The title of this book, *Adventures of Ideas*, bears two meanings, both applicable to the subject-matter. One meaning is the effect of certain ideas in promoting the slow drift of mankind towards civilization. This is the Adventure of Ideas in the history of mankind. The other meaning is the author's adventure in framing a speculative scheme of ideas which shall be explanatory of the historical adventure.

When the Doctor sets out to educate Charley on the darker side of her race's future, he does not anticipate being embroiled in the protracted Orion War. The front line may be light years away, but the human race's struggle for victory has led to desperate measures.

Roy and Roger Mouse: Their Adventures in Tales End is a collection of short stories about a solemn little boy named Roy, called upon to help the inhabitants of a magical place named Tales End. His companion is Roger Mouse, who comes to get him while he is asleep and magically transports him to Tales End. The tales deal lightly with environmental awareness, social and personal issues and simply how to get along with others. While imparting important life lessons, the book is adventurous and delightful and the tales light and easy to understand.

"Darkheart: a faded neutron star surrounded by dead planets. But there is life on one of these icy rocks -- the last enclave of the Earth Empire, frozen in the image of another time. As the rest of the galaxy enjoys the fruits of the fledgling Federation, these isolated Imperials, bound to obey a forgotten ideal, harbour a dark obsession. The Doctor, Jamie and Victoria arrive to find that the Federation has at last come to reintegrate this lost colony, whether they like it or not. But all is not well in the Federation camp: relations and allegiances are changing. The fierce Veltrochni -- angered by the murder of their kinsmen -- have an entirely different agenda. And someone else is manipulating the mission for his own mysterious reasons -- another time traveler, a suave and assured master of his work. The Doctor must uncover the terrible secret which brought the Empire to this desolate sector, and find the source of the strange power maintaining their society. But can a Time Lord, facing the ultimate temptation, control his own desire? This adventure takes place between the television stories *The Web of Fear* and *Fury from the Deep*, and after the Missing Adventure *Twilight of the Gods*."--Page 4 of cover.

The Web is slowly but surely changing from a model in which a human reader browses content on web pages to a model in which services and clients (not necessarily humans) exchange information. And because of this, author Silvia

Puglisi explains, it makes more sense to build platforms instead of just products or applications. Platforms are like ecosystems interconnecting different applications, services, users, developers, and partners, and offer many benefits. In this book, you'll learn how to design and develop Representational State Transfer (REST) platforms in Rails. You'll begin with an introduction to Ruby on Rails, and then move quickly through new concepts. At the end of each chapter, you'll have learned something new about building and organically extending a multi-service platform spanning different devices—and will have had some fun in the process. By the end of the book you'll know how to build an architecture composed of different services accessing shared resources through a set of collaborating APIs and applications. Explore the basics of REST and HTTP, including REST architecture and the role of hypermedia Get to know Rails and Ruby on Rails Learn about API development and create an API Take a thorough look at REST, including Asynchronous REST and testing RESTful services Work with data streams as you map them onto an application UI and integrate external APIs in your application Learn about device-independent development Use data analytics to recognize important events, develop key metrics, and track them Explore various tools you can use to build your own data analytic platform Learn how to scale a Rails application successfully Examine privacy and security issues

and the implications of handling and collecting user data

A smart, humorous exploration of bodily thrills and paranoia from aerobics to acupuncture, strip shows to sensory deprivation. Your perception of your body will change when you read this book. You will be pulling on your boxer shorts or your black lace bra, and suddenly consider why you decorate yourself the way you do. You will shake up your martini, kiss your beloved, read a dirty magazine, go for a jog, and think about what your bodily behavior says about your soul. And what it is doing to your soul. You will notice the defenses you erect for yourself. Perhaps a tube of lipstick. Perhaps an addiction. Testing the boundaries between fear and temptation, Emily Jenkins takes us on a journey from ordinary physical experiences (going to the dentist, putting on stockings) to extreme ones (snorting heroin, shaving her head). She interviews people whose bodies are radically different from hers and enters communities where people share unusual ideas about physicality. Sometimes you will recognize your own

habits. Other times you'll be shocked or repulsed. Always you will find yourself questioning the ordinary things you do, rethinking your relationship to your body.

When Rachel Bertsche first moves to Chicago, she's thrilled to finally share a zip code, let alone an apartment, with her boyfriend. But shortly after getting married, Bertsche realizes that her new life is missing one thing: friends. Sure, she has plenty of BFFs—in New York and San Francisco and Boston and Washington, D.C. Still, in her adopted hometown, there's no one to call at the last minute for girl talk over brunch or a reality-TV marathon over a bottle of wine. Taking matters into her own hands, Bertsche develops a plan: She'll go on fifty-two friend-dates, one per week for a year, in hopes of meeting her new Best Friend Forever. In her thought-provoking, uproarious memoir, Bertsche blends the story of her girl-dates (whom she meets everywhere from improv class to friend rental websites) with the latest social research to examine how difficult—and hilariously awkward—it is to make new friends as an adult. In a time when women will happily announce they need a man but are embarrassed to admit they need a BFF, Bertsche uncovers the reality that no matter how great your love life is, you've gotta have friends.

Illustrated with 30 maps and 40 photos. "Britain defeats Italy on land and sea in Africa and the Mediterranean in 1940. "The first of eight volumes in the 18-volume official British History of the Second World War covering the Mediterranean and Middle Eastern theatres. After setting the political and military scene, the authors open the action with Italy's declaration of war and France's collapse in June 1940. Britain's painful neutralisation of the French fleet at Oran and Alexandria is followed by the first blows against the Italian empire in East Africa, and Italy's attacks on Egypt and Greece. The Fleet Air Arm's triumphant attack on the Italian Fleet at Taranto, masterminded by Admiral Cunningham, is trumped by General Wavell's even more successful Battle of Sidi Barrani in December, when vast numbers of Italians were captured for negligible British losses. The victory was followed up by Britain's capture of Bardia and Tobruk, and the founding of the Long Range Desert Group - the germ of the SAS. The mopping-up of General Graziani's forces in Cyrenaica, however, ominously resulted in Germany's decision to rescue their ally with General Rommel's Afrika Korps. However, the volume concludes optimistically with the successful campaign against Italy in Ethiopia, in which General Orde Wingate's irregular Gideon Force plays a prominent part. The military narrative is accompanied by descriptions of diplomatic developments and technological innovations such as the arrival of the Hurricane fighter plane, the Matilda tank and radar. The text is accompanied by ten appendices."-Print Edition
