The date is October 15, 1954. Thirteen-year-old Elizabeth, who lives in the Toronto suburb of Weston, is a typical grade 8 girl. She has a secret crush on a boy in her class and she thinks Elvis Presley is "dreamy." Elizabeth also has a part-time job babysitting an adorable little grade 2 girl named Suzie, and Suzie's not-so-adorable grade 6 brother, David. On this particular evening, however, Elizabeth has more than a badly behaved boy to contend with. It is on this October night that Hurricane Hazel roars down on Toronto, bringing torrential rains that cause extensive flooding. David and Suzie's house is on Raymore Drive, a street that will be practically wiped out by the floodwaters. David and Suzie's parents are unable to reach the house, which means the children's safety on this most deadly of nights is Elizabeth's responsibility. She finds herself increasingly isolated. They are surrounded by rising water. The electricity goes out. The phone goes dead. Still, Elizabeth is sure they will be safe as long as they remain in the house. But are Elizabeth and the children really as "safe as houses"? Before this terrifying night is over, Elizabeth and David will have to learn to communicate and cooperate if they are to save their own lives and Suzie's. Their survival in the midst of one of Canada's worst disasters will depend upon their resourcefulness, maturity and courage.

In our increasingly digital, mobile, and global world, the existing theories of business and economics have lost much of their appeal with the phenomenal rise of Chindia, the reality of Brexit, the turmoil caused by the Covid-19 pandemic, and the seismic shifting of the global center of gravity from west to east. In the area of innovation, the traditional thinking that a developed country, often the US, will come up with the next major innovation, launch at home first, and then take it to other markets does not ring true anymore. Similarly, the world where conglomerates go bargain-hunting for acquisitions in emerging markets has been turned upside-down. This book reveals and illustrates the Global Rule of Three phenomenon, which stipulates that in competitive markets only three companies (which the authors call "generalists") can dominate the market. All other players in the market are specialists. Further, whereas the financial performance of generalists improves as market share increases, specialist companies see a decrease in financial performance as their market share increases, as the latter are margin-driven companies. This theory powerfully captures the evolution of global markets and what executives must do to succeed. It is based on empirical analyses of hundreds of markets and industries in the US and globally. Competitive markets evolve in a predictable fashion across industries and geographies, where every industry goes through a similar lifecycle from beginning to end (or revitalization). From local to regional to national markets, the last stop in the evolution of markets is going global. The pattern is so consistent that it represents a distinct and natural market structure at every level. The authors offer strategies that generalists and specialist should follow to stay competitive as well as twelve expansion strategies for global companies from emerging markets. This book chronicles this global evolution and provides impactful managerial implications for executives and students of marketing and corporate strategy alike.

Ever since Arthur M. Schlesinger Jr. used "imperial presidency" as a book title, the term has become central to the debate about the balance of power in the U.S. government. Since the presidency of George W. Bush, when advocates of executive power such as Dick Cheney gained ascendancy, the argument has blazed hotter than ever. Many argue the Constitution itself is

in grave danger. What is to be done? The answer, according to legal scholars Eric Posner and Adrian Vermeule, is nothing. In *The Executive Unbound*, they provide a bracing challenge to conventional wisdom, arguing that a strong presidency is inevitable in the modern world. Most scholars, they note, object to today's level of executive power because it varies so dramatically from the vision of the framers. But there is nothing in our system of checks and balances that intrinsically generates order or promotes positive arrangements. In fact, the greater complexity of the modern world produces a concentration of power, particularly in the White House. The authors chart the rise of executive authority straight through to the Obama presidency. Political, cultural and social restraints, they argue, have been more effective in preventing dictatorship than any law. The executive-centered state tends to generate political checks that substitute for the legal checks of the Madisonian constitution.

AMERICAN FREEDOM AND JUSTICE VS. THE TYRANNIES OF THE SEVENTEENTH CENTURY The new government in central Europe, called the Confederated Principalities of Europe, was formed by an alliance between Gustavus Adolphus, King of Sweden, and the West Virginians led by Mike Stearns who were transplanted into 17th-century Germany by a mysterious cosmic accident. The new regime is shaky. Outside its borders, the Thirty Years War continues to rage. Within, it is beset by financial crisis as well as the political and social tensions between the democratic ideals of the 20th-century Americans and the aristocracy which continues to rule the roost in the CPE as everywhere in Europe. Worst of all, the CPE has aroused the implacable hostility of Cardinal Richelieu, the effective ruler of France. Richelieu has created the League of Ostend in order to strike at the weakest link in the CPE's armor—its dependence on the Baltic as the lifeline between Gustav Adolf's Sweden and the rest of his realm. The greatest naval war in European history is about to erupt. Like it or not, Gustavus Adolphus will have to rely on Mike Stearns and the technical wizardry of his obstreperous Americans to save the King of Sweden from ruin. Caught in the conflagration are two American diplomatic missions abroad: Rebecca Stearns' mission to France and Holland, and the embassy which Mike Stearns sent to King Charles of England headed by his sister Rita and Melissa Mailey. Rebecca finds herself trapped in war-torn Amsterdam; Rita and Melissa, imprisoned in the Tower of London. And much as Mike wants to transport 20th-century values into war-torn 17th-century Europe by *Sweet Reason*, still he finds comfort in the fact that Julie, who once trained to be an Olympic marksman, still has her rifle . . . In a world with no power, chaos soon descends. A powerful look at the disintegration of society in the wake of a massive and mysterious outage that has knocked out all modern amenities. Fifteen-year-old Emma has moved house with her ex-Marine mother and younger brother. It's a brand-new condo building, which explains the semi-regular power outages, as workers complete the units around them. So Emma isn't particularly concerned when the latest blackout hits just as they are preparing to leave town on a long weekend camping trip. But then the car won't start, and their cellphones appear dead -- and all the cars outside their building seem to be stalled in a long traffic jam ... In the midst of what appears to be a massive power outage, with their camping gear packed and ready, Emma and her family canoe over to the islands, just offshore, to wait it out. But while they land on an isolated island, with a relatively hidden site, they are far from safe, as people become increasingly desperate to find food and shelter. And as the days pass, and the power remains out, the threat of violence becomes all too real.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

"This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don't need to be fixed. In *We're Not Broken*, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.
