CRITICAL THINKING, THOUGHTFUL WRITING begins with the premise that thinking well involves using language well, and vice versa. This rhetoric with readings--written by critical-thinking scholar John Chaffee and English professors Christine McMahon and Barbara Stout--provides thorough coverage of the writing process, going beyond the traditional rhetoric to teach students how to evaluate sources, images, and arguments. Each chapter focuses on a critical-thinking skill--such as problem solving or analysis of complex issues--that is explored through "Thinking-Writing Activities" and thematically linked readings. The text helps students develop these skills through carefully sequenced pedagogy and a cross-disciplinary approach that asks them to complete writing assignments and critically evaluate readings drawn from a variety of disciplines. The Fifth Edition offers new readings, a new "Thinking Critically About New Media" feature in each chapter, and more photos, which emphasize visual rhetoric.

Jackson's text successfully illustrates the integration between statistics and research methods by demonstrating the ways to use statistics in analyzing data collected during research. Jackson's combined text adopts an inviting narrative style that speaks directly to students and draws them into the material, overcoming the initial apprehension students may feel at having to learn both subject areas at once. She incorporates a student-friendly critical thinking approach and presents

examples and exercises to which students can relate.

Jackson clearly focuses on the logic of the process and the methodology aspect of research.

THE RHETORICAL ACT: THINKING, SPEAKING, AND WRITING CRITICALLY, Fifth Edition, teaches liberal arts students how to craft and critique rhetorical messages that influence, inviting and enabling them to become articulate rhetors and critics of the world around them.

The new edition maintains a traditional humanistic approach to rhetoric, while extending the scope and relevance of the text. THE RHETORICAL ACT reaffirms the ancient Aristotelian and Ciceronian relationships between art and practice—one cannot master rhetorical skills without an understanding of the theory on which such skills are based. The text combines thorough coverage of rhetorical criticism, media literacy, and strategic public speaking, providing a solid grounding in essential concepts while helping students hone their skills in each area. Can your students distinguish between the true science of human thought and behavior and pop psychology? **CRITICAL THINKING IN PSYCHOLOGY: SEPARATING SENSE FROM NONSENSE** provides a tangible and compelling framework for making that distinction by using concrete examples of people's mistaken analysis of real-world problems. Stressing the importance of assessing the plausibility of claims, John Ruscio uses empirical research (such as the Milgram experiment) to strengthen evidence for his claims and to illustrate deception, self-deception, and psychological tricks throughout the text.

Designed for students with no prior training in logic, **INTRODUCTION TO LOGIC AND CRITICAL THINKING** offers an accessible treatment of logic that enhances understanding of reasoning in everyday life. The text begins with an introduction to arguments. After some linguistic preliminaries, the text presents a detailed analysis of inductive reasoning and associated fallacies. This order of presentation helps to motivate the use of formal methods in the subsequent sections on deductive logic and fallacies. Lively and straightforward prose assists students in gaining facility with the sometimes challenging concepts of logic. By combining a sensitive treatment of ordinary language arguments with a simple but rigorous exposition of basic principles of logic, the text develops students' understanding of the relationships between logic and language, and strengthens their skills in critical thinking. Thinking Critically, 8/e, teaches the fundamental thinking, reasoning, reading, and writing abilities that students need for academic success. The text begins with basic skills related to personal experience and then carefully progresses to the more sophisticated reasoning skills required for abstract, academic contexts. Thinking Critically introduces students to the cognitive process while teaching them to develop their higher-order thinking and language abilities. A number of distinctive characteristics make the text an effective tool for both instructors and students. Exercises, discussion topics, and writing assignments encourage active participation, stimulating students to critically examine their own and others' thinking.

Success depends on the ability to think critically. Training and practice turn this ability into a powerful skill. BECOMING A CRITICAL THINKER gives you the opportunity to develop this skill in a classroom environment while stressing its application to daily life. You'll learn to solve everyday problems, maintain successful relationships, make career choices, and interpret the messages of advertising in a variety of media. Exercises throughout the text encourage you to practice what you read and to apply it to your own life. BECOMING A CRITICAL THINKER breaks up critical thinking into a series of cumulative activities, a unique approach that has made this text a staple of many critical thinking courses. **Important Notice:** Media content referenced within the product

With a complete, approachable presentation, CRITICAL THINKING: THE ART OF ARGUMENT, 2nd Edition, is an accessible yet rigorous introduction to critical thinking. The text emphasizes immediate application of critical thinking in everyday life and helps students apply the skills they are studying. The relevance of these skills is shown throughout the text by highlighting the advantages of basing one's decisions on a thoughtful understanding of arguments and presenting the overarching commonalities across arguments. With its conversational writing style and carefully selected examples, the book employs a consistent and unified treatment of logical form and an innovative semiformal method of standardizing arguments that illustrates the concept of logical form while maintaining a visible connection to ordinary speech. Without sacrificing accuracy or detail, the authors clearly present the material, with appropriate study tools and exercises that emphasize application rather than memorization. In contrast to most texts designed to introduce students to contemporary moral problems, this book is designed to

present students with a method for how to think for themselves in a morally reasoned fashion. Honing students' critical thinking skills through continuous reference to a step-by-step method of moral analysis, this text covers not only many timely moral problems associated with life and death, social justice, and sex and reproduction, but many major ethical theories as well, such as utilitarianism, deontology, virtue ethics, and egoism. Building on the methodology and critical successes of his THINKING CRITICALLY ABOUT PHILOSOPHICAL PROBLEMS (Wadsworth 2002), Wall's new book provides students with clear and readily accessible models of rigorous moral analysis to guide their own deliberations about the most crucial moral issues of our time. Cited by one reviewer as "a work of stunning originality," this new text presents philosophy both as a collection of fundamental problems and as a method to solve problems, the method of critical thinking. Students become active participants in doing philosophy, in using the method of philosophy as philosophers do when they are thinking well. The various parts of the text are organized to reflect a recurring pattern of critical thinking, and exercises are provided throughout the text to sharpen these thinking skills in the context of solving philosophical problems. In addition to addressing individual philosophical problems, this text also encourages students to integrate their solutions into a coherent worldview.

In *Critical Thinking: An Appeal to Reason*, Peg Tittle empowers students with a solid grounding in the lifelong skills of considered analysis and argumentation that should underpin every student's education. Starting with the building blocks of a good argument, this comprehensive new textbook offers a full course in critical thinking. It includes chapters on the nature and structure of argument, the role of relevance, truth and generalizations, and the subtleties of verbal and visual language. Special features include:

- an emphasis on the constructive aspect of critical thinking—strengthening the arguments of others and constructing sound arguments of your own—rather than an exclusive focus on spotting faulty arguments
- actual questions from standardized reasoning tests like the LSAT, GMAT, MCAT, and GRE
- graduated end-of-chapter exercises, asking students to think critically about what they see, hear, read, write, and discuss
- numerous sample arguments from books, magazines, television, and the Internet for students to analyze
- many images for critical analysis
- analyzed arguments that help students to read critically and actively
- an extensive companion website for instructors and students

A companion website features:

- for instructors: an extensive instructor's manual; a test bank; and PowerPoint slides
- for students: extended answers, explanations, and analyses for the exercises and arguments in the book; supplementary chapters on logic and ethics; downloadable MP3 study guides; interactive flash cards; and thinking critically audio exercises.
