This is a personal story of the educational process at one of the world's great technological universities. This is a personal story of the educational process at one of the world's great technological universities. Pepper White entered MIT in 1981 and received his master's degree in mechanical engineering in 1984. His account of his experiences, written in diary form, offers insight into graduate school life in general—including the loneliness and even desperation that can result from the intense pressure to succeed—and the purposes of engineering education in particular. The first professor White met at MIT told him that it did not really matter what he learned there, but that MIT would teach him how to think. This, then, is the story of how one student learned how to think. There have of course been changes at MIT since 1984, but its essence is still the same. White has added a new preface and concluding chapter to this edition to bring the story of his continuing education up to date.

This is the fantastical tale of the origin of "Fall" (Autumn) as the product of a single idea. The story resonates messages of confidence, courage, anti-bullying concepts and the encouragement to go forward with a "good idea". Vivid images and dazzling colours merge these ideas together and deliver an important and lasting culmination – Don't be afraid to be different or to change! Know that the most significant changes can happen with just one good idea".

"Origins of an Idea defends the concept of 'original ideas,' as envisioned by our Founding Fathers, from the surge of attacks lodged against it by The Pirate Party, the Free Culture Movement, anti-SOPA proponents and others who would have us do away with the concept of intellectual properties and the monopolies established by our U.S. Constitution. Mr. Shrum advances an apologetic for the concept of original expression of ideas, and maintains that ownership thereof is an inherent human right that is indispensable to the advancement of human progress" -- P. Although there has traditionally been considerable field-level attention on how consultants market their ideas and practices, there is still a lack of research that discusses the earlier intra-organizational phases in the development process. While the present literature provides important insights that enhance our understanding of consulting, the consultancy industry, and the way that consultants present their ideas

and services on the market for management solutions, we know relatively little about the way knowledge-based innovations develop within consultancy firms and the mechanisms that shape the intra-organizational evolution of these ideas and practices. This book seeks to address this gap by revealing how the development of new ideas and practices takes shape in consultancies. The work addresses questions such as: In which way do consultancies sense the contemporary market needs? How do new ideas and practices become established within a consultancy? How do consultancies seek to maintain their repertoire? And what role do these new ideas and practices play in their assignments? To provide more insight into these different aspects of knowledge-based innovation in consultancies, the book draws on and integrates literature from diverse relevant fields such as product innovation and market orientation, but also uses institutional and practice-based perspectives. The research presented in this book can be seen in the light of emerging research into 'knowledge-based innovation' and 'new concept development' that concentrate on empirically studying how knowledge entrepreneurs seek to develop commercially viable ideas and practices that have the potential to have a significant impact on management and organizational praxis. PMPope brings his unique voice to the printed word. A prolific multimedia poet, his work finds its audience via art and word collaborations, video and audio tentacles reaching all around the word. In this collection, PMPope explores the scope of creativity that originates on the 21st century frontier: social media. His incisive observations about disconnectedness, intimacy, and superficiality bear witness to a world of internet friends and virtual relationships.

Gregory the Great was pope from 590-604 and left behind a substantial literary heritage. Saint Gregory's *Commentary on Job* was written between 578 and 595, begun when Gregory

was at the court of Tiberius II at Constantinople, but finished only after he had already been in Rome for several years. This is Volume 1 of 3 - containing Books 1-10

Jess has been in love with her best friend, Kate, for seven years, but her feelings have never been returned. One night they sleep together, and Jess finds out how much it is possible to be hurt by someone close. Jess and Kate struggle to redefine their friendship. They spend a week at Jess's family holiday house in a small seaside town, Awatangi, intending to make the time to talk things through, but the conversations never happen. Kate makes vague promises, but begins to have second thoughts. Jess wants Kate, and nothing else, and is heartbroken that isn't enough. Jess decides – while everything is changing in her life – that she doesn't want to go on living in the city, that she wants to return to Awatangi. Part of her hopes some physical distance between them may help things with Kate, and part of her – frustrated and upset – simply wants to leave Kate behind. In Awatangi, Jess meets Keri, a local lawyer who has also recently returned home. Like Jess, Keri surfs, and like Jess, she seems to feel some attachment to her family roots in Awatangi. Jess is drawn to Keri, but forces herself not to let anything happen. Despite everything, Kate is still Jess's closest friend, and she has loved Kate all her life. She feels she has to give the situation with Kate as long as she can to work itself out. Awatangi is about coping with feelings for a close friend that are not returned, set in a small holiday township on the West Coast of the South Island of New Zealand. It is an exploration of getting what you've always wanted and it not being enough, of being in love with one person and wanting another, and of finding out that life doesn't always turn out as expected.

E.L. Doctorow suggested that in the years since 1945 the nuclear bomb has come to compose the identity of the American people. Developing this theme, Hugh Gusterson shows how the military-industrial complex has transformed public culture & personal psychology in America, to create a nuclear people. A different way of discovering and developing the best business ideas Jack Welch once said, "Someone, somewhere has a better idea." In this myth-busting book, the authors reveal that great business ideas do not spring from innate creativity, or necessarily from the brilliant minds of people. Rather, great ideas come to those who are in the habit of looking for great ideas all around them, all the time. Too often, people fall into the trap of thinking that the only worthwhile idea is a thoroughly original one. Idea Hunters know better. They understand that

valuable ideas are already out there, waiting to be found - and not just in the usual places. Shows how to expand your capacity to find and develop winning business ideas Explains why ideas are a critical asset for every manager and professional, not just for those who do "creative" Reveals how to seek out and select the ideas that best serve your purposes and goals and define who you are, as a professional Offers practical tips on how to master the everyday habits of an Idea Hunter, which include cultivating great conversations The book is filled with illustrative accounts of successful Idea Hunters and stories from thriving "idea" companies. Warren Buffet, Walt Disney, Thomas Edison, Mary Kay Ash, Twitter, and Pixar Animation Studios are among the many profiled.

Do you want to make money every day? Do you want to make money without having to work every day? Do you want to enjoy the freedom that comes with being wealthy? The question then is, how? And yes, the answer is passive income, what you have certainly heard about. The average person spends his or her life working for money. Some work at a job, others run their own businesses and others do both. They essentially rely on these two sources to earn a living. The kind of income derivable from these sources is called active income. All these persons have to keep working to keep living. It's like driving a car. You have to keep your hands on the steering and your leg on the accelerator for the car to keep moving. You stop exerting yourself, and your cash flow runs dry. Now, nobody wants to be in a position where they can't take a break from work without the fear that their income will take a huge hit. This is what makes the idea of a passive income very attractive. So what exactly is this idea of passive income? Passive income is having your asset do the working while you simply do the earning. It is income received on a regular basis which requires little or no effort on the part of the recipient. With an active income, the asset is the person. You are the goose that lays the egg, whether golden or otherwise. But where passive income is concerned, your initial investment-be it in the form of money or effort-is what keeps the cash flowing. This book seeks to expose you to a variety of ways to generate passive income. From the very familiar ideas of real estate,

stock and other conventional income streams to the many novel internet-based ideas, this book gives the reader a basic understanding of these ideas. It also offers nuggets that will help the reader set out and gain a competitive advantage in the market. This manual is the first book in a series by Passive Income Factory on how to build your financial freedom. Millions, if not billions, of people all over the world, proceed working on their jobs every day to earn a living. They envy the rich and think that there is no chance to change their lives. They think that investing in assets needs a lot of money and therefore they will never become rich. And they don't even know how wrong they are. But you no longer need to be one of them. This book will reveal to you that there are many methods to create your first asset without any investment. I had always suspected the geographical authorities did not know what they were talking about when they located the battlefield of Munda in the county of the Bastuli-Poeni, close to the modern Monda, some two leagues north of Marbella. According to my own surmise, founded on the text of the anonymous author of the *Bellum Hispaniense*, and on certain information culled from the excellent library owned by the Duke of Ossuna, I believed the site of the memorable struggle in which Caesar played double or quits, once and for all, with the champions of the Republic, should be sought in the neighbourhood of Montilla. Happening to be in Andalusia during the autumn of 1830, I made a somewhat lengthy excursion, with the object of clearing up certain doubts which still oppressed me. A paper which I shall shortly publish will, I trust, remove any hesitation that may still exist in the minds of all honest archaeologists. But before that dissertation of mine finally settles the geographical problem on the solution of which the whole of learned Europe hangs, I desire to relate a little tale. It will do no prejudice to the interesting question of the correct locality of Monda. I had hired a guide and a couple of horses at Cordova, and had started on my way with no luggage save a few shirts, and Caesar's Commentaries. As I wandered, one day, across the higher lands of the Cachena plain, worn with fatigue, parched with thirst, scorched by a burning sun, cursing Caesar and Pompey's sons alike, most heartily, my eye lighted, at some distance from the path I was following, on a little stretch of green sward dotted with reeds and rushes. That betokened the neighbourhood of some spring, and, indeed, as I drew nearer I perceived that what had looked like sward was a marsh, into which a stream, which seemed to issue from a narrow gorge between two high spurs of the Sierra di Cabra, ran and disappeared.

Another body in a string of ritualistic murders. A serial killer who's getting cocky. Detective Derek Childress thinks this day just can't get any worse. And then he meets his new partner. Investigator Kayle Perrine is a Variant: one of several races of once-thought mythical creatures who now live among and lord-over humankind. Led by a group of vampires called the Clan Gentry, the Variants protect their own, just as they did when Derek's previous partner was killed by one, nearly a year ago. Now that Perrine's on the case, Derek expects a cover-up. Kayle Perrine has worked his whole life to prove himself, but being paired up

with a boorish mundane like Derek Childress is feeling more like punishment than reward. Derek is so blinded by his prejudice against Variants, that he refuses to see the evidence Kayle finds blatantly obvious. The sooner Kayle can close this case, the sooner he can go back home and forget about the infuriating human detective. A brutal attack forges a fragile truce between the two men, driving them together. Derek and Kayle must learn to trust and depend on each other while tempers flare and passions of every kind run hot between them. Yet as they begin to grow closer, one fact continues to keep them apart: they are from different worlds. With time running out to solve this case, Derek and Kayle understand that love may not be enough to overcome prejudice, politics, and murder.

The definitive history of America's greatest incubator of innovation and the birthplace of some of the 20th century's most influential technologies "Filled with colorful characters and inspiring lessons . . . The Idea Factory explores one of the most critical issues of our time: What causes innovation?" —Walter Isaacson, The New York Times Book Review "Compelling . . . Gertner's book offers fascinating evidence for those seeking to understand how a society should best invest its research resources." —The Wall Street Journal From its beginnings in the 1920s until its demise in the 1980s, Bell Labs-officially, the research and development wing of AT&T-was the biggest, and arguably the best, laboratory for new ideas in the world. From the transistor to the laser, from digital communications to cellular telephony, it's hard to find an aspect of modern life that hasn't been touched by Bell Labs. In The Idea Factory, Jon Gertner traces the origins of some of the twentieth century's most important inventions and delivers a riveting and heretofore untold chapter of American history. At its heart this is a story about the life and work of a small group of brilliant and eccentric men-Mervin Kelly, Bill Shockley, Claude Shannon, John Pierce, and Bill Baker-who spent their careers at Bell Labs. Today, when the drive to invent has become a mantra, Bell Labs offers us a way to enrich our understanding of the challenges and solutions to technological innovation. Here, after all, was where the foundational ideas on the management of innovation were born.
