When the 10 largest corporations have more combined economic power than 92% of all countries on Earth combined, the 50 largest financial corporations control wealth equal to 90% of Earth's GDP, the richest 1% of humans have more wealth than 99% of the world combined, and the eight richest humans have more wealth than the bottom 50% of Earth's entire population combined . . . it's safe to say humanity is in trouble. This is the only book you ever need to read to understand exactly what is wrong with our global economy today and how to fix it. Written by International Political Economy expert and former U.S. Government Intelligence operative, Ferris Eanfar. All proceeds go to the nonprofit, nonpartisan AngelPay Foundation.

Notwithstanding the growing importance of the 'emerging states' in global affairs and governance, many problems requiring immediate solutions have emerged at home largely as a consequence of the rapid economic development and associated sociopolitical changes. The middle-income trap is a major economic challenge faced by emerging states. This volume regards interest coordination for technological upgrading as crucial to avoid the trap and examines how various emerging states are grappling with this challenge by fostering public-private cooperation, voluntary associations of market players, and/or social networks. Social disparity is another serious problem. It is deeply rooted in history in the emerging states such as South Africa and many Latin American countries. However, income distribution is recently deteriorating even in East Asia that was once praised for its high economic growth with equity. Increasing pressure for political opening is another challenge for emerging states. This volume argues that the economic, social, and political problems are interwoven in the sense that the emerging states need to build political consensus in order to tackle the economic and social difficulties. Democratic institutions have not always been successful in this respect.

The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining!

Written in non-technical, everyday language that is accessible to the undergraduate audience, and requiring no background in economic analysis, this acclaimed text provides a unique approach to understanding what the practice of economics is all about. The authors address fourteen current economic issues, covering both micro- and macro-economics, and offer analyses and proposed solutions for each from Conservative, Liberal, and Radical perspectives. This new edition incorporates critical changes in economic policy since the last edition that affect every issue covered in the text. Tables have been updated throughout to include current economic data, and an all-new section on social policy frames the current debate about the Social Security system. The book's unique approach stimulates critical thinking on everyday issues that traditional texts either ignore or present as "settled" debates. It helps students to understand the dual role that ideology and logical/empirical argumentation play in economics. Issues are presented as stand-alone subjects that can be read in any sequence and used to supplement a wide range of principles of economics texts. An instructor's manual with a test bank and discussion questions is available to professors who adopt the text, and Power Point downloads are available as teaching aids. The text is also available in two separate volumes: Microeconomics Today and Macroeconomics Today.
