it fills in the details and it's hard for your hand to translate that. And that is why the Grid Method is so effective! In this book, you are given the opportunity to: Trace the Picture Practice drawing in each individual square And yet ANOTHER opportunity to practice because you'll find its easier the second time around Last, is a box without a grid giving you the opportunity to try it practicing what you learned It's fun to go back through the book from your earlier work and notice your progression! So go ahead and get it today and in no time you'll be retraining your brain to see differently.
