Blockchain is transforming business. What's your strategy? Leaders of forward-thinking organizations are exploring how blockchain can transform the way they create and seek value. Whether it's used to streamline multiparty processes, create and trade new assets, or leverage artificial intelligence and the internet of things, blockchain enables entirely new business opportunities. This is just the start. As blockchain becomes more widely adopted, it has the potential to radically change the way companies and societies operate, as transformative a paradigm shift as the launch of the internet. The Real Business of Blockchain is one of the first books on this transformative technology written for business leaders. Authors David Furlonger and Christophe Uzureau--both of Gartner, the world-renowned research and advisory company--will help you: Assess how blockchain will impact your business Explore the value proposition that blockchain offers Make smart near- and midterm investments Position your organization in a new competitive landscape Timely, visionary, and accessible, The Real Business of Blockchain cuts through the hype and helps you unlock the vast capabilities of this powerful and potentially world-changing technology.

"Seeing Mad" is an illustrated volume of scholarly essays about the popular and influential humor magazine Mad, with topics ranging across its 65-year history—up to last summer's downsizing announcement that Mad will publish less new material and will be sold only in comic book shops. Mad magazine stands near the heart of post-WWII American humor, but at the periphery in scholarly recognition from American cultural historians, including humor specialists. This book fills that gap, with perceptive, informed, engaging, but also funny essays by a variety of scholars. The chapters, written by experts on humor, comics, and popular culture, cover the genesis of Mad; its editors and prominent contributors; its regular features and departments and standout examples of their contents; perspectives on its cultural and political significance; and its enduring legacy in American culture.

The year 2017 saw a multitude of conferences and exhibitions devoted to the centenary of the Russian Revolutions, both in Russia and in other parts of the world. The commemoration of this event would be incomplete without an exploration of its Northern dimension; in October 2017, UiT The Arctic University of Norway hosted the conference The Russian Revolutions of 1917: The Northern Impact and Beyond. Norway and Russia are both northern states, and the two countries have a common border in the High North. Some articles in this volume, based on the conference proceedings, investigate the impact of the Russian Revolution in Norway and Sweden, while others deal with the High North, e.g. the Revolution and Civil War in Northern Russia and the radicalization of the workers' movement of Northern Norway; some are also devoted to representations of the Russian Revolution at exhibitions and on the big screen.

When John Beilein arrived at University of Michigan in 2007, the once-proud men's basketball program was adrift after failing to reach the NCAA Tournament for nine straight seasons. Over the next twelve years, he became the program's all-time winningest coach, reached two national championship games, won four Big Ten championships and produced eight NBA first-round draft picks. In an age of ethical lapses throughout college basketball, Beilein succeeded without a hint of impropriety. As much a teacher as a coach, he consistently identified undervalued recruits, taught them his innovative offensive system and carefully developed them into better players--an approach to the game that drove his unprecedented rise from high school junior varsity coach to head coach of the Cleveland Cavaliers. This book examines his tenure at Michigan in detail for the first time.

¿Y si envejecer fuera una enfermedad y fuese tratable como tal? El libro escrito por un aclamado científico de la facultad de Medicina de Harvard y una de las personas más influyentes de según Time, que cambiará paradigmas sobre el envejecimiento. Que envejecer es inevitable es una verdad aparentemente innegable. pero, ¿qué pasaría si todo lo que se nos ha dicho hasta ahora sobre el envejecimiento resultase incierto?, ¿qué sucedería si pudiéramos elegir nuestra esperanza de vida? En este libro innovador y asombroso, el Dr. David Sinclair, autoridad mundial y líder en genética y longevidad, revela una nueva y audaz teoría. Como él explica, el envejecimiento es una enfermedad y es una enfermedad tratable. Experimentos recientes en la reprogramación genética sugieren que, en un futuro cercano, no solo podremos sentirnos más jóvenes, sino serlo. Mediante estas páginas, el Dr. Sinclair nos invita al proceso de descubrimiento científico y revela algunas tecnologías emergentes y algunos cambios simples en el estilo de vida que nos ayudarán a sentirnos más jóvenes y a estar más saludables por más tiempo como el ayuno intermitente, la exposición al frío, hacer ejercicio con la intensidad adecuada y comer menos carne. Alarga tu esperanza de vida cambiará para siempre nuestra idea sobre por qué envejecemos y qué podemos hacer al respecto. El doctor David Sinclair es profesor de genética en la Harvard Medical School y ha sido nombrado por la revista Time como una de las 100 personas más influyentes. Su trabajo ha aparecido ampliamente en los medios de comunicación y ha fundado y codirigido nueve compañías de biotecnología desde 2005.

A NEW YORK TIMES BESTSELLER “Brilliant and enthralling.”? —The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time’s most influential people. It’s a seemingly undeniable truth that aging is inevitable. But what if everything we’ve been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: “Aging is a disease, and that disease is treatable.” This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair’s own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it.

Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, Lifespan will forever change the way we think about why we age and what we can do about it.

The stress that comes with being a first responder has been known to lead to depression, anxiety, substance abuse, and suicide. However, few clinicians are informed about these health concerns and how to adequately treat them in this population. Therefore, there is an urgent need for practitioners to understand the latest information regarding treatments that will be useful to this specific population. Mental Health Intervention and Treatment of First Responders and Emergency Workers is an essential reference source that focuses on the latest research for diagnosing and treating mental health issues experienced by emergency personnel and seeks to generate awareness and inform clinicians about the unique circumstances encountered by these professionals. While highlighting topics including anxiety disorders and stress management, this book is ideally designed for clinicians, therapists, psychologists, psychiatrists, practitioners, medical professionals, EMTs, law enforcement, fire departments, military, academicians, researchers, policymakers, and students seeking current research on psychological therapy methods regarding first responders.

Oracle Database 12c Release 1 running on Linux is available for deployment on the IBM ZTM family of servers. The enterprise-grade Linux on IBM Z solution is designed to add value to Oracle Database solutions, including the new functions that are introduced in Oracle Database 12c. In this IBM Redbooks® publication, we explore the IBM and Oracle Alliance and describe how Oracle Database benefits from the IBM Z platform. We then explain how to set up Linux guests to install Oracle Database 12c. We also describe how

to use the Oracle Enterprise Manager Cloud Control Agent to manage Oracle Database 12c Release 1. We also describe a successful consolidation project from sizing to migration, performance management topics, and high availability. Finally, we end with a chapter about surrounding Oracle with Open Source software. The audience for this publication includes database consultants, installers, administrators, and system programmers. This publication is not meant to replace Oracle documentation, but to supplement it with our experiences while installing and using Oracle products.

Keep your mind sharp all year long with Mathematics 2022: Your Daily Epsilon of Math, a 12" x 12" wall calendar featuring 12 images relating to math concepts! Let mathematicians Rebecca Rapoport and Dean Chung tickle the left side of your brain by providing you with a math challenge for every day of the year. The solution is always the date, but the fun lies in figuring how to arrive at the answer, and possibly discovering more than one method of arriving there. Some of the most tricky problems require only middle school math applied cleverly. With entry-level algebra, word problems, math puns, and interesting math definitions added into the mix, this calendar will intrigue you for the whole year. End the year with more brains than you had when it began with Mathematics 2022: Your Daily Epsilon of Math.

"This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system, predominantly in Australia, but touching other universities worldwide. Related studies on language planning, methodology or pedagogy have focused on one or more of these same issues, but rarely on their totality. Intersections as a metaphor running discreetly through the essays in this volume, connects them all to a lived reality. The field of languages and cultures, as it is practised and reflected upon in Australian universities, is essentially an interdisciplinary and interconnecting space - one in which linguistic and disciplinary diversities meet and join forces, rather than collide or disperse along different pathways. The international and local studies featured here focus on language planning, new pedagogies and language reclamation and link to meeting points and commonalities. They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field, whether within their institutions, within the tertiary system, or within the framework of government policy." -- prové de l'editor.

The Professionalisation of Women's Sport draws upon the expertise of a range of scholars from the fields of sport sociology, sport history, sport economics to critically discuss the complex and often fragmented histories of women's involvement in professional sport.

Despite increased awareness of sexual diversity, older people's accounts of sex and intimacy remain marginalised. This edited volume addresses diversity in sexual and intimate experience later in life (50+) and captures international research and analysis relating to intersectional identities. Contributors explore how being older intersects with differences of ethnicity, gender, sexuality and class. Offering a critical focus and original contribution to an emerging, although still relatively neglected field, this collection extends knowledge concerning intimacies, practices and pleasures for those thought to represent normative, non-normative and 'new normative' forms of sexual identification and expression.

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

FOREWORD BY SHERYL SANDBERG You've almost certainly laughed at Scovell's jokes—you just didn't know it until now. Just the Funny Parts is a juicy and scathingly funny insider look at how pop culture gets made. For more than thirty years, writer, producer and director Nell Scovell worked behind the scenes of iconic TV shows, including The Simpsons, Late Night with David Letterman, Murphy Brown, NCIS, The Muppets, and Sabrina, the Teenage Witch, which she created and executive produced. In 2009, Scovell gave up her behind-the-scenes status when the David Letterman sex scandal broke. Only the second woman ever to write for his show, Scovell used the moment to publicly call out the lack of gender diversity in late-night TV writers' rooms. "One of the boys" came out hard for "all of the girls." Her criticisms fueled a cultural debate. Two years later, Scovell was collaborating with Sheryl Sandberg on speeches and later on Lean In, which resulted in a worldwide movement. Now Scovell is opening up with this fun, honest, and often shocking account. Scovell knows what it's like to put words in the mouths of President Barack Obama, Mark Harmon, Candice Bergen, Bob Newhart, Conan O'Brien, Alyssa Milano, and Kermit the Frog, among many others. Through her eyes, you'll sit in the Simpson writers' room... stand on the Oscar red carpet... pin a tail on Miss Piggy...bond with Star Trek's Leonard Nimoy... and experience a Stephen King-like encounter with Stephen King. Just the Funny Parts is a fast-paced account of a nerdy girl from New England who fought her way to the top of the highly-competitive, male-dominated entertainment field. The book delivers invaluable insights into the creative process and tricks for navigating a difficult workplace. It's part memoir, part how-to, and part survival story. Or, as Scovell puts it, "It's like Unbroken, but funnier and with slightly less torture."

This brief anthology for introductory sociology is a collection of 24 short readings that illustrate key concepts in sociology, relate to the everyday lives of students, and spark good classroom discussions. The selections represent four theoretical traditions in sociology (functionalism, symbolic interaction, conflict theory, feminism) and show the range and diversity of sociology and the people who practice it. The book is designed for instructors who want to expose students to some original scholarship in their first sociology course, but who do not want to adopt a comprehensive reader along with the core text they are using.
