An inspirational and handy book of consciousness and love. Bring it with you on your daily journey for happiness everywhere you go.

Black Acting Methods seeks to offer alternatives to the Euro-American performance styles that many actors find themselves working with. A wealth of contributions from directors, scholars and actor trainers address afrocentric processes and aesthetics, and interviews with key figures in Black American theatre illuminate their methods. This ground-breaking collection is an essential resource for teachers, students, actors and directors seeking to reclaim, reaffirm or even redefine the role and contributions of Black culture in theatre arts.

practice tests About PERT Testing The PERT is a computer adaptive test established to determine whether a student is prepared for college level coursework. If a student does not meet the minimum required score set by the state, it's an indication that the student needs more academic preparation. The high school is then required to provide postsecondary preparatory instruction. All students enrolled in public high school in the state of Florida are required to take the PERT in the eleventh grade. The PERT tests students' abilities in math, reading, and writing. The test directly tests for competence for intermediate algebra and freshman level composition. The PERT is not timed, and each section has thirty questions. Scoring The PERT is not a test to pass or fail; it's used to determine the best academic path toward college for students. It's important for students to take the PERT seriously (even though it isn't graded) to ensure they are placed in the most appropriate classes. The PERT is scored by section in a range of 50 - 150, with "cut scores" throughout (so students will get three different scores). There are three or four tiers (depending on the section) of cut scores to determine what level students are currently at.

Gaby LeFevre is a suburban, Midwestern firecracker, growing up in the 80s and 90s and saving the world one homeless person, centenarian, and orphan at a time.

With her crew of twin sister, Annie, smitten Mikhail, and frenemy Mel, she's a pamphlet-wielding humanitarian, tackling a broken world full of heroes and heroines, villains and magical seeds, and Northwyth stories.

Beginning with a roadkill-burying nine-year-old and a gas-

leak explosion, it follows Gaby as she traverses childhood and young adulthood with characteristic intensity and a penchant for disaster. Meanwhile, the large cast of compelling characters entertains and the Northwyth legends draw you into their magic.

Spot the difference is an amazing activity that boosts your child's fine-ground perception. Fine-ground perception is the skill that would allow children to see in-between the negative spaces. This makes it possible to locate hidden objects, which is an important element to learning math and reading. Don't forget to checkout with a copy of this activity book today!

An undergraduate textbook devoted exclusively to relationships between mathematics and art, Viewpoints is ideally suited for math-for-liberal-arts courses and mathematics courses for fine arts majors. The textbook contains a wide variety of classroom-tested activities and problems, a series of essays by contemporary artists written especially for the book, and a plethora of pedagogical and learning opportunities for instructors and students. Viewpoints focuses on two mathematical areas: perspective related to drawing man-made forms and fractal geometry related to drawing natural forms. Investigating facets of the three-dimensional world in order to understand mathematical concepts behind the art, the textbook explores art topics including comic, anamorphic, and classical art, as well as photography, while presenting such mathematical ideas as proportion, ratio, self-similarity, exponents, and logarithms. Straightforward problems and rewarding solutions empower students to make accurate, sophisticated

drawings. Personal essays and short biographies by contemporary artists are interspersed between chapters and are accompanied by images of their work. These fine artists--who include mathematicians and scientists--examine how mathematics influences their art. Accessible to students of all levels, Viewpoints encourages experimentation and collaboration, and captures the essence of artistic and mathematical creation and discovery. Classroom-tested activities and problem solving Accessible problems that move beyond regular art school curriculum Multiple solutions of varying difficulty and applicability Appropriate for students of all mathematics and art levels Original and exclusive essays by contemporary artists Forthcoming: Instructor's manual (available only to teachers)

The Director as Collaborator teaches essential directing skills while emphasizing how directors and theater productions benefit from collaboration. Good collaboration occurs when the director shares responsibility for the artistic creation with the entire production team, including actors, designers, stage managers, and technical staff. Leadership does not preclude collaboration; in theater, these concepts can and should be complementary. Students will develop their abilities by directing short scenes and plays and by participating in group exercises. New to the second edition: updated interviews, exercises, forms, and appendices new chapter on technology including digital research, previsualization and drafting programs, and web-sharing sites new chapter on devised and ensemble-based works new chapter on immersive theater,

This volume explores whether theatre pedagogy can and should be transformed in response to the global climate crisis. Conrad Alexandrowicz and David Fancy present an innovative re-imagining of the ways in which the art of theatre, and the pedagogical apparatus that feeds and supports it, might contribute to global efforts in climate protest and action. Comprised of contributions from a broad range of scholars and practitioners, the volume explores whether an adherence to aesthetic values can be preserved when art is instrumentalized as protest and considers theatre as a tool to be employed by the School Strike for Climate movement. Considering perspectives from areas including performance, directing, production, design, theory and history, this book will prompt vital discussions which could transform curricular design and implementation in the light of the climate crisis. Theatre Pedagogy in the Era of Climate Crisis will be of great interest to students, scholars and practitioners of climate change and theatre and performance studies.

Ryan has a normal life until a stranger comes into his life and takes him onto a mysterious journey where his mission is to find pieces to build a machine and a weapon. But the only way to get these items is to time travel. His friends who accompany him on his journey are Diego, Ashley, and Richard. That's when they find out that there is something evil lurking around them.

Intercultural Acting and Performer Training is the first collection of essays from a diverse, international group of authors and practitioners focusing on intercultural acting and voice practices worldwide.

This unique book invites performers and teachers of acting and performance to explore, describe, and interrogate the complexities of intercultural acting and actor/performer training taking place in our twenty-first century, globalized world. As global contexts become multi-, inter- and intra-cultural, assumptions about what acting "is" and what actor/performer training should be continue to be shaped by conventional modes, models, techniques and structures. This book examines how our understanding of interculturalism changes when we shift our focus from the obvious and highly visible aspects of production to the micro-level of training grounds, studios, and rehearsal rooms, where new forms of hybrid performance are emerging. Ideal for students, scholars and practitioners, *Intercultural Acting and Performer Training* offers a series of accessible and highly readable essays which reflect on acting and training processes through the lens offered by "new" forms of intercultural thought and

This workbook contains a variety of exercises and activities designed to help young learners advance the fine motor skills that are essential to the handwriting process, beginning by tracing lines and curves, and then gently introducing some letter-writing practice. Several mazes are also included in the book as a fun way to promote visual motor skills, eye-hand coordination, and problem-solving skills.

Young students are introduced to the letters of the alphabet in exercises that have them trace

Lowercase Alphabet and then practice writing them on their own. Numbers are also presented in an engaging way, with a lesson in phonetics as well as exercises for tracing and writing numerals. A section of connect-the-dot games provides more motor skills development along with helping children learn the order of alphabet, while fill-in-the-blank games reinforce alphabet learning in a different way and provide more practice in writing the missing letters. *My BIG Book of Writing!* is a versatile tool that can help children who are struggling with writing skills to work at a comfortable level, as well as assisting those for whom writing comes more easily to

This book is the most practical clinical guide on Acceptance and Commitment Therapy (ACT said as one word, not as initials) yet available. It is designed to show how the ACT model and techniques apply to various disorders, settings, and delivery options. The authors of these chapters are experts in applying ACT in these various areas, and it is intriguing how the same core principles of ACT are given a nip here and a tuck there to fit it to so many issues. The purpose of this book, in part, is to emboldened researchers and clinicians to begin to apply ACT wherever it seems to fit. The chapters in the book demonstrate that ACT may be a useful treatment approach for a very wide range of clinical problems. Already there are controlled data in many of these areas, and soon that database will be much larger. The theory underlying ACT (Relational Frame Theory or "RFT"-and yes, here you say the initials) makes a powerful claim: psychopathology is, to a significant degree, built into human language. Further, it suggests ways to diminish destructive language-based functions and ways of augmenting helpful ones. To the extent that this model is correct, ACT should apply to a very wide variety of

behavioral issues because of the centrality of language and cognition in human functioning. *Software Systems Architecture* is a practitioner-oriented guide to designing and implementing effective architectures for information systems. It is both a readily accessible introduction to software architecture and an invaluable handbook of well-established best practices. It shows why the role of the architect is central to any successful information-systems development project, and, by presenting a set of architectural viewpoints and perspectives, provides specific direction for improving your own and your organization's approach to software systems architecture. With this book you will learn how to Design an architecture that reflects and balances the different needs of its stakeholders Communicate the architecture to stakeholders and demonstrate that it has met their requirements Focus on architecturally significant aspects of design, including frequently overlooked areas such as performance, resilience, and location Use scenarios and patterns to drive the creation and validation of your architecture Document your architecture as a set of related views Use perspectives to ensure that your architecture exhibits important qualities such as performance, scalability, and security The architectural viewpoints and perspectives presented in the book also provide a valuable long-term reference source for new and experienced architects

A Director Prepares is a thought-provoking examination of the challenges of making theatre. In it, Anne Bogart speaks candidly and with wisdom of the courage required to create 'art with great presence'. Each chapter tackles one of the seven major areas Bogart has identified as both potential partner and potential obstacle to art-making. They are Violence; Memory; Terror; Eroticism; Stereotype; Embarrassment; and Resistance. Each one can be used to generate extraordinary creative energy, if we know how to use it. *A Director Prepares* offers every practitioner an extraordinary insight into the creative process. It is a handbook, Bible and manifesto, all in one. No other book on the art of theatre comes even close to offering this much understanding, experience and inspiration.

Do you feel like you struggle to make time for everything? We are living in a time-poor society, working more than ever and with less time for ourselves and family. The pressures and stress of the obligations we feel we have, often leave us without time to do everything that we would like to. More critically, we lack the time to reflect, review our lives and consider our direction. Time to contemplate if the decisions we are making are going to lead us to a life of purpose or an old age filled with regret. Time for Anything is based on 5 years of research by Craig D Robinson. Using the techniques in this book, Craig went from working in an entry level position to, in just four years: start 2 companies, recharge with 12 weeks holiday a year, start a family, grow and sell his startups and retire at the age of 34. This book shows you how you too can have time for it all.

"Ensemble Theatre Making: A Practical Guide is the first comprehensive diagnostic handbook for building, caring for and maintaining ensemble.

Successful ensembles don't happen by chance: they can be created, nurtured and maintained through specific actions taken by ensemble leaders and members. Ensemble Theatre Making provides a thorough step-by-step process to consistently achieve the collaborative dynamic that leads to the group trust, commitment and sacrifice necessary for the success of a common goal. Through planning and preparation, investigating the essential building blocks of ensemble, identifying ensemble behaviours and techniques of responding to those behaviours, Ensemble Theatre Making gives tools, techniques and recipes for bringing ensemble from the realm of luck into a grounded practice. This conversational, straight-forward guide gives clarity and practical

Anne Bogart is an award-winning theatre maker, and a best-selling writer of books about theatre, art, and cultural politics. In this her latest collection of essays she explores the story-telling impulse, and asks how she, as a 'product of postmodernism', can reconnect to the primal act of making meaning and telling stories. She also asks how theatre practitioners can think of themselves not as staggers of plays but 'orchestrators of social interactions' and participants in an on-going dialogue about the future. We dream. And then occasionally we attempt to share our dreams with others. In recounting our dreams we try to construct a narrative... We also make stories out of our daytime

existence. The human brain is a narrative creating machine that takes whatever happens and imposes chronology, meaning, cause and effect... We choose. We can choose to relate to our circumstances with bitterness or with openness. The stories that we tell determine nothing less than personal destiny. (From the introduction) This compelling new book is characteristically made up of chapters with one-word titles: Spaciousness, Narrative, Heat, Limits, Error, Politics, Arrest, Empathy, Opposition, Collaboration and Sustenance. In addition to dipping into neuroscience, performance theory and sociology, Bogart also recounts vivid stories from her own life. But as neuroscience indicates, the event of remembering what happened is in fact the creation of something new.

Bertolt Brecht in Context examines Brecht's significance and contributions as a writer and the most influential playwright of the twentieth century. It explores the specific context from which he emerged in imperial Germany during the late nineteenth and early twentieth centuries, as well as Brecht's response to the turbulent German history of the twentieth century: World Wars One and Two, the Weimar Republic, the Nazi dictatorship, the experience of exile, and ultimately the division of Germany into two competing political blocs divided by the postwar Iron Curtain. Throughout this turbulence, and in spite of it, Brecht managed to remain extraordinarily productive, revolutionizing the theater of the twentieth century and developing a new approach to language and performance. Because of his unparalleled radicalism and influence, Brecht remains controversial to

Story Summary: The little mermaid princess is the youngest of five sisters, as each of her sisters turn 15 they are allowed to go to the surface.

Every sister brings back stories to tell the others. When it's finally the little mermaid's turn, she finds a handsome prince on a ship celebrating his 16th birthday. She watches him with fondness until a storm erupts, sending everyone on board into the sea. The little mermaid rushes to save the prince and in the process falls in love with him. When she finds out that humans have an eternal soul and merpeople don't, she sets out to get one by getting the prince to fall in love with her. But to do this, she must give up her beautiful voice to the sea witch so that she may have legs instead of a fish's tail. Will the prince fall in love with her? Or will she end up as foam on the sea?
