It is not "natural" for human beings to kill each other, for men to oppress women, for individuals to accumulate massive wealth and power, or to abuse nature. The roots of our current malaise lie in an "ego explosion" which occurred several thousand years ago. "Primitive," pre-civilization men and women were largely free of our social ills and had a more unified and harmonious state of being than us. This intensively-researched, highly praised book explains the origins of our problems and suggests what we can do to return to a state of harmony. It overturns the wisdom of the last few centuries and changes the way we think about the human race's past and future.

The mystery of Lizzie Borden has captivated the public as perhaps one of the most celebrated cases in our American justice system. Comparisons can be made to more modern-day trials, such as the O.J. Simpson trial, or the trails of Jodie Arias, Casey Anthony, and Susan Smith, which kept us riveted to our television screens to watch the gavel to gavel coverage of these sensational trials. Presented here for the first time in dialog form, are the full transcripts of the principal individuals, Bridget Sullivan, the

There are hosts of books and resources on the Flood and Noah's ark in the creation movement. But there has been a glaring problem in this area for 50 years. There isn't one basic laymen book on the Flood and ark to give answers to those questions asked all the time. Most books are too shallow, too specific, or too technical for the average Christian to read or get much from. Most people in pews could use a book like this to give them the basic answers they need about the Flood and the ark, then they will be prepared to go into further technical books or specific books from there. Answers the top questions Answers in Genesis receives about the FloodAddresses issues in a way that should be easy to read and yet still gives the reader some meat to chew on. The perfect "starter" book for those interested in learning more or for believers wanting share the truth with non-believers Most people in the pews could use a book like this to give them the basic answers they need about the Flood and Noah's Ark. After reading it, they will be prepared to go into further technical or specific books from there.

on buildings of crisis, whether marred by major earthquakes, suffering the effects of economic embargo, or damaged by war. Since the destruction of the World Trade Center, his designs have taken on new meaning and significance. In *The Storm and the Fall*, Woods brings his visions to a new depth, moving them from feverishly rendered drawings to three-dimensional space. The book focuses on two recent Woods installations - one at the Houghton Gallery at New York's Cooper Union, the other at the Fondation Cartier pour l'art contemporain, Paris - that address the role of today's architecture. *The Storm* critiques the geometric box that rules most building designs and proposes instead a dynamic field of potential energy, represented by a complex array of vectors. *The Fall* crystallizes a built space in the midst of collapse, witnessing a moment too brief to inhabit - except in imagination. Both pieces are explored in Woods's powerful sketches, renderings, models, and constructions, exposing the mutations that enable them to be. A postscript of his hopeful design for a new World Center relates even more of his ideas, and essays by Anthony Vidler and Paul Virilio offer insights into the significance of the work.

"In an ambitious blend of fact and fiction, including family secrets, documents from the era, and a thin, fragmentary case file unsealed by the court, novelist Sheila O'Connor tells the riveting story of V, a talented fifteen-year-old singer in 1930s Minneapolis who aspires to be a star. Drawing on the little-known American practice of incarcerating adolescent girls for "immorality" in the first half of the twentieth century, O'Connor follows young V from her early work as a nightclub entertainer to her subsequent six-year state school sentence for an unplanned pregnancy. As V struggles to survive within a system only nominally committed to rescue and reform, she endures injustices that will change the course of her life and the lives of her descendants. Inspired by O'Connor's research

on her unknown maternal grandmother and the long-term effects of intergenerational trauma, Evidence of V: A Novel in Fragments, Facts, and Fictions is a poignant excavation of familial and national history that remains disturbingly relevant—a harrowing story of exploitation and erasure, and the infinite ways in which girls, past and present, are punished for crimes they didn't commit. O'Connor's collage novel offers an engaging balance between illuminating a shameful and hidden chapter of American history and captivating the reader with the vivid and unforgettable character of V."--

In one volume, Mounting Evidence provides the most important evidence accumulated over many years that calls into question the government's account of 9/11. Any citizen of conscience reading it will demand a new investigation. —Mike Gravel, United States Senate, 1969-1981 There's little doubt the tragic attacks on 9/11 soon became the defining events of our time, shaping much of what has followed. But even now, over a decade later, how well does the public actually understand them? Other researchers have written about key facets of 9/11—the fall of World Trade Center buildings, the air-defense failures, the backgrounds of the hijackers, or the role of the Saudi funders. This impressively researched volume, however, is the first comprehensive treatment of the many different angles. It connects the dots to reveal disturbing patterns. Years after many of us thought the Crime of the Century was solved, “case closed,” additional evidence demands a closer look. These findings, which Dr. Rea presents in a lively, accessible way, call out for a new investigation. In Mounting Evidence, Dr. Rea shows how, by understanding the shattering events of that dark day, Americans can end

The death of the Roman Empire is one of the perennial mysteries of world history. Now, in this groundbreaking book, Peter Heather proposes a stunning new solution: Centuries of imperialism turned the neighbors Rome called barbarians into an enemy capable of dismantling an Empire that had dominated their lives for so long. A leading authority on the late Roman Empire and on the barbarians, Heather relates the extraordinary story of how Europe's barbarians, transformed by centuries of contact with Rome on every possible level, eventually pulled the empire apart. He shows first how the Huns overturned the existing strategic balance of power on Rome's European frontiers, to force the Goths and others to seek refuge inside the Empire. This prompted two generations of struggle, during which new barbarian coalitions, formed in response to Roman hostility, brought the Roman west to its knees. The Goths first destroyed a Roman army at the battle of Hadrianople in 378, and went on to sack Rome in 410. The Vandals spread devastation in Gaul and Spain, before conquering North Africa, the breadbasket of the Western Empire, in 439. We then meet Attila the Hun, whose reign of terror swept from Constantinople to Paris, but whose death in 453 ironically precipitated a final desperate phase of Roman collapse, culminating in the Vandals' defeat of the massive Byzantine Armada: the west's last chance

for survival. Peter Heather convincingly argues that the Roman Empire was not on the brink of social or moral collapse. What brought it to an end were the barbarians. Abigail Walker and Jarvis Daniels are longtime sweethearts headed in opposite directions. Abby, an aspiring cellist, wants out of her humble Detroit surroundings and is willing to shed blood, sweat, and tears to make it happen. Jarvis, on the other hand, is perfectly content with life. For him there's plenty of time to become a "responsible adult." For now, he's got everything he could want: a roof over his head, a PlayStation, and the love of a good woman. When Abby's music career takes off and she moves to Chicago, Jarvis gets the boot---sort of. Abby still loves him, but his penchant for faded sweaters and meatball subs just doesn't fit into her new, sophisticated world of designer gowns and concert halls. They're in different leagues and Abby makes no qualms of reminding him of it whenever she deigns to visit him. When the couple is involved in a near-fatal car crash, they are broken, stripped, and broken again both stumbling through a journey of healing and self-discovery as they struggle to accept the merciful hand of the only One who can help them up after a fall.

Falls and fall-related injuries among older adults have emerged as serious global health concerns, which place a burden on individuals, their families, and greater society. As fall incidence rates increase alongside our globally aging population, fall-related mortality, hospitalizations, and costs are reaching never seen before heights. Because falls occur in clinical and community settings, additional efforts are needed to understand the intrinsic and extrinsic factors that cause falls among older adults; effective strategies to reduce fall-related risk; and the role of various professionals in interventions and efforts to prevent falls (e.g., nurses, physicians, physical therapists, occupational therapists, health educators, social workers, economists, policy makers). As such, this Research Topic sought articles that described interventions at the clinical, community, and/or policy level to prevent falls and related risk factors. Preference was given to articles related to multi-factorial, evidence-based interventions in clinical (e.g., hospitals, long-term care facilities, skilled nursing facilities, residential facilities) and community (e.g., senior centers, recreation facilities, faith-based organizations) settings. However, articles related to public health indicators and social determinants related to falls were also included based on their direct implications for evidence-based interventions and best practices.

verse. But what if there was another side to the man who wrote “The Raven” and “The Fall of the House of Usher”? In *The Reason for the Darkness of the Night*, John Tresch offers a bold new biography of a writer whose short, tortured life continues to fascinate. Shining a spotlight on an era when the lines separating entertainment, speculation, and scientific inquiry were blurred, Tresch reveals Poe’s obsession with science and lifelong ambition to advance and question human knowledge. Even as he composed dazzling works of fiction, he remained an avid and often combative commentator on new discoveries, publishing and hustling in literary scenes that also hosted the era’s most prominent scientists, semi-scientists, and pseudo-intellectual rogues. As one newspaper put it, “Mr. Poe is not merely a man of science—not merely a poet—not merely a man of letters. He is all combined; and perhaps he is something more.” Taking us through his early training in mathematics and engineering at West Point and the tumultuous years that followed, Tresch shows that Poe lived, thought, and suffered surrounded by science—and that many of his most renowned and imaginative works can best be understood in its company. He cast doubt on perceived certainties even as he hungered for knowledge, and at the end of his life delivered a mind-bending lecture on the origins of the universe that would win the admiration of twentieth-century physicists. Pursuing extraordinary conjectures and a unique aesthetic vision, he remained a figure of explosive contradiction: he gleefully exposed the hoaxes of the era’s scientific fraudsters even as he perpetrated hoaxes himself. Tracing Poe’s hard and brilliant journey, *The Reason for the Darkness of the Night* is an essential new portrait of a writer whose life is synonymous with mystery and imagination—and an entertaining, erudite tour of the world of American science just as it was beginning to come into its own.
