The Design Dialogue anthology is a remarkable exploration of the decisive role of Jewish patrons, professionals, architects, designers and authors in shaping modern Viennese architecture, design, and material culture. Leading cultural historians, museum curators, art historians, and architects present cutting edge research examining how famous and less known protagonists created new cultural languages, identifications and networks, engaged in social debates, and contributed to the cultural renewal of Vienna, a major capital in Central Europe, between 1800 and 1938.

The author describes the threats and emotional abuse she endured from white student and adults along with her fears of endangering her family as she committed to being one of the first African American students to integrate Central High School in Little Rock, Arkansas in 1957. A REESE WITHERSPOON BOOK CLUB PICK! “Tia Williams’ book is a smart, sexy testament to Black joy, to the well of strength from which women draw, and to tragic romances that mature into second chances. I absolutely loved it.”— Jodi Picoult, #1 NYT bestselling author of *The Book of Two Ways* and *Small Great Things* Seven days to fall in love, fifteen years to forget, and seven days to get it all back again... Eva Mercy is a single mom and bestselling erotica writer who is feeling pressed from all sides. Shane Hall is a reclusive, enigmatic, award-winning novelist, who, to everyone's surprise, shows up in New York. When Shane and Eva meet unexpectedly at a literary event, sparks fly, raising not only their buried traumas, but the eyebrows of the Black literati. What no one knows is that fifteen years earlier, teenage Eva and Shane spent one crazy, torrid week madly in love. While they may be pretending not to know each other, they can't deny their chemistry—or the fact that they've been secretly writing to each other in their books through the years. Over the next seven days, amidst a steamy Brooklyn summer, Eva and Shane reconnect—but Eva's wary of the man who broke her heart, and wants him out of the city so her life can return to normal. Before Shane disappears though, she needs a few questions answered... With its keen observations of creative life in America today, as well as the joys and complications of being a mother and a daughter, *Seven Days in June* is a hilarious, romantic, and sexy-as-hell story of two writers discovering their second chance at love.

Modern warfare is almost always multilateral to one degree or another, requiring countries to cooperate as allies or coalition partners. Yet as the war in Afghanistan has made abundantly clear, multilateral cooperation is neither straightforward nor guaranteed. Countries differ significantly in what they are willing to do and how and where they are willing to do it. Some refuse to participate in dangerous or offensive missions. Others change tactical objectives with each new commander. Some countries defer to their commanders while others hold them to strict account. *NATO in Afghanistan* explores how government structures and party politics in NATO countries shape how battles are waged in the field. Drawing on more than 250 interviews with senior officials from around the world, David Auerswald and Stephen Saideman find that domestic constraints in presidential and single-party parliamentary systems--in countries such as the United States and Britain respectively--differ from those in countries with coalition governments, such as Germany and the Netherlands. As a result, different countries craft different guidelines for their forces overseas, most notably in the form of military caveats, the often-controversial limits placed on deployed troops. Providing critical insights into the realities of alliance and coalition warfare, *NATO in Afghanistan* also looks at non-NATO partners such as Australia, and assesses NATO's performance in the 2011 Libyan campaign to show how these domestic political dynamics are by no means unique to Afghanistan.

Riding, training and caring for horses are visceral experiences that require the immersion of both body and mind. This book provides an in-depth understanding of human–horse relationships and interactions as embodied in equestrian sport and leisure. As a closely focused ethnographic study of the horse world, it explores the key themes of partnership and collaboration in human–horse communication, the formation of individual and collective identities performed through involvement in the horse world, and human–horse interaction as an embodied way of being. This book argues that encounters between humans and horses can reveal the ways that human society has been and continues to be structured through intersection with nonhuman others. Equestrian sport and leisure provides an apt context for considering how such concepts of interspecies communication and collaboration are negotiated, managed, (mis)understood and performed, resulting in a uniquely embodied way of knowing and being in the world. Human–Animal Relationships in Equestrian Sport and Leisure is fascinating reading for anyone interested in equestrianism, human-animal studies, theories of embodiment, the sociology of sport, or sport and social theory.

It contains a brand new terrorism chapter, along with coverage on background investigations, protection of sensitive information, internal threats, and considerations at select facilities (nuclear, DoD, government and federal). Author Philip Purpura once again demonstrates why students and professionals alike rely on this best-selling text as a timely, reliable resource. Cognition, Communication, and Romantic Relationships focuses on the role of memory, communication, and social cognition in the development of romantic relationships. The authors review developmental models of communication and examine criticisms of these models. They also explore the stages through which relationships escalate and deteriorate, and consider the processes for such activities as meeting new people, dating, sexual intercourse, and terminating relationships. Differences between men and women are discussed throughout the text, in light of current research supporting systematic gender differences in how people think about romance and relationships. As an extended analysis and research review of how thinking about romance influences and is influenced by communicative processes, this text offers a deeper understanding of the cognitive and communicative factors involved in relationship processes. It is designed for use in courses on interpersonal relationships and intimate relations in social psychology, communication, counseling psychology, clinical psychology, and sociology.

Practicing Communication Ethics provides a theoretical framework for developing a personal standard of ethics that can be applied in real world communication situations. Through an examination of specific ethical values including truth, justice, freedom, care, and integrity, this first edition enables the reader to personally determine which values they are ethically committed to upholding. Blending communication theory, ethics as practical philosophy, and moral psychology, this text presents the practice of communication ethics as part of the lifelong process of personal development and fosters the ability in its readers to approach communication decision-making through an ethical lens.

In the present decade, "co-dependency" has sprung up on the landscape of American popular culture. Portrayed as an addiction-like disease responsible for a wide range of personal and social problems, co-dependency spawned a veritable social movement nationwide. *A Disease of One's Own* examines the phenomenon of co-dependency from a sociological perspective, viewing it not as something a person "has," but as something a person believes; not as a psychological disease, but as a belief system that offers its adherents a particular way of talking about the self and social relationships. The central question addressed by the book is: Why did co-dependency--one among a plethora of already-existing discourses on self-help--meet with such widespread public appeal? Grounded in theories of cultural and social change, John Steadman Rice argues that this question can only be adequately addressed by examining the social, cultural, and historical context in which co-dependency was created and found a receptive public; the content of the ideas it espoused; and the practical uses to which co-dependency's adherents could apply those ideas in their everyday lives. In terms of the larger American context, his analysis links the emergence of co-dependency with the permeation of psychological concepts and explanations throughout Western culture over the past thirty years, focusing particularly on the cultural and social impact of the popular acceptance of what the author calls "liberation psychotherapy." Liberation psychotherapy portrays the relationship between self and society as one of intrinsic antagonism, and argues that psychological health is inversely related to the self's accommodation to social expectations. Rice argues that a principal source of co-dependency's appeal is that it affirms core premises of liberation psychotherapy, thereby espousing an increasingly conventional and familiar wisdom. It simultaneously fuses those premises with addiction-related discourse, providing people with a means of making sense of the problems of relationship and identity that have accompanied what Rice terms the "psychologization" of American life. This brilliant analysis of the phenomenon of co-dependency will be of interest to psychologists, sociologists, psychotherapists, and those interested in American popular culture.

Another classic from the author of the internationally bestselling *The Outsiders* Continue celebrating 50 years of *The Outsiders* by reading this companion novel. *That Was Then, This is Now* is S. E. Hinton's moving portrait of the bond between best friends Bryon and Mark and the tensions that develop between them as they begin to grow up and grow

The post-2000 period in Zimbabwe saw the launch of a fast track land reform programme, resulting in a flurry of accounts from white Zimbabweans about how they saw the land, the land invasions, and their own sense of belonging and identity. In *White Narratives*, Irikidzayi Manase engages with this fervent output of texts seeking definition of experiences, conflicts and ambiguities arising from the land invasions. He takes us through his study of texts selected from the memoirs, fictional and non-fictional accounts of white farmers and other displaced white narrators on the post-2000 Zimbabwe land invasions, scrutinising divisions between white and black in terms of both current and historical ideology, society and spatial relationships. He examines how the revisionist politics of the Zimbabwean government influenced the politics of identities and race categories during the period 2000-2008, and posits some solutions to the contestations for land and belonging.

*Social Theory and Modernity* combines the analytical techniques of political theory and comparative politics as a method for conducting innovative inquiry and research in political science. The focus of political theory, for example, results in new issues for historical and cross-national comparative analysis - whereas comparative analysis provides new parameters for analyzing the ideology of social institutions. Luke elaborates upon Rousseau's discursive style and critical methods, Marx's historical materialism, Marcuse's instrumental rationality, Weber's interpretive method, Gramsci's theoretical tactics, Cabral's theory of critique and revolution and Foucault's system of political and social analysis. The book concludes by offering

Alistair May explores the part played by sexual ethics and the rhetoric of sexual morality in the formation of Christian identity by focusing on the longest discussion of sex in the New Testament - 1Corinthians 5-7. Viewing this passage as a unified discourse, he considers how Paul's ethics serve to give his converts a distinct identity. Although tools from the social sciences are used, the major focus of the work is in careful exegesis of the text. As the study progresses through the text of 1Corinthians 5-7, May argues that Paul strives to maintain an absolute distinction between insider and outsider in regard to morality. Immorality belongs exclusively to the outside and to the pre-conversion identity of the Corinthians. Hence those labelled immoral can no longer remain in the community. 1 Corinthians 6.12-20 reveals that, for Paul, sexual sin is unique in its destruction of Christian identity and that any sexual participation is a potential conflict with participation in Christ. Thus, chapter 6 is directly connected with the discussion of the legitimacy of marriage in 1Corinthians 7. Rejecting the scholarly consensus that Paul is reacting to ascetics, May controversially argues that chapter 7 should be read as Paul's commendation of singleness to a reluctant Corinthian audience. This is volume 278 in the *Journal for the Study of the New Testament Supplement* series.

We are now in the era of the G8, although the G7 still exists as a grouping for Finance Ministers. Why do G7 finance ministries and central banks co-operate? What are the implications of this co-operation for US power and the abilities of the other six states to exercise leadership? What role do the G7 play in global financial governance? How much authority do they possess and how is that authority exercised? This is the first major monograph on the political economy of G7 finance ministry and central bank co-operation. It argues that to understand the contribution of the G7 to global financial governance it is necessary to locate the process in the context of a wider world financial order comprised of decentralized globalization. It also provides original case study material on the G7's contribution to macroeconomic governance and to debates on the global financial architecture over the last decade. It assesses the G7's role in producing a system of global financial governance based on market supremacy and technocratic transgovernmental consensus and articulates normative criticisms of the G7's exclusivity. For researchers in the fields of IR/IPE generally, postgraduate students in the field of international organization and global

governance, policy makers and financial journalists this is the most extensive analysis of the G7 and the political economy of global financial governance to date.

Why do we volunteer time? Why do we contribute money? Why, even, do we vote, if the effect of a single vote is negligible? Rationality-based microeconomic models are hard-pressed to explain such social behavior, but Howard Margolis proposes a solution. He suggests that within each person there are two selves, one selfish and the other group-oriented, and that the individual follows a Darwinian rule for allocating resources between those two selves. "Howard Margolis's intriguing ideas . . .

provide an alternative to the crude models of rational choice that have dominated economics and political science for too long."—Times Literary Supplement

This interdisciplinary collection examines the role that alcohol, tobacco and other drugs have played in framing certain groups and spaces as 'dangerous' and in influencing the nature of formal responses to the perceived threat. Taking a historical and cross-national perspective, it explores how such groups and spaces are defined and bounded as well as the processes by which they come to be seen as 'risky'. It discusses how issues of perceived danger highlight questions of control and the management of behaviours, people and environments, and it pays attention to the way in which sanctions and regulations have been implemented in a variety of often inconsistent ways that frequently impact differently on different sections of the population. Bringing together a range of case studies drawn from different countries and across different periods of time, the chapters collected here illustrate issues of marginalisation, stigmatisation, human rights and social expectations. It is of interest to a diverse audience of historians, philosophers, human geographers, anthropologists, sociologists and criminologists interested in substance use and misuse, deviance, risk and power among other topics.

'Each chapter flows well and holds the reader's interest. The book is suitable for learners and experienced practitioners' Keith Hurst, Leeds University

From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller;

he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

An inspiring account of teachers in ordinary circumstances doing extraordinary things, showing us how to transform education What School Could Be offers an inspiring vision of what our teachers and students can accomplish if trusted with the challenge of developing the skills and ways of thinking needed to thrive in a world of dizzying technological change. Innovation expert Ted Dintersmith took an unprecedented trip across America, visiting all fifty states in a single school year. He originally set out to raise awareness about the urgent need to reimagine education to prepare students for a world marked by innovation--but America's teachers one-upped him. All across the country, he met teachers in ordinary settings doing extraordinary things, creating innovative classrooms where children learn deeply and joyously as they gain purpose, agency, essential skillsets and mindsets, and real knowledge. Together, these new ways of teaching and learning offer a vision of what school could be—and a model for transforming schools throughout the United States and beyond. Better yet, teachers and parents don't have to wait for the revolution to come from above. They can readily implement small changes that can make a big difference. America's clock is ticking. Our archaic model of education trains our kids for a world that no longer exists, and accelerating advances in technology are eliminating millions of jobs. But the trailblazing of many American educators gives us reasons for hope. Capturing bold ideas from teachers and classrooms across America, What School Could Be provides a realistic and profoundly optimistic roadmap for creating cultures of innovation and real learning in all our schools.

An engaging account of the ways in which over hundreds of years Indigenous and Asian people across northern and central Australia have traded, intermarried and built hybrid communities. It is also a disturbing expose of the persistent--sometimes paranoid--efforts of successive national governments to police, marginalize and outlaw these encounters.

The Gospel for the Outsider not only serves as a useful guide for church leaders and preachers as they look again at Luke's writings from the point of view of reaching Outsiders, but it will also be a useful study guide or resource for Bible Study Groups who want to take a fresh look at familiar material.

Painting has played a significant role in modern Vietnam. Postage stamps, billboards, and annual national exhibitions attest to its fundamental place in a country where painters may be hailed as national heroes and include among their number fervent nationalists, propagandists, even dissidents. As Vietnamese painting has gained prominence in the contemporary transnational art circuits of Southeast Asia, many artists have become millionaires, yet Vietnamese painting is generally overlooked in art history surveys of the region. Nora Taylor sets out here to change that. Painters in Hanoi engages with twentieth-century Vietnam through its artists and their works, providing a new angle on a country most often portrayed through the lens of war and politics. Drawing on interviews with artists, cultural officers, curators, art critics, and others in Hanoi, Taylor surveys the impact artists have had on intellectual life in Vietnam. The book shows them within their own complex community, one fraught with tensions, politicking, and favoritism, yet also a sense of belonging. It describes their education, the role of the government in the arts, the rise and fall of individual artists, their influence as active players in the politics of place and gender, the audience for their work, and how tourism and the international art market have influenced it.
