5/5 No Compromise is an African centered perspective on solving the x factor in the human equation:  $3/5$  slave + x =  $5/5$  whole human beings, for Black Americans, specifically, and Black people world wide in general. The book written by Jeff Weaver, is inspired and driven by the divine wisdom of Almighty God, the African Forces (Lwa, Orisa, Obosum) / Holy Spirit and the ancestors. The premise of 5/5 No Compromise is to establish the fact that: 1) The United States Constitution codified the value of Black lives, in Article I. Section 2, Chapter 3 (more popularly known as the "3/5 Clause") as "3/5 of a person." A codification which has never been, expressly, amended or eradicated; and 2) in order for Black victims of the trans Atlantic slave trade, white supremacy and colonialism to establish their genuine human status they must embrace their own traditions, customs and culture, in an autonomous mutual respect based co-existence with their former slave masters and governors. Furthermore, in order to connect the various "splinters" of Black sub-cultures that exist in the US and globally, there must be an establishment of the one cultural thread that exist in common with the genetic heredity of the people in question. For Black Americans and Black people, worldwide, that common cultural thread is the drum pulse which originated in Africa. It is the one cultural element that is powerful and consistent, wherever Black people are heavily populated in the world. The author, Jeff Weaver calls that thread, "drum centered culture" and has identified it as the key element in sowing together the global cultural fabric that will restore Black people to a 5/5 autonomous culture of thriving human beings, with lives that matter.

Malaria is one of the oldest recorded diseases in human history, and its 10,000-year relationship to primates can teach us why it will be one of the most serious threats to humanity in the 21st century. In this pathbreaking book Loretta Cormier integrates a wide range of data from molecular biology, ethnoprimateology, epidemiology, ecology, anthropology, and other fields to reveal the intimate relationships between culture and environment that shape the trajectory of a parasite. She argues against the entrenched distinction between human and non-human malarias, using ethnoprimateology to develop a new understanding of cross-species exchange. She also shows how current human-environment interactions, including deforestation and development, create the potential for new forms of malaria to threaten human populations. This book is a model of interdisciplinary integration that will be essential reading in fields from anthropology and biology to public health.

This book is more than an overview of race. While it includes haplographic studies and ancestry tracing, there is still a lot that is unknown about who we are as a HUMAN race. The story begins with the first people who lived with dinosaurs and the massive mutations occurring 5 thousand and 10 thousand years ago. Why these happened are important when tracing our ancestry. This study does not cover the near term expansion and massive mixing of races. What it does is look for beginnings and endings. Both suggest mutation, separation, migration, and adaptation in a world that is just a changing as race.

The research and writing of the book, HUMANS, has been a time of discovery and revelation. The intention was to complete the fascinating story touched on in the author's first two books of how early Homo sapiens became modern humans. Humans today are anatomically the same as the early Homo sapiens who first appeared on Earth about 200,000 years ago; however, there is a difference. The evidence shows they were instinctively-driven creatures much like their Homo ancestors. The hypothesis was that the key difference was modern humans have the unique attribute of consciousness. This study confirmed that and discovered how and when the transition to modern humans was made. But, much more was uncovered, including the story of how Homo sapiens acquired the broad set of key attributes that makes humans unique, compared to all other living creatures. In addition to consciousness, other attributes were discovered, including how and when the Moral Code, our conscience, our sense of a god, plus many other attributes came into being. The study was scientific in nature using secular evidence, solid logic and reason to tell the story; however, it was clearly shown that the appearance of Homo sapiens on Earth was a supernatural event, which I deduced was an act of God, just as described in the Bible. Topics, like the origination of the moral code, have been debated by scholars throughout the ages with no conclusion. Now, with secular facts, solid logic, and reason, it is also shown that the acquisition of the moral code was a supernatural act of God. The realization of a novel logic principal, I call Non-Evolving Attributes (NEA), allowed this to be determined with a high degree of confidence. Simply stated, the NEA principal says that if you have a group of descendants from a common ancestor, randomly evolved through many different branches, isolated in time and/or distance, and that all descendants have an identical attribute, then that attribute could not have randomly evolved; because if it did, then it would have had to evolve in the same way in each branch, and that is essentially impossible. If that attribute did not evolve, then the original ancestor must have that same attribute. This is profound and very powerful. If you discover a group of identical attributes in a group of people isolated from each other, but with a common ancestor, then you know right away the ancestor had that same attribute. This same principal also showed the Origin-of-Life was a supernatural act of God. No evolution was involved. This important question has long been pondered with no answer until now. This study is a breakthrough in understanding how we humans came into being. This is an important subject and one that has been debated by scholars for ages and now we have an answer. These are profound answers to long held questions, and which could cause a great deal of controversy

Do you ever think you're the only one making any sense? Or tried to reason with your partner with disastrous results? Do long, rambling answers drive you crazy? Or does your colleague's abrasive manner get your back up? You are not alone. After a disastrous meeting with a highly successful entrepreneur, who was genuinely convinced he was 'surrounded by idiots', communication expert and bestselling author, Thomas Erikson dedicated himself to understanding how people function and why we often struggle to connect with certain types of people. Originally published in Swedish in 2014 as Omgiven Av Idioter, Erikson's Surrounded by Idiots is already an international phenomenon, selling over 1.5 million copies worldwide, of which over 750,000 copies have been sold in Sweden alone. It offers a simple, yet ground-breaking method for assessing the personalities of people we communicate with - in and out of the office - based on four personality types (Red, Blue, Green and Yellow), and provides insights into how we can adjust the way(s) we speak and share information. Erikson will help you understand yourself better, hone communication and social skills, handle conflict with confidence, improve dynamics with your boss and team, and get the best out of the people you deal with and manage. He also shares simple tricks on body language, improving written communication and advice on when to back away or when to push on, and when to speak up or indeed shut up. Packed with 'aha!' and 'oh no!' moments, Surrounded by Idiots will help you understand and influence those around you, even people you currently think are beyond all comprehension. And with a bit of luck you can also be confident that the idiot out there isn't you!

'Beautiful, evocative, authoritative.' Professor Brian Cox 'Important reading not just for anyone interested in these ancient cousins of ours, but also for anyone interested in humanity.' Yuval Noah Harari Kindred is the definitive guide to the Neanderthals. Since their discovery more than 160 years ago, Neanderthals have metamorphosed from the losers of the human family tree to A-list hominins. Rebecca Wragg Sykes uses her experience at the cutting-edge of Palaeolithic research to share our new understanding of Neanderthals, shoving aside clichés of rag-clad brutes in an icy wasteland. She reveals them to be curious, clever connoisseurs of their world, technologically inventive and ecologically adaptable. Above all, they were successful survivors for more than 300,000 years, during times of massive climatic upheaval. Much of what defines us was also in Neanderthals, and their DNA is still inside us. Planning, co-operation, altruism, craftsmanship, aesthetic sense, imagination, perhaps even a desire for transcendence beyond mortality. Kindred does for Neanderthals what Sapiens did for us, revealing a deeper, more nuanced story where humanity itself is our ancient, shared inheritance.
