One problem with helicoptering is that there are virtually no flying clubs, at least of the sort that exist for fixed wing, so pilots get very little chance to swap stories, unless they meet in a muddy field somewhere, waiting for their passengers. As a result, the same mistakes are being made and the same lessons learnt separately instead of being shared - it's comforting sometimes to know that you're not the only one to inflate the floats by accident! Even when you do get into a school, there are still a couple of things they don't teach you, namely that aviation runs on paperwork, and how to get a job, including interview techniques, etc - flying the aircraft is actually less than a third of the job. Another is that nobody really tells you anything, either about the job you have to do (from the customer) or how to do it (the company) - you will always be up against the other guy who managed to do it last week! Sure, there will be training, but, even in the best companies, this will be relatively minimal. This book is an attempt to correct the above situations by gathering together as much information as possible for helicopter pilots, old and new, professional and otherwise, in an attempt to explain the why, so the how will become easier (you will be so much more useful if you know what the customer is trying to achieve). In short, this is all the stuff nobody taught me - every tip and trick I have learnt has been included.

The darkest of secrets sometimes linger for a lifetime. When they are finally exposed they can be like the discovery of an ancient tomb, perhaps better left alone, although never ignored. Aristotle Mercury's father knew too much, so he was silenced. With the help of his friends in the Russian mob, Aristotle's Uncle Jacob is able to move in and take over as the new head of the now successful factory that his own brother created. The year is 1968. As the Red Army's tanks roll into Wenceslas Square in the very heart of Prague, a seventeen year old Aristotle learns the horrible truth about his father. Five years ago someone else was murdered in his place to make it appear as if he was accidentally crushed under a factory press. Since then his father has been alive and imprisoned in the notorious Prague Institute for the Criminally Insane. In a daring rescue Aristotle retrieves his barely alive father from the bowels of the terrible prison. After a short time his father succumbs to the ravages of his imprisonment, but not before he divulges the location of the evidence which proves he owned the now thriving factory, and of Uncle Jake's murderous duplicity in stealing it from them. With the Russians taking over the country, and the mob closing in to eliminate the only living heir to a burgeoning fortune, Aristotle flees Czechoslovakia and makes his way to America, vowing to one day go back and even the score. He settles in New York, in Greenwich Village. He's honest and works hard to learn the new ways of a strange land. Soon he befriends his eccentric landlord, the elderly Mrs. Schroeder. Telly, as his new friends in America like to call him, ignites a withered spirit of adventure in the lady who still believes in the good in people. She owns some property, and Telly has a talent for building. They both learn Telly also has an eye for the deal. Together they first develop her land, and then other land in the exploding New York real estate market. Telly's ambitions lead him from the posh boardrooms of New York to the lucrative shores of New Jersey, where he's almost killed as he constructs the world's largest casino. Never too far from his mind, always there to haunt and motivate him, Telly dreams of the day he will finally return to his homeland and exact vengeance on his Uncle Jake. In a sweeping saga of familial betrayal spanning three decades of intertwining lives, Telly Mercury finally gets his chance for justice. But does righting of wrongs of a demon filled closet come with a price too high? Secrets are sometimes better left untold, in spite of their screams from across the years to be heard. His own salvation hanging in the balance, Telly must somehow accept that forgiveness trumps retribution, and money truly can't buy happiness. And just maybe, as it is with Uncle Jacob, forgiveness is the worst possible epithet for a life lived in the accompaniment of the unquenchable thirst of greed and murder.

'Etchells writes eloquently ... A heartfelt defence of a demonised pastime' The Times 'Once in an age, a piece of culture comes along that feels like it was specifically created for you, the beats and words and ideas are there because it is your life the creator is describing. Lost In A Good Game is exactly that. It will touch your heart and mind. And even if Bowser, Chun-li or Q-Bert weren't crucial parts of your youth, this is a flawless victory for everyone' Adam Rutherford When Pete Etchells was 14, his father died from motor neurone disease. In order to cope, he immersed himself in a virtual world - first as an escape, but later to try to understand what had happened. Etchells is now a researcher into the psychological effects of video games, and was co-author on a recent paper explaining why WHO plans to classify 'game addiction' as a danger to public health are based on bad science and (he thinks) are a bad idea. In this, his first book, he journeys through the history and development of video games - from Turing's chess machine to mass multiplayer online games like World of Warcraft- via scientific study, to investigate the highs and lows of playing and get to the bottom of our relationship with games - why we do it, and what they really mean to us. At the same time, Lost in a Good Game is a very

unusual memoir of a writer coming to terms with his grief via virtual worlds, as he tries to work out what area of popular culture we should classify games (a relatively new technology) under. He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. Normally, these two would never meet, but a higher power has different plans for both of them.
