

The Seven Seas Calendar 2015 The Sailors Calendar Thirty First Edition

Will Israel and the U.S. be destroyed in or on March 6-7-8, 20-21, 2014-2017 or September 7-8, 19, 23, 27, October 15, 31, November 1-2, 11, December 6-7, 24-25, Hanukah, March 1, 20-21, 24-25, new or full moon in March-April (April 23-24 of 2014) or Passover, May 10, 19-20, 29, June 5-11, 9-12, 20, 24-25, 27-29, and August 1, 10, 28-29 in the years 2013-2019 or 2024-2026, 2060-2061-3005 and beyond and Muslims, Catholics and Communism and devils in UFO's take over most of the world? Will a great tidal wave hit the U.S. East Coast in 2013-2019 and Yellowstone Park super volcano erupt or a comet or asteroid hits the earth or Ocean in 2024-2026 and utterly destroy the entire United States if it still around after the war of 2013-2019? Will the Muslims, communism and Catholics persecute Christians, Americans and Jews all over the world bringing them before Kings and have them sent to prisons and torture and killed if they don't deny Christ and convert to Islam or Catholicism? Will Muslims and people all over the world begin to mock and scoff at Christians and the Bible because Israel and the U.S. are destroyed and no Rapture or end or Second Coming of Christ happened? Several of the Bible prophecies predict God will not make a full end of the U.S., Israel and the world at this time and pockets of people and nations may or may not survive. God may save the U.S., Israel and the world if the people repent and turn from their sins and begin to humble themselves and heed the harbingers. But if they don't then these events may start to happen. This book was written by December 24, 2013.

In the early 1990s, hopes for the eastward spread of liberal democracy were high. And yet the transformation of Eastern European countries gave rise to a bitter repudiation of liberalism itself, not only there but also back in the heartland of the West. In this brilliant work of political history, Ivan Krastev and Stephen Holmes argue that the supposed end of Communism turned out to be only the beginning of the age of the autocrat. Reckoning with the history of the last thirty years, they show that the most powerful force behind the wave of populist xenophobia that began in Eastern Europe stems from resentment at the post-1989 imperative to become Westernized. Through this prism, the Trump revolution represents an ironic fulfillment of the promise that the nations exiting from communist rule would come to resemble the United States. In a strange twist, Trump has elevated Putin's Russia and Orbán's Hungary into models for the United States.

Kenneth Atkinson tells the exciting story of the nine decades of the Hasmonean rule of Judea (152 - 63 BCE) by going beyond the accounts of the Hasmoneans in Josephus in order to bring together new evidence to reconstruct how the Hasmonean family transformed their kingdom into a state that lasted until the arrival of the Romans. Atkinson reconstructs the relationships between the Hasmonean state and the rulers of the Seleucid and the Ptolemaic Empires, the Itureans, the Nabateans, the Parthians, the Armenians, the Cappadocians, and the Roman Republic. He draws on a variety of previously unused sources, including papyrological documentation, inscriptions, archaeological evidence, numismatics, Dead Sea Scrolls, pseudepigrapha, and textual sources from the Hellenistic to the Byzantine periods. Atkinson also explores how Josephus's political and social situation in Flavian Rome affected his accounts of the Hasmoneans and why any study of the Hasmonean state must go beyond Josephus to gain a full appreciation of this unique historical period that shaped Second Temple Judaism, and created the conditions for the rise of the Herodian dynasty and the emergence of Christianity.

Unveiling the Hidden—Anticipating the Future investigates the Jewish components of Jewish divination, showing practitioners and their practices within their cultural and intellectual contexts, along with their fears, wishes, and anxieties, drawing from original sources in Hebrew, Aramaic, and Judaeo-Arabic.

Understanding Early Modern Primary Sources is an introduction to the rich treasury of source material available to students of early modern history. During this period, political development, economic and social change, rising literacy levels, and the success of the printing press, ensured that the State, the Church and the people generated texts and objects on an unprecedented scale. This book introduces students to the sources that survived to become indispensable primary material studied by historians. After a wide-ranging introductory essay, part I of the book, 'Sources', takes the reader through seven key categories of primary material, including governmental, ecclesiastical and legal records, diaries and literary works, print, and visual and material sources. Each chapter addresses how different types of material were produced, whilst also pointing readers towards the most important and accessible physical and digital source collections. Part II, 'Histories', takes a thematic approach. Each chapter in this section explores the sources that are used to address major early modern themes, including political and popular cultures, the economy, science, religion, gender, warfare, and global exploration. This collection of essays by leading historians in their respective fields showcases how practitioners research the early modern period, and is an invaluable resource for any student embarking on their studies of the early modern period.

Blue Eyes On The Yellow Sea Welcome To Red China This book is fun yet serious — a true, courageous, entertaining adventure in which the author comes to China, initially on a mission to teach. Wide-ranging in scope, it addresses culture, history, people, politics, art, interesting facts, traditions, economics, philosophies, visa issues, in addition to experiences with work, travel and, of course, romance. A Featurettes section includes a China time line relative to world events, Mandarin language guide, conversion chart, among other things. Pictures help to tell the tale. Tad Miller offers the world a fresh, honest access to this ancient though modernizing place in a humorous style—a really great start for getting to know China—and human nature.

Blending reportage and analysis, Allchin investigates the Bangladeshi body politic to discern how Islamist radicals hope to reshape their country.

Calendars map time, shaping and delineating our experience of it. While the challenges to tracking Jewish conceptions of time during the Holocaust were substantial, Alan Rosen reveals that many took great risks to mark time within that vast upheaval. Rosen inventories and organizes Jewish calendars according to the wartime settings in which they were produced—from Jewish communities to ghettos and concentration camps. The calendars he considers reorient views of Jewish circumstances during the war and show how Jews were committed to fashioning traditional guides to daily life, even in the most extreme conditions. In a separate chapter, moreover, he elucidates how Holocaust-era diaries sometimes served as surrogate Jewish calendars. All in all, Rosen presents a revised idea of time, continuity, the sacred and the mundane, the ordinary and the extraordinary even when death and destruction were the order of the day. Rosen's focus on the Jewish calendar—the ultimate symbol of continuity, as weekday follows weekday and Sabbath follows Sabbath—sheds new light on how Jews maintained connections to their way of conceiving time even within the cauldron of the Holocaust.

"A 22-volume, highly illustrated, A-Z general encyclopedia for all ages, featuring sections on how to use World Book, other research aids, pronunciation key, a student guide to better writing, speaking, and research skills, and comprehensive index"--

"Titanic in potential appeal . . . the Mátés do something rare; they go native."—Washington Post

In this lively history and celebration of the Pacific razor clam, David Berger shares with us his love affair with the glossy, gold-colored *Siliqua patula* and gets into the nitty-gritty of how to dig, clean, and cook them using his favorite recipes. In the course of his investigation, Berger brings to light the long history of razor clamming as a subsistence, commercial, and recreational activity, and shows the ways it has helped shape both the identity and the psyche of the Pacific Northwest. Towing his wife along to the Long Beach razor clam festival, Berger quizzes local

experts on the pressing question: tube or gun? He illuminates the science behind the perplexing rules and restrictions that seek to keep the razor clam population healthy and the biomechanics that make these delicious bivalves so challenging to catch. And he joyfully takes part in the sometimes freezing cold pursuit that nonetheless attracts tens of thousands of participants each year for an iconic "beach-to-table" experience. The vast area of the North Pacific, spanning ~55° longitude, represents a challenge for documenting and understanding the geologic history of ocean, atmosphere, and terrestrial environmental change. Nevertheless, its importance for many issues, including our fundamental understanding of ocean and atmospheric circulation patterns and teleconnections with natural modes of climate variability through time, has led to a steady rise in the numbers of study sites and proxy types. By bringing together a wide range of proxies and timescales that examine the impacts of paleoclimate on ecosystems, water, carbon, and humans, and interactions between marine and terrestrial processes, this Research Topic contributes to an improved understanding of the region's significance at global, hemispheric, and regional scales.

February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index

"Rich and illuminating." Literary Review A landscape of high mountains and narrow valleys stretching from the Black to the Caspian Seas, the Caucasus region has been home to human populations for nearly 2 million years. In this richly illustrated 2-volume series, historian and explorer Christoph Baumer tells the story of the region's history through to the present day. It is a story of encounters between many different peoples, from Scythians, Turkic and Mongol peoples of the East to Greeks and Romans from the West, from Indo-European tribes from the West as well as the East, and to Arabs and Iranians from the South. It is a story of rival claims by Empires and nations and of how the region has become home to more than 50 languages that can be heard within its borders to this very day. This first volume charts the period from the emergence of the earliest human populations in the region – the first known human populations outside Africa - to the Seljuk conquests of 1050CE. Along the way the book charts the development of Neolithic, Iron and Bronze Age cultures, the first recognizable Caucasian state and the arrival of a succession of the great transnational Empires, from the Greeks, the Romans and the Armenian to competing Christian and Muslim conquerors. The History of the Caucasus: Volume 1 also includes more than 200 full colour images and maps bringing the changing cultures of these lands vividly to life.

"The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited "U.S.C. 2012 ed." As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office"--Preface.

The Routledge Companion to Marine and Maritime Worlds, 1400?1800 explores early modern maritime history, culture, and the current state of the research and approaches taken by experts in the field. Ranging from cartography to poetry and decorative design to naval warfare, the book shows how once-traditional and often Euro-chauvinistic depictions of oceanic 'mastery' during the early modern period have been replaced by newer global ideas. This comprehensive volume challenges underlying assumptions by balancing its assessment of the consequences and accomplishments of European navigators in the era of Columbus, da Gama, and Magellan, with an awareness of the sophistication and maritime expertise in Asia, the Arab world, and the Americas. By imparting riveting new stories and global perceptions of maritime history and culture, the contributors provide readers with fresh insights concerning early modern entanglements between humans and the vast, unpredictable ocean. With maritime studies growing and the ocean's health in decline, this volume is essential reading for academics and students interested in the historicization of the ocean and the ways early modern cultures both conceptualized and utilized seas.

A young man flees from Iran in 1984 while his cousin helps him from her congressional office in Washington, D.C.

Calendar/Planner 2019 (Format 6" x 9") Softcover: Easily and slender for on the way. In 15 different executions available: 1) Pink 2) Black 3) Sea 4) Flowers 5) School Board 6) Green 7) Yellow 8) Blue 9) Multicolour 10) Violet 11) Red 12) Roses 13) Jeans 14) Horses 1 15) Horses 2 Contents: Annual overview 1 double page Planner: One week per double page Federal holidays (USA) Birthday calendar 1 double page 10 note sides A total of 127 sides

Brown Trout: Biology, Ecology and Management A comprehensive guide to the most current research, history, genetics and ecology of the brown trout including challenging environmental problems The brown trout is an iconic species across its natural European distribution and has been introduced throughout the World. Brown Trout offers a comprehensive review of the scientific information and current research on this major fish species. While the brown trout is the most sought species by anglers, its introduction to various waters around the world is causing serious environmental problems. At the same time, introduction of exogenous brown trout lineages threatens conservation of native gene pools of populations in many regions. The authors summarize the important aspects of the brown trout's life history and ecology and focus on the impact caused by the species. The text explores potential management strategies in order to maintain numerous damaged populations within its natural distributional range and to ameliorate its impacts in exotic environments. The authors include information on a wide-range of topics such as recent updates in population genetics, evolutionary history, reproductive traits and early ontogeny, life history plasticity in anadromous brown trout and life history of the adfluvial brown trout and much more. This vital resource: Contains the latest research on the biology and ecology of brown trout Includes information on phylogeography, genetics, population dynamics and stock management Spotlights the brown trout's introduction to regions around the world and the serious environmental impacts Offers a comprehensive review of conservation and management techniques Written for salmonid scientists and

researchers, fishery and environmental managers, and students of population genetics, ecology and population dynamics, Brown Trout explores the most recent findings on the history, ecology and sustainability of this much-researched species.

In 2015, Congress tasked the Department of Defense to commission an independent assessment of U.S. military strategy and force posture in the Asia-Pacific, as well as that of U.S. allies and partners, over the next decade. This CSIS study fulfills that congressional requirement.

"e;Southeast Asian Affairs, first published in 1974, continues today to be required reading for not only scholars but the general public interested in in-depth analysis of critical cultural, economic and political issues in Southeast Asia. In this annual review of the region, renowned academics provide comprehensive and stimulating commentary that furthers understanding of not only the region's dynamism but also of its tensions and conflicts. It is a must read."e; -Suchit Bunbongkarn, Emeritus Professor, Chulalongkorn University."e;Now in its forty-third edition, Southeast Asian Affairs offers an indispensable guide to this fascinating region. Lively, analytical, authoritative, and accessible, there is nothing comparable in quality or range to this series. It is a must read for academics, government officials, the business community, the media, and anybody with an interest in contemporary Southeast Asia. Drawing on its unparalleled network of researchers and commentators, ISEAS is to be congratulated for producing this major contribution to our understanding of this diverse and fast-changing region, to a consistently high standard and in a timely manner."e; - Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Australian National University

This book investigates the complex relations between the Republic of Poland and the Slovak Republic in the context of ongoing processes in the European Union's political and economic system. The basic assumption of the study is that Polish-Slovak relations are affected and shaped not only by the interaction between the two of them but also by the dynamics of the European and global international environment. The authors explore different aspects of the interconnectedness of Warsaw and Bratislava. This includes the analysis of political, economic, and social dimensions of bilateral relations in the multilateral context. One of the goals of this volume is to define areas and spheres of Poland's and Slovakia's common interest, as well as to point out those areas with the highest potential for development. It also defines and analyzes problematic issues in common relations that could be seen as obstacles in developing cooperation in specific areas and politically strategic areas like foreign and security policy. Moreover, the book seeks to measure the extent to which Polish-Slovak relations are affected by the European integration process.

The Syrian Crisis, the bloodiest front of the Arab uprisings and one of the main determinants of policies of regional and global powers, has been dominating international politics for the last five years. Having caused the death of more than 300 thousand civilians and forced relocation of more than 7 million Syrians, it is one of the direst international problems that the global powers must deal with. It began as a local issue, but after a very short period of time it morphed into a proxy war between regional and global powers. "Redlines" drawn by regional and global actors were crossed, yet there has been no tangible reaction to these violations. Among others, chemical weapons were used, crimes against humanity were committed, fundamental human rights were repeatedly violated. Over time, the crisis has revealed limitations and maladies of the actors involved.

A stable and reliable energy supply is of critical importance and enhances resilience against political and economic pressures. As was noted during the NATO Warsaw Summit in 2016, energy developments could have significant political and security implications for the alliance and its allies, as demonstrated by the crises to NATO's east and south. This book presents papers from the NATO Advanced Research Workshop "Addressing Emerging Security Risks for Energy Flows over South Caucasus", which took place in Tbilisi, Georgia, in December 2016. The workshop brought together academics specializing in energy security, practitioners dealing with energy infrastructure, safety and critical energy projects, NATO and EU experts, and representatives from industry, civil society and governmental agencies. The workshop consisted of six major panels, which addressed numerous issues and emphasised the importance of the energy transit function of Georgia and the South Caucasus. It reviewed existing and future energy transit projects and potential flows of oil and power, and debated areas of common interest and forms of cooperation between consumers, producers and transit states. New security challenges raised by the increased threat of terrorist activities and potential military actions were also analyzed. Potential forms of cooperation to provide adequate strategic and tactical safeguards against emerging threats were identified by the participants, and the book will be of interest to all those concerned with the security of our energy supplies.

BE AMAZED. BE INFORMED. BE PROUD. Get to know about our country's firsts and foremosts in human endeavour, education, defence, government, adventure, cinema, literature and the arts, along with freshly introduced chapters on science and technology, business and economy, the natural world and structures. With a brand-new look and readerfriendly infographics, charts and tables, this book now includes more than 300 images and all the fascinating absolutes you always wanted ? such as records for the longest, tallest, fastest and heaviest ? that have stood steadfast over the years. Plus it features hundreds of exciting new records that mark our nation's and its people's move towards always bettering the best! ONLY IN THE LIMCA BOOK OF RECORDS 2018. READ?AND LEAD!

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product. 12,500 entries. 196 countries. 365 days. Find out what's going on any day of the year, anywhere across the globe! If you're looking to tie a promotional event to a special month, travel to a music festival halfway around the world, blog about a historical milestone or do a celebrity birthday round-up on your radio show or Twitter feed, Chase's Calendar of Events is the one resource that has it all. For broadcasters, journalists, event planners, public relations professionals, librarians, editors, writers or simply the curious, this is one reference you can't do without! Chase's Calendar of Events 2015 brings you: Major sporting events such as the FIFA Women's World Cup (June 6), the Pan American Games (July 10) and the 48th Transpacific Yacht Race (July 13). Milestones such as the 800th anniversary of the Magna Carta, 200th anniversary of Waterloo, 150th anniversary of Lincoln's assassination, 75th anniversary of Dunkirk and the Battle of Britain, 150th birth anniversary of poet W.B. Yeats and much more. New birthday entries for news makers like the new king of Spain, Felipe VI of Bourbon and Greece (Jan 30), or political activist Nadezhda Tolokonnikova (Nov 7); sports stars such as Meryl Davis (Jan 1) and Johnny Manziel (Dec 6); and

entertainers Lupita Nyong'o (Mar 1), Chiwetel Ejiofor (July 10), Jamie Dornan (May 1), Dakota Johnson (Oct 4), Lorde (Nov 7) and Macklemore (June 19). New special days such as Take Your Poet to Work Day (July 15), National Black Women in Jazz and the Arts Day (Mar 1), National Biscotti Day (Sept 29), Runner's Selfie Day (June 23), No Selfies Day (Mar 16) and many more. New! Get exclusive access to the Chase's Calendar of Events companion website with: What's on Today? All the holidays, events, anniversaries, celebrity birthdays, and so on for the current day Advanced Search: customize your search--date ranges, location, key word, category, attendance--however you want! Unique Festivals of the World: a new, interactive map of the world--click on a country and discover its major festivals Tabbed pages for Major Awards, About the Holidays, Spotlight for 2015, Glossary of Calendar Terms and Special Months For information on the url and password of the companion website, please see details inside the book.

A wide variety of marginal basins, ranging from polar to equatorial regions, and a few sizeable enclosed basins, can all be included among the Asian Seas. The Arctic Ocean shelf seas off Siberia; the sheltered basins along the Pacific Ocean's western rim; the coastal seas of the northernmost Indian Ocean, including the semi-enclosed Red Sea and Persian Gulf; the Caspian Sea, the remnants of the Aral Sea and a score of brackish or freshwater lakes, such as Lake Balkhash and Lake Baykal; all exhibit a multiplicity of environmental features and processes. Understanding the peculiarities of such a large and varied collection of marine and coastal types requires integrated observation systems, among which orbital remote sensing must play an essential role. This volume reviews the current potential of Earth Observations in assessing the many Asian seascapes, using both passive and active techniques in diverse spectral regions, such as measuring reflected visible and near-infrared sunlight and surface emissions in the thermal infrared and microwave range, or surface reflection of transmitted radar pulses in the microwave range. An in-depth evaluation of the available spectral regions and observation techniques, as well as of novel multi-technique methods, ensures that suitable tools are indeed accessible for exploring and managing the wealth of resources that the Asian Seas have to offer.

Helen R Jacobus demonstrates mathematically that the Aramaic calendar texts from Qumran were designed to show the position of the sun and moon in the zodiac for each day of the month forever.

The wild and suspenseful story of one of the most crucial and least known campaigns of the Revolutionary War when America's scrappy navy took on the full might of Britain's sea power. "Few know of the valor and courage of Benedict Arnold... With such a dramatic main character, the story of the Battle of Valcour is finally seen as one of the most exciting and important of the American Revolution." —Tom Clavin author of Dodge City and co-author of Valley Forge During the summer of 1776, a British incursion from Canada loomed. In response, citizen soldiers of the newly independent nation mounted a heroic defense. Patriots constructed a small fleet of gunboats on Lake Champlain in northern New York and confronted the Royal Navy in a desperate three-day battle near Valcour Island. Their effort surprised the arrogant British and forced the enemy to call off their invasion. Jack Kelly's Valcour is a story of people. The northern campaign of 1776 was led by the underrated general Philip Schuyler (Hamilton's father-in-law), the ambitious former British officer Horatio Gates, and the notorious Benedict Arnold. An experienced sea captain, Arnold devised a brilliant strategy that confounded his slow-witted opponents.

America's independence hung in the balance during 1776. Patriots endured one defeat after another. But two events turned the tide: Washington's bold attack on Trenton and the equally audacious fight at Valcour Island. Together, they stunned the enemy and helped preserve the cause of liberty.

U.S. Navy SEALs 2015 provides an up-close and personal look at this legendary elite fighting force. Featured are photographs of SEALs in action. The term SEAL is derived from these special operations warriors' ability to operate on the sea, air, and land. From freefall high-altitude parachuting, to patrolling, to fast-roping from a helicopter, to clearing rooms in a building, this calendar demonstrates the variety of SEAL capabilities. Of particular interest are photos of preliminary SEAL training in the BUD/S course (Basic Underwater Demolition/SEAL), including the notorious Hell Week.
