topics through three essential and relevant books. These carefully selected works can be fiction, non-fiction, historical documents or even biographies. We will always select for you three great works to instigate your mind, this time the topic is: Voyages Extraordinaires: Twenty Thousand Leagues under the Sea Around the World in 80 Days From the Earth to the Moon All by Jules Verne The Voyages Extraordinaires is a sequence of fifty-four novels by Jules Verne. The goal of the Voyages was to outline the geographical, geological, physical, and astronomical knowledge amassed by science and to recount, in an entertaining format. Verne's attention to detail coupled with his sense of wonder form the backbone of the Voyages. In Twenty Thousand Leagues under the Sea we travel in the submarine Nautilus. The crew cut off any relationship with the nations and with humanity. They live only on what the sea gives them - food, the raw material they need for the production of electricity. Around the World in Eighty Days tells the journey of an aristocrat and his employee who, motivated by a bet, try to go around the world with limited time and resources. It was the most popular of Verne's Voyages extraordinaires series of novels. From the Earth to the Moon tells the story of attempts to catapult a manned projectile onto the Moon. It is curious that some of Verne's calculations, in spite of the lack of empirical data, are quite accurate. This is one of many books in the series 3 Books To Know. If you liked this book, look for the other titles in the series, we are sure you will like some of the topics.

van Wyhe has delved deeply into archives and brings Wallace's travels wonderfully back to life by discovering new facts about his voyage and theories. Without downplaying the impact of Darwin, van Wyhe's book reveals Wallace as a great evolutionary thinker in his own right, who truly deserves to be considered in context." Janet Browne Aramont Professor of the History of Science Harvard University "This book greatly advances our knowledge of Wallace by correcting a plethora of misleading myths, by reconstructing Wallace's travels, experiences and reflections with authoritative precision, interpretive sophistication, archival documentation and by insightful clarifications of Wallace and Darwin's interactions, divergences and convergences. The overall result is a major scholarly contribution to the intellectual and social history of Wallacean science and of Darwinian science in their original, distinctive cultural contexts." Jonathan Hodge Honorary Fellow, History and Philosophy of Science University of Leeds "The first published notebook of Wallace's travel to the Malay Archipelago is a long-awaited addition to all the biographies and studies, as they offer the unique insight into the development of Wallace's thinking during his long journey. John van Wyhe makes extensive use of Wallace's notes, but only in their totality they make an impact and give way to emergence of Wallace's personality in many sides." Thomas Weber Frankfurter Allgemeine Zeitung "Van Wyhe is not guilty of any such bias against Wallace and in fact deserves these reviewers' thanks for elucidating for the first time exactly how these two fascinating men discovered the way life on Earth evolves." Gordon Chancellor, author of The Dispersal of Darwin "The book has marvelous illustrations of the flora and fauna observed by Wallace, as well as other images of the period, and is ideal for historian as well as naturalists." with each other. In his latest entertaining and thought provoking narrative travelogue, Michael Booth sets out to discover how deep, really, is the enmity between these three “tiger” nations, and what prevents them from making peace.
