Beginning in 1912, *Defiant Spirits* traces the artistic development of Tom Thomson and the future members of the Group of Seven, Franklin Carmichael, Lawren Harris, A. Y. Jackson, Franz Johnston, Arthur Lismer, J. E. H. MacDonald, and Frederick Varley, over a dozen years in Canadian history. Working in an eclectic and sometimes controversial blend of modernist styles, they produced what an English critic celebrated in the 1920s as the “most vital group of paintings” of the 20th century. Inspired by Cézanne, Van Gogh and other modernist artists, they tried to interpret the Ontario landscape in light of the strategies of the international avant-garde. Based after 1914 in the purpose-built Studio Building for Canadian Art, the young artists embarked on what Lawren Harris called “an all-engrossing adventure”: travelling north into the anadian Shield and forging a style of painting appropriate to what they regarded as the unique features of Canada’s northern landscape. Rigorously researched and drawn from archival documents and letters, *Defiant Spirits* constitutes a “group biography,” reconstructing the men’s aspirations, frustrations and achievements. It details not only the lives of Tom Thomson and the members of the Group of Seven but also the political and social history of Canada. The current world economy is interconnected; however, due to recent economic crises, trade deficits, and nationalist movements, there is a political trend of economic nationalism that is taking root in countries around the world. As such, global economies around the world are decreasing their international trade and introducing import tariffs and economic protectionism. *International Firms’ Economic Nationalism and Trade Policies in the Globalization Era* provides a comprehensive understanding of the recent rise of economic nationalism in the context of the hyper-connected global economy by providing strategies and country-specific solutions for domestic and international firms. Covering how multinational corporations can overcome the protectionist sentiments while reinventing their corporate social responsibility models, it showcases how economic nationalism and globalization can successfully coexist. This publication is ideally designed for business leaders, economists, professionals, policymakers, researchers, and academicians.

Crises and end time expectations are closely linked to one another. The present volume collates interdisciplinary research from specialists in the study of apocalyptic and eschatological subjects worldwide and overcomes the existing Euro-centrism by incorporating a broader perspective.

Pathbreaking theoretically and innovative in treatment, *Populism in Global Perspective* is a seminal addition to the literature on arguably the most controversial and fervently discussed topic in political science today. The book brings together established and rising stars in the field of populism studies, in an integrated set of theoretical and empirical studies centered on a discursive-performative notion of populism. Contributors argue that populist identification is relational and sociocultural, and demonstrate the importance of studying populism phenomenologically together with anti-populism. The truly global series of case studies of populism in the US, Western and Southern Europe, Latin America, South Africa, the Philippines, and Turkey achieves a deliberate balance of left and right instances of populism, including within regions, and of populism in government and opposition. Written in a style approachable to students and specialists alike, the volume provides a substantial foundation for current knowledge on the topic. *Populism in Global Perspective* is a must read for comparativists, political theorists, sociologists, area studies specialists, and all educated readers interested in populism worldwide.

*Advances in 2nd Generation of Bioethanol Production* presents a comprehensive overview of technologies and strategies for the conversion of lignocellulosic biomass. This includes issues

like sustainable production, environmental and economic benefits, and the main hurdles for upscaling and achieving commercial viability. The book assesses the current biomass conversion technologies, their readiness level for commercial production, and applications of bioethanol in bioenergy and chemical feedstock. The essential conversion process of 2nd generation biofuels, including feedstock composition and pretreatment, is then broken down, with special focus on advantages and pitfalls of each feedstock and process. It also explores the advances and challenges of bioprocessing, hydrolysis technologies and simultaneous fermentation of pentose and hexose. Finally, it presents the current status and bottlenecks for industrial production of bioethanol, as well as its future prospects. Its interdisciplinary approach, drawing upon plant biology, chemistry, biochemistry, microbiology, and genetics, makes *Advances in 2nd Generation of Bioethanol Production* a must-have reference for researchers in academia and industry R&D. It allows them to compare challenges and opportunities of new technologies and identify the gaps where new technology is needed. Practitioners in the industry also benefit from the information on working principles, design and control of the bioethanol production process, highlighting areas where technology innovation and investment should be placed. Graduate students and researchers newly entered in this field find here a key-resource to thoroughly understand the process as well as the fundamentals of bioethanol and bioproducts production from lignocellulosic biomass. Presents fundamentals and state-of-the-art of available pathways for bioethanol and bioproducts production from lignocellulosic biomass Discusses key-challenges for large scale production of bioethanol, such as pretreatment and hydrolysis Covers the specificities of various feedstocks and processes, the role of microorganisms in fermentation, saccharification limitations and challenges in the C5 and C6 fermentation

The relationship between teacher education and internationalization is often regarded as one that has just begun, sparked by globalization and its knowledge economy. This book questions such an assumption by arguing that although contemporary demands on teacher education have intensified the need for internationalization, teacher education and internationalization have a deep and complex relationship, which is context dependent and has developed differently over time. This book urges its readers to question and rethink overly nationalistic approaches to teacher education. It shows how the internationalization of teacher education could be used as a strategic tool to support sustainable educational development and meet labor market demands for twenty-first century competencies. It puts the spotlight on the imperatives for internationalizing teacher education and its present forms, and considers this current phenomenon in the context of Singapore. This nation state has a history of internationalization, albeit with differing rationales, dimensions and strategies.

Internationalization has been a key driver of the Singapore education system's sustained growth, from its humble beginnings to its present state as one of the best performing education systems in the world. This book will be of great interest to policy makers, academics, researchers and graduate students in the fields of international and comparative education, teacher education, and South East Asian studies.

The ramifications of the Global Financial Crisis, which erupted in 2007, continue to surprise not only the general public but also finance professionals, economists, and journalists. Faced with this challenge, *Preparing for the Next Financial Crisis* goes back to basics. The authors ask: what do theory and empirical observations tell us about the causes and the consequences of financial crisis and instability? In what has become an increasingly complex financial world, what lessons can we learn from economic policies, which have been implemented, and research, which has developed extremely rapidly in recent years, so as not to repeat past mistakes? In this comprehensive review of the literature, which is both complete and balanced, the authors highlight the points of consensus among economists and policymakers. They assess the capacity of economic policies and institutions in limiting the cost of financial

instability. In conclusion, they ask if the financial system has become safer, in the light especially of the Covid-19 Global Crisis. Ten years after the GFC crisis, this is a timely review of the reform agenda, the progress made, and the areas where further changes need to be made to address new risks and challenges.

The instant #1 bestseller. "This taut and terrifying book is among the most closely observed accounts of Donald J. Trump's shambolic tenure in office to date." - Dwight Garner, The New York Times Washington Post national investigative reporter Carol Leonnig and White House bureau chief Philip Rucker, both Pulitzer Prize winners, provide the definitive insider narrative of Donald Trump's presidency "I alone can fix it." So proclaimed Donald J. Trump on July 21, 2016, accepting the Republican presidential nomination and promising to restore what he described as a fallen nation. Yet as he undertook the actual work of the commander in chief, it became nearly impossible to see beyond the daily chaos of scandal, investigation, and constant bluster. In fact, there were patterns to his behavior and that of his associates. The universal value of the Trump administration was loyalty—not to the country, but to the president himself—and Trump's North Star was always the perpetuation of his own power. With deep and unmatched sources throughout Washington, D.C., Carol Leonnig and Philip Rucker reveal the forty-fifth president up close. Here, for the first time, certain officials who felt honor-bound not to divulge what they witnessed in positions of trust tell the truth for the benefit of history. A peerless and gripping narrative, *A Very Stable Genius* not only reveals President Trump at his most unvarnished but shows how he tested the strength of America's democracy and its common heart as a nation.

*Global Marketing Management, 8th Edition* combines academic rigor, contemporary relevance, and student-friendly readability to review how marketing managers can succeed in the increasingly competitive international business environment. This in-depth yet accessible textbook helps students understand state-of-the-art global marketing practices and recognize how marketing managers work across business functions to achieve overall corporate goals. The author provides relevant historical background and offers logical explanations of current trends based on information from marketing executives and academic researchers around the world. Designed for students majoring in business, this thoroughly updated eighth edition both describes today's multilateral realities and explores the future of marketing in a global context. Building upon four main themes, the text discusses marketing management in light of the drastic changes the global economy has undergone, the explosive growth of information technology and e-commerce, the economic and political forces of globalization, and the various consequences of corporate action such as environmental pollution, substandard food safety, and unsafe work environments. Each chapter contains review and discussion questions to encourage classroom participation and strengthen student learning.

Acquiring Modernity examines the modern world's central features, from historical origins to recent events. Combining classic models, recent scholarship, and contemporary developments, its topics include science, colonialism, class inequalities, education, religion, politics, racism, sexism, the environment, and economic crises.

The law of treaties is in constant motion, understood not only as locomotion, but also as motion through time and as change. Thus, kinesis and stasis, two sides of the same concept of 'motion', are the central themes of *Treaties in Motion*. The concept of motion adopted in this book is based on the philosophy of Aristotle. He identified six types of motion: creation (genesis), increase (auxesis), diminution (meiosis), alteration (alloiosis), destruction (phthora), and change of place (kata topon metabole), which has been amended by the authors to change in space-time (kata topon kai chronon metavole) to reflect our modern scientific understanding of time as a dimension through which motion and change occurs. Each chapter's analysis proceeds by focusing on a specific area of a treaty's 'life-cycle', where each type of motion shines through and is described through three different frames of reference: treaties, the Vienna Convention of the Law of Treaties, and customary law.

This multidisciplinary study takes a fresh look at Judean history and biblical literature in the late fourth and third centuries BCE. In a major reappraisal of this era, the contributions to this volume depict it as one in which critical changes took place. Until recently, the period from Alexander's conquest in 332 BCE to the early years of Seleucid domination following Antiochus III's conquest in 198 BCE was reputed to be poorly documented in material evidence and textual production, buttressing the view that the era from late Persian to Hasmonean times was one of seamless continuity. Biblical scholars believed that no literary activity belonged to the Hellenistic age, and archaeologists were unable to refine their understanding because of a lack of secure chronological markers. However, recent studies are revealing this period as one of major social changes and intense literary activity. Historians have shed new light on the nature of the Hellenistic empires and the relationship between the central power and local entities in ancient imperial settings, and the redating of several biblical texts to the third century BCE challenges the traditional periodization of Judean history. Bringing together Hellenistic history, the archaeology of Judea, and biblical studies, this volume appraises the early Hellenistic period anew as a time of great transition and change and situates Judea within its broader regional and transregional imperial contexts.

The many technical and computational problems that appear to be constantly emerging in various branches of physics and engineering beg for a more detailed understanding of the fundamental mathematics that serves as the cornerstone of our way of understanding natural phenomena. The purpose of this Special Issue was to establish a brief collection of carefully selected articles authored by promising young scientists and the world's leading experts in pure and applied mathematics, highlighting the state-of-the-art of the various research lines focusing on the study of analytical and numerical mathematical methods for pure and applied sciences.

This book presents the applications of fractional calculus, fractional operators of non-integer orders and fractional differential equations in describing economic dynamics with long memory. Generalizations of basic economic concepts, notions and methods for the economic processes with memory are suggested. New micro and macroeconomic models with continuous time are proposed to describe the fractional economic dynamics with long memory as well.

This revised and updated edition presents detailed analysis of the history and current state of the G20, and the challenges it faces. The emergence of the G20 was the result of calls for full inclusion of major developing and other systemically important countries and to reflect new global economic and political realities. The growth of Chinese power, growing significance of other major developing countries and new concerns concerning anti-globalization and rising protectionism in the West have all resulted in important changes to the dynamics of the institution. The suspension of Russia's membership in the G8 has also necessitated a change in G7/G20 dynamics and the G20's processes, agenda priorities and role in global governance. Providing a historical overview and analysis of the evolving agenda, methods of performance evaluation, relationship with structured international organizations and other external actors, Hajnal's text is an authoritative work of history, analysis and reference on the G20 and also G7/G8/G20 reform. This book is an essential source for researchers and students focusing on the G20, international organizations and global governance, and more generally for scholars in the fields of political science, economics, and finance.

China's New Silk Road initiative constitutes one of the most ambitious projects in recent decades designed to change the pattern of the global economic division of labour as well as the geostrategic balance of power. It has the potential to create a new fabric of industrial value creation that links China and East Asia via Central and South Asia with Europe, and to forge new regional and multilateral institutions that complement or compete with existing regional and global governance systems. First proposed in 2013, the new initiative is only now starting to be rolled-out, with trade relations gradually intensifying, and the first investment projects and infrastructure clusters becoming manifest. However, the full impact of the evolving new regional value chains on global goods flows, investment activity, supra-national institution building, as well as their wider international implications, remains undetermined. This book brings together leading scholars from economics, political science and area studies, who present the latest cutting-edge knowledge and the latest state-of-the-art economic and political analysis on how the new initiative is developing and likely to develop.

The Routledge Handbook of International Cybersecurity examines the development and use of information and communication technologies (ICTs) from the perspective of international peace and security. Acknowledging that the very notion of peace and security has become more complex, the volume seeks to determine which questions of cybersecurity are indeed of relevance for international peace and security and which, while requiring international attention, are simply issues of contemporary governance or development. The Handbook offers a variety of thematic, regional and disciplinary perspectives on the question of international cybersecurity, and the chapters contextualize cybersecurity in the broader contestation over the world order, international law, conflict, human rights, governance and development. The volume is split into four thematic sections: Concepts and frameworks; Challenges to secure and peaceful cyberspace; National and regional perspectives on cybersecurity; Global approaches to cybersecurity. This book will be of much interest to students of cybersecurity, computer science, sociology, international law, defence studies and International Relations in general.

Now available in a paper-bound edition Nearly a century ago, a group of artists travelled into northern Ontario and farther afield to capture the raw, terrible beauty that lay just beyond the outskirts of Canada's cities and towns. Armed with sketchbooks, brushes, and paint boxes, they set off into the heart of the wilderness with the singular purpose of interpreting the

landscape in a modern mode of artistic expression. In July 1977, Jim and Sue Waddington set off on their own expedition to discover the places that inspired these artists. Determined to locate, document, and photograph the actual landscapes that inspired A.Y. Jackson, Franklin Carmichael, Arthur Lismer, Lawren Harris, A.J. Casson, J.E.H. MacDonald, Tom Thomson, and Frederick Varley, the Waddingtons began a thirty-six-year journey -- tracking down clues, deciphering bits of information, tracing ancient portage routes, and exploring hidden inlets -- all with the purpose of finding the very spots that gave birth to the work of the Group of Seven. The result was an amazing story of discovery. In this paper-bound edition of their bestselling book, in which original paintings are paired with contemporary photographs of the locations where the original works were created, Jim and Sue Waddington invite their readers to come face to face with the elusive muses that enlightened and enriched this renowned group of artists.

This handbook brings together the knowledge on juvenile imprisonment to develop a global, synthesized view of the impact of imprisonment on children and young people. There are a growing number of scholars around the world who have conducted in-depth, qualitative research inside of youth prisons, and about young people incarcerated in adult prisons, and yet this research has never been synthesized or compiled. This book is organized around several core themes including: conditions of confinement, relationships in confinement, gender/sexuality and identity, perspectives on juvenile facility staff, reentry from youth prisons, young peoples experiences in adult prisons, and new models and perspectives on juvenile imprisonment. This handbook seeks to educate students, scholars, and policymakers about the role of incarceration in young peoples lives, from an empirically-informed, critical, and global perspective. Alexandra Cox is Senior Lecturer in Sociology at the University of Essex, UK. She previously served as Assistant Professor at the State University of New York at New Paltz in their Department of Sociology. Laura S. Abrams is Chair and Professor of Social Welfare at UCLA Luskin School of Public Affairs, USA. Her scholarship focuses on improving the well-being of youth and young adults with histories of incarceration.

This book investigates the drivers, tactics, and strategy that propel the Trump administration's foreign policy. The key objective of this book is to look beyond the 'noise' of the Trump presidency in order to elucidate and make sense of contemporary US foreign policy. It examines the long-standing convictions of the president and the brutal worldview that he applies to US foreign policy; and his hard-line negotiation tactics and employment of unpredictability to keep America's major foreign interlocutors off-guard, such as NATO members, China, Mexico, Canada, North Korea, and Iran – each of which are considered here. In strategy terms, the book explains that the president is responding to a new multipolar structure of power by engaging a Kissingerian strategy that eschews liberal values and seeks to adjust great power relations in Washington's favor. By drawing upon a range of evidence and case studies, this book makes a number of compelling and provocative points to offer a new vector for debate about the workings, successes and failures, and ultimately the long-term implications for the world, of the Trump presidency. This book will be of much interest to students of US foreign policy, security studies, and IR in general.

This book celebrates the artistic legacy of eleven artists who broke with tradition and established a new way of painting Canada. Although they called themselves the Group of Seven, the members eventually numbered ten. This book illustrates key sustainability issues in global textile and fashion value chains, by examining individual types of fibers either at a single step in or along the entire value chain. It approaches sustainability-related issues in the textile

and fashion value chain from an interdisciplinary and holistic viewpoint, with each contribution linking questions on the textile and fashion value chain to various drivers, indicators and concepts of sustainability. Each chapter represents a single step in the textile and fashion value chain, exploring and considering a wide range of interwoven and interdependent technological, environmental, social, political and economic aspects. Various fibers, textile engineering and chemical treatment steps, as well as innovative business concepts and regulatory frameworks across the entire textile and fashion value chain are identified, analyzed, discussed and critically evaluated. The book provides a systematic overview of the potential and challenges of sustainable textile and fashion value chains, making it of interest to practitioners and scientists in sustainability science, environmental economics, and business, management and innovation. Further, it offers a valuable source of information for industrial and mechanical engineering researchers, and for students in the areas of textile engineering, fashion, or the apparel and clothing industry.

This edited book provides a contemporary, critical and thought-provoking analysis of the internal and external threats to Western multilateral development finance in the twenty-first century. It draws on the expertise of scholars with a range of backgrounds providing a critical exploration of the neoliberal multilateral development aid. The contributions focus on how Western institutions have historically dominated development aid, and juxtapose this hegemony with the recent challenges from right-wing populist and the Beijing Consensus ideologies and practices. This book argues that the rise of right-wing populism has brought internal challenges to traditional powers within the multilateral development system. External challenges arise from the influence of China and regional development banks by providing alternatives to established Western dominated aid sources and architecture. From this vantagepoint, *Rethinking Multilateralism in Foreign Aid* puts forward new ideas for addressing the current global social, political and economic challenges concerning multilateral development aid. This book will be of interest to researchers, academics and students in the field of International Development and Global Governance, decision-makers at government level as well as to those working in international aid institutions, regional and bilateral aid agencies, and non-governmental organisations.

Global growth is forecast at 3.0 percent for 2019, its lowest level since 2008–09 and a 0.3 percentage point downgrade from the April 2019 World Economic Outlook.

On a mid-October evening, a group of fathers gathered around a conference table and met each other for the first time. None of the men had ever thought of himself a support group kind of guy and each felt entirely out of place. In fact, nothing about their lives felt normal anymore. *The Group: Seven Widowed Fathers Reimagine Life* chronicles the challenges and triumphs of seven men whose wives died from cancer and were left to raise their young children entirely on their own. Brought together by tragedy, the fathers - Neill, Dan, Bruce, Karl,

Joe, Steve, and Russ - forged an uncommon bond. Over time, group meetings evolved into a forum for reinvention and transformed the men in unexpected ways. Through the fathers' poignant interactions, The Group illustrates that while some wounds never fully heal, each of us has the potential to construct a new and meaningful future. Rosenstein and Yopp, co-leaders of the support group, weave together the fathers' stories with contemporary research on grief and adaptation. The Group traces a compelling journey of healing and personal discovery that no book has ever captured before. The men's touching efforts to care for their families, grieve for their wives, and reimagine their futures will inspire anyone who has suffered a major loss.

This book, the 32nd volume in the Canada Among Nations series, looks to the wide array of foreign policy challenges, choices and priorities that Canada confronts in relations with the US where the line between international and domestic affairs is increasingly blurred. In the context of the Canada-US relationship, this blurring is manifest as a cooperative effort by officials to manage aspects of the relationship in which bilateral institutional cooperation goes on largely unnoticed. Chapters in this volume focus on longstanding issues reflecting some degree of Canada-US coordination, if not integration, such as trade, the environment and energy. Other chapters focus on emerging issues such as drug policies, energy, corruption and immigration within the context of these institutional arrangements.

There is something visceral about ownership. This is mine; you can't have it. This is mine; you can share it. This is ours. Try to find it. Contemporary literature and investigative journalism are showing that the scale of the problem of tax evasion, money laundering, organised crime, terrorism, bribery, corruption and gross human rights abuses is vast. Ownership – specifically, the quest to identify beneficial owners - has been chosen by national and international regulators as the touchstone, the litmus test in the fight back. An owner by definition must possess something for which they are financially accountable. But what is meant by "ownership"? This book explains why ownership is pivotal to accountability, and what ownership means in common law, civil law and Shariah law terms. It looks in detail at State, regional and international transparency strategies and at an equally powerful global private counter-initiative to promote beneficial ownership avoidance through the use of so-called "orphan structures". Where there is no owner, there is no accountability. The distinction between privacy and legitimate confidentiality on the one hand, and concealment on the other is explained with reference to commercial and trade law and practice, principles of corporate governance and applicable business human rights. This book introduces one further counter initiative: the phenomenon of transient ownership made possible through the use of cryptocurrency and the blockchain. The study concludes with a blueprint for action with recommendations addressed to states, international organisations, practitioners and other stakeholders.

This book is devoted to the application of fractional calculus in economics to describe processes with memory and non-locality. Fractional calculus is a branch of mathematics that studies the properties of differential and integral operators that are characterized by real or complex orders. Fractional calculus methods are powerful tools for describing the processes and systems with memory and nonlocality. Recently, fractional integro-differential equations have been used to describe a wide class of economical processes with power law memory and spatial nonlocality. Generalizations of basic economic concepts and notions the economic processes with memory were proposed. New mathematical models with continuous time are proposed to describe economic dynamics with long memory. This book is a collection of articles reflecting the latest mathematical and conceptual developments in mathematical economics with memory and non-locality based on applications of fractional calculus.

Gerald K. Stone has collected books about Canadian Jewry since the early 1980s. This volume is a descriptive catalog of his Judaica collection, comprising nearly 6,000 paper or electronic documentary resources in English, French, Yiddish, and Hebrew. Logically organized, indexed, and selectively annotated, the catalog is broad in scope, covering Jewish Canadian history, biography, religion, literature, the Holocaust, antisemitism, Israel and the Middle East, and more. An introduction by Richard Menkis discusses the significance of the Catalog and collecting for the study of the Jewish experience in Canada. An informative bibliographical resource, this book will be of interest to scholars and students of Canadian and North American Jewish studies.

carnivorous starfish on Australia's Great Barrier Reef; recycled cell phones alert Brazilian forest rangers to the sound of illegal logging. The tools of artificial intelligence are being increasingly deployed in the battle for global sustainability. And yet, warns Peter Dauvergne, we should be cautious in declaring AI the planet's savior. In *AI in the Wild*, Dauvergne avoids the AI industry-powered hype and offers a critical view, exploring both the potential benefits and risks of using artificial intelligence to advance global sustainability.
