

The Taming Cathell Cliniquedusycomore

Project report for Graduate Diploma of Business (Shipping)

From the great hurricane of 1909 on Assateague Island (a Land Over), to the death of United States Supreme Court Justice Frank Oden almost a century later on the island of Bimini in the Bahamas, the Oden family copes with survival and death in the sea, and rape, murder and death ashore, as the barrier island family struggles over the years to overcome the poverty of their beginnings. A saga spanning three generations of a family from the beginning of the Twentieth Century to its ending. A story of the coasters, the people of the mid-Atlantic barrier islands- as they evolve from the days of outlaw gunners and commercial fishermen, to the development of the sport-fishing industry. A story of rich and poor- the guides and captains who had the skills that made it possible and the rich who had the money to pay for it- bound together by the legendary Kelly of the island of Bimini. The last generation of the Odens persevere as they fight and love, kill and die, from the High Atlas mountains of North Africa and the brothels of Casablanca, to the islands of the mid-Atlantic and the southeast coast of the United States, and finally to the halls of Congress and The Supreme Court.

Darkness gathers over Cathell and Thystle Moran may be all that stands in its way. The nightmares had just begun to fade when Thystle receives a cryptic message from the cleric who helped her and her friends in the battle against the Harbinger in the White City. Rycroft will keep returning fans and newcomers alike turning the pages long into the night.

The Taming

Thystle Moran is a sword for hire who prefers to keep her dark history firmly in the past. But she's forced to face it again when a mysterious informant claims to know who's responsible for the murder of one of her friends. He'll give her the killer's name, for a price.

Early in the last century a boy, Ivy Flowers, swam across Tar Bay to Hoopers Island to see a girl. In time, Shirley Flowers was born of the union that began with that swim. During the same period, Captain Augustus Elsworth Phillips, Jr. was the captain of the cargo schooner, McCready. In her aft-cabin a boy, Brice Phillips would be conceived. Brice Phillips and Shirley Flowers would marry and have two sons, Steve and Jeffrey. With the family's Hoopers Island packing plant as a base, the Phillips would create a worldwide empire based upon their relationship with the crab. This is the story of that family. It is also the story of the Empires of the Crab.

What can the humanities contribute to the practice of medicine? How, in practice, can this contribution strengthen physician-patient relationships, improve medical education, and improve patient care? The editors seek to engage physicians, humanists, and patients in a conversation addressing these two critical questions, and readers are asked to consider the future of the medical humanities and their goals: what are the possibilities for the renewal of the humanist tradition of practical wisdom, tolerance, and compassion, and what would this mean for the practice of medicine?

The Cambridge History of Medicine surveys the rise of medicine in the West from classical times to the present. Covering both the social and scientific history of medicine, this 2006 volume traces the chronology of key developments and events, engaging with the issues, discoveries, and controversies that have characterized medical progress.

Wading Through the Swamp chronicles the history of the era from the time of World War II to the present, highlighting the changes in our culture over that time. The author uses his life experiences from the bad person of his early years to his times as a judge to paint a picture of the evolution of our culture. The story moves from his boyhood years growing up, his black market years in North Africa, his time as a outlaw hunter and poacher and the time spent in the sport fishing industry on the Atlantic Coast. It moves then to his years as a lawyer and a judge and the unusual and interesting incidents and cases he was involved in over the 34 year span of his time in the legal fields. A portion of the book examines the unsolved murder of Rosemary Moon McIntyre and the corruption and the abuses of a prosecutor who shielded the primary suspect from the police investigation into her murder in order to protect his own political future.

A skeletal body is unearthed in a wooded area of Peterborough, Cambridgeshire. DI James Bliss, together with DC Penny Chandler, investigate the case and discover that the young, female victim had been relocated from its original burial site. A witness is convinced that a young woman was struck by a vehicle back in the summer of 1990, and that police attended the scene. However, no record exists of either the accident or the reported victim. As the case develops, two retired police officers are murdered. The two are linked with others who were on duty at the time a road accident was reported. As Bliss and Chandler delve deeper into the investigation, they start to question whether senior officers may have been involved in the murder of the young woman who was buried in the woods. As each link in the chain is put under duress, so is Bliss who clashes with superiors and the media. When his team receives targeted warnings, Bliss will need to decide whether to drop the case or to pursue those responsible, because the killer is much closer than they imagine . . . Social change has placed new demands on the practice of medicine, altering almost every aspect of patient care relationships. Just as medicine was encouraged to embrace the biological sciences some 100 years ago, recent directives indicate the importance of the social sciences in understanding biomedical practice. Humanistic challenges call for changes in curative and technological imperatives. In this book, social scientists contribute to such challenges by using social evidence to indicate appropriate new goals for health care in a changing environment. This book was designed to stimulate and challenge all those concerned with the human interactions that constitute medical practice. To encompass a wide range of topics, the authors include researchers; practicing physicians from the specialties of family, general, geriatric, pediatric, and oncological medicine; social and behavioral scientists; and public health representatives. Cutting across disciplinary boundaries, they explore the ethical, economic, and social aspects of patient care. These essays draw on past studies of the patient-doctor relationship and generate new and important questions. They address social behavior in patient care as a way to approach theoretical issues pertinent to the social and medical sciences. The authors also use social variables to study patient care and suggest new areas of sociomedical inquiry and new approaches to medical practice, education, and research. Its cross-disciplinary approach and jargon-free writing make this book an important and accessible tool for physician, scholar, and student.
