to the beach — in a story told with warmth and sweetness. Tía Isa wants a car. A shiny green car the same color as the ocean, with wings like a swooping bird. A car to take the whole family to the beach. But saving is hard when everything goes into two piles — one for here and one for Helping Money, so that family members who live far away might join them someday. While Tía Isa saves, her niece does odd jobs for neighbors so she can add her earnings to the stack. But even with her help, will they ever have enough? Meg Medina's simple, genuine story about keeping in mind those who are far away is written in lovely, lyrical prose and brought to life through Claudio Muñoz's charming characters.

Today it is often said that we live in a 'rape culture'. Panicked headlines tell us that rape is on the increase and that the police are failing to deal with it. Our courts are said to be incapable of delivering justice in rape cases, with the rate of convictions remaining consistently low. Sexism and misogyny in wider society have created a culture in which rape is pervasive, under-reported and often ignored by an uncaring public. But these claims are built on myths and misunderstandings. This book argues that the belief in a 'rape culture' is seriously distorting our discussion of sexual violence. It explains how the laws around rape have expanded significantly in recent decades, giving the state a far greater say in the most intimate areas of our lives. The drive to prosecute more and more people has damaging implications for our legal rights and basic freedoms - and our ability to live intimately with one another. If we are to have a serious discussion

about rape, it's time to dispel the dangerous myth of rape culture.

When we think about young people dealing drugs, we tend to picture it happening on urban streets, in disadvantaged, crime-ridden neighborhoods. But drugs are used everywhere—even in upscale suburbs and top-tier high schools—and teenage users in the suburbs tend to buy drugs from their peers, dealers who have their own culture and code, distinct from their urban counterparts. In *Code of the Suburb*, Scott Jacques and Richard Wright offer a fascinating ethnography of the culture of suburban drug dealers. Drawing on fieldwork among teens in a wealthy suburb of Atlanta, they carefully parse the complicated code that governs relationships among buyers, sellers, police, and other suburbanites. That code differs from the one followed by urban drug dealers in one crucial respect: whereas urban drug dealers see violent vengeance as crucial to status and security, the opposite is true for their suburban counterparts. As Jacques and Wright show, suburban drug dealers accord status to deliberate avoidance of conflict, which helps keep their drug markets more peaceful—and, consequently, less likely to be noticed by law enforcement. Offering new insight into both the little-studied area of suburban drug dealing, and, by extension, the more familiar urban variety, *Code of the Suburb* will be of interest to scholars and policy makers alike.

Now in paperback, the cultural and medical history of dementia and Alzheimer's disease by a leading psychiatrist and bioethicist who urges us to turn our focus from cure to care. Despite being a physician and a bioethicist, Tia Powell wasn't prepared to address the challenges she faced when her grandmother, and then her mother, were diagnosed with dementia--not to mention confronting the hard truth that her own odds aren't great. In the U.S., 10,000 baby boomers turn 65 every day; by the time a person reaches 85, their chances of having dementia approach 50 percent. And the truth is, there is no cure, and none coming soon,

despite the perpetual promises by pharmaceutical companies that they are just one more expensive study away from a pill. Dr. Powell's goal is to move the conversation away from an exclusive focus on cure to a genuine appreciation of care--what we can do for those who have dementia, and how to keep life meaningful and even joyful. Reimagining Dementia is a moving combination of medicine and memoir, peeling back the untold history of dementia, from the story of Solomon Fuller, a black doctor whose research at the turn of the twentieth century anticipated important aspects of what we know about dementia today, to what has been gained and lost with the recent bonanza of funding for Alzheimer's at the expense of other forms of the disease. In demystifying dementia, Dr. Powell helps us understand it with clearer eyes, from the point of view of both physician and caregiver. Ultimately, she wants us all to know that dementia is not only about loss--it's also about the preservation of dignity and hope.
