The novel's protagonist is a British Roman Catholic priest, Father Percy Franklin, who looks identical to the mysterious U.S. Senator Julian Felsenburgh of Vermont. The senator appears as a lone and dramatic figure promising world peace in return for blind obedience. No one quite knows who he is or where he comes from, but his voice mesmerizes. Under his leadership, war is abolished. Felsenburgh becomes the President of Europe, then of the world, by popular acclaim. Everyone is fascinated with him, yet still no one knows much about him. People are both riveted and frightened by the way he demands attention. Most follow without question. Having been a close observer of President Felsenburgh's rise, Father Franklin is called to Rome, a Hong Kong-style enclave ruled by Pope John XXVI and raised to the College of Cardinals. Meanwhile, defections among bishops and priests increase. At Cardinal Franklin's instigation, the pope abolishes the Eastern Catholic Churches and forms a new religious order, the Order of Christ Crucified. All its members, including the Pope, vow to die in the name of the faith.

This is a book about a box that contained the world. The box was the Picture Academy for the Young, a popular encyclopedia in pictures invented by preacher-turned-publisher Johann Siegmund Stoy in eighteenth-century Germany. Children were expected to cut out the pictures from the Academy, glue them onto cards, and arrange those cards in ordered compartments—the whole world filed in a box of images. As Anke te Heesen demonstrates, Stoy and his world in a box epitomized the Enlightenment concern with the creation and maintenance of an appropriate moral, intellectual, and social order. The box, and its images from nature, myth, and biblical history, were intended to teach children how to collect, store, and order knowledge. te Heesen compares the Academy with other aspects of Enlightenment material culture, such as commercial warehouses and natural history cabinets, to show how the kinds of collecting and ordering practices taught by the Academy shaped both the developing middle class in Germany and Enlightenment thought. The World in a Box, illustrated with a multitude of images of and from Stoy's Academy, offers a glimpse into a time when it was believed that knowledge could be contained and controlled.

The world is infected and humanity is reduced to creatures of vicious insanity. Doctor Thorn's rescue by a group of young survivors is just the beginning of their nightmarish journey to survive. In this apocalyptic landscape, humankind has one final hope that rests on the strength and determination of 10 young men and women.

With over a million copies of the series now in print, The Story of the World has become an enduring favorite of young readers and their parents.

The Beatles' final album made London's Abbey Road recording studios forever famous. But from their 1931 opening, the studios had exerted a unique appeal for almost everyone who recorded there. This revised and updated edition includes previously unseen pictures.

Helen Keller's autobiographies THE STORY OF MY LIFE and THE WORLD I LIVE IN chronicle in her own words the remarkable true story we have come to know from the stage and film productions of THE MIRACLE WORKER. Here we discover Helen's thoughts and feelings hidden in the blind, deaf, and mute character in those productions—thoughts and feelings she came to express with such eloquence orally and in writings in later years. And here we are inspired not only by Helen Keller and her journey but also by the intriguing possibilities that certainly must be awaiting discovery in others. EARLY REVIEWS "The autobiography of Helen Keller is unquestionably one of the most remarkable records ever published."—British Weekly "This book is a human document of intense interest, and without a parallel, we suppose, in the history of literature."—Yorkshire Post "Miss Keller's autobiography, well written and full of practical interest in all sides of life, literary, artistic and social, records an extraordinary victory over physical disabilities."—Times "This book is a record of the miraculous. No one can read it without being profoundly touched by the patience and devotion which brought the blind, deaf-mute child into touch with human life, without being filled with wonder at the quick intelligence which made such communication with the outside world possible."—Queen

Hailed by The New York Times for writing "with wonderful clarity about science . . . that effortlessly teaches as it zips along," nationally bestselling author Robert M. Hazen offers a radical new approach to Earth history in this intertwined tale of the planet's living and nonliving spheres. With an astrobiologist's imagination, a historian's perspective, and a naturalist's eye, Hazen calls upon twenty-first-century discoveries that have revolutionized geology and enabled scientists to envision Earth's many iterations in vivid detail—from the mile-high lava tides of its infancy to the early organisms responsible for more than two-thirds of the mineral varieties beneath our feet. Lucid, controversial, and on the cutting edge of its field, The Story of Earth is popular science of the highest order. "A sweeping rip-roaring yarn of immense scope, from the birth of the elements in the stars to meditations on the future habitability of our world." -Science "A fascinating story." -Bill McKibben

A lively and engaging narrative history showing the common threads in the cultures that gave birth to our own. This is the first volume in a bold new series that tells the stories of all peoples, connecting historical events from Europe to the Middle East to the far coast of China, while still giving weight to the characteristics of each country. Susan Wise Bauer provides both sweeping scope and vivid attention to the individual lives that give flesh to abstract assertions about human history. Dozens of maps provide a clear geography of great events, while timelines give the reader an ongoing sense of the passage of years and cultural interconnection. This old-fashioned narrative history employs the methods of "history from beneath"—literature, epic traditions, private letters and accounts—to connect kings and leaders with the lives of those they ruled. The result is an engrossing tapestry of human behavior from which we may draw conclusions about the direction of world events and the causes behind them.

Tomorrow is Oliver's 16th birthday which, in the treetop colony where he lives, means he is now a man who must take a wife and job. Despite his mother's insistence that he accept this future, he longs to see the world beyond his home. Unfortunately for him she is also the leader of the colony and its ruthless group of warriors knows as the Climbers. Waiting for the cover of night, he slips into the trees undetected to make his escape. Soon after, he is caught by his older sister Val who urges him to return home. After an unexpected turn of events, the siblings are far from familiar territory and caught in a desperate race to escape the dangers that surround them.

From Pulitzer Prize-winning journalist and bestselling author Ron Suskind comes a startling look at how America and the West lost their way, and at the struggles of their respective governments to reclaim the moral authority on which their survival depends. From the White House to Downing Street, and from the fault-line countries of South Asia to the sands of Guantanamo, Suskind offers an astonishing story that connects world leaders to the forces waging today's shadow wars and to the next generation of global citizens. Tracking down truth and hope, Suskind delivers historic disclosures with this emotionally stirring and strikingly original portrait of the post 9-11 world.

After learning of atomic physics, H. G. Wells began to think of its potential impact on human society. In *The World Set Free*, atomic energy causes massive unemployment, shaking the already fragile social order. The ambitious powers of the world decide to seize the opportunity to compete for dominance, and a world war breaks out, echoing the looming Great War about to ignite in 1914. Waking to the catastrophe, humanity begins the hard search for a way into a better future. The novel traces a soldier, an ex-king, a despot, and a sage through a profound transformation of human society, and we gain a window into Wells' own thoughts and hopes along the way. With one prophetic stroke, Wells gives the first detailed depiction of atomic energy and its potential destructive power, and predicts the use of the air power in modern warfare. He may have even directly influenced the development of nuclear weapons, as the physicist Leó Szilárd, shortly after reading the novel in 1932, then conceived of harnessing the neutron chain reaction critical to the development of the atom bomb. The dramatic and controversial history of the world's leading tournament. Brian Glanville's classic account is a celebration of the great players and matches from Uruguay in 1930 to Germany in 2006 - and a bold attack on all those who have mismanaged the 'beautiful game'.

Set in a period when gasoline engines were in their infancy and automobiles were rare, and when even Chief Inspectors had to engage a carriage and horses to move about, the appearance of a vehicle that can move at astounding speeds on land, on water - and as later revealed, underwater and through the air - marks a technological advance far beyond the reach of nations. It is technology invented by and for the sole benefit of a man who styles himself (with some justification) "The Master of the World." This book is a sequel to an earlier Verne novel, "Robur the Conqueror", but enough detail is given to fully appreciate this story without having first read the other.

Is the answer to their problems to be found within the world of science-fiction or are they setting themselves up for yet more grief and sadness? The Missing Years of Thomas Pritchard August 3rd. 6:03am. The tranquil summer's morning was shattered by the desperate screams of Thomas' mother echoing down the near deserted suburban street. The few people milling about outside getting ready for their daily business had said they couldn't make out what the cries were about when they were interviewed. Not initially. Not until Anne, a pretty woman in her early thirties with shoulder length blonde hair, spilled out onto the street wearing nothing more than her dressing gown and slippers anxiously calling out for her five year old son, Thomas, to come out from wherever he was hiding. Eye witnesses reported Anne was closely followed by her husband Bill - a professional, clean-shaven man in his late thirties with dark, short hair - half dressed for work in his suit trousers and unbuttoned white shirt, and that he too looked just as frantic as the mother did. The year was 2003; the year Thomas disappeared from his home without a trace. * * * * * August 3rd. 6:03am. A young, fragile looking hand knocked confidently on the white PVC of the front door to number twenty-two. The hand belonged to a smartly dressed, skinny fourteen year old, fresh-faced boy. Whilst waiting for an answer to his knocking he slid a brown leather satchel off his shoulder down onto the floor as though the weight was too much for him to bear any more. He went to knock again but stopped himself when he heard the sound of footsteps from the other side of the door as the freshly woken homeowner came to answer his initial knocking. There was the slightest of pauses as keys were twisted in locks before the door opened as much as the strong, gold, security chain would permit it to. "Can I help you?" asked the homeowner, a frail looking woman in her late sixties. "Where's my mum?" asked the boy. The year was 2012; the year Thomas came home.

Never before in the history of mankind have so few people had so much power over so many. The people at the top of the American national security establishment, the President and his principal advisors, the core team at the helm of the National Security Council, are without question the most powerful committee in the history of the world. Yet, in many respects, they are among the least understood. A former senior official in the Clinton Administration himself, David Rothkopf served with and knows personally many of the NSC's key players of the past twenty-five years. In *Running the World* he pulls back the curtain on this shadowy world to explore its inner workings, its people, their relationships, their contributions and the occasions when they have gone wrong. He traces the group's evolution from the final days of the Second World War to the post-Cold War realities of global terror -- exploring its triumphs, its human dramas and most recently, what many consider to be its breakdown at a time when we needed it most. Drawing on an extraordinary series of insider interviews with policy makers including Condoleezza Rice, Colin Powell, Henry Kissinger, senior officials of the Bush Administration, and over 130 others, the book offers unprecedented insights into what must change if America is to maintain its unprecedented worldwide leadership in the decades ahead.
