The Sumerian civilization is the oldest known human civilization on Earth. Their divine beings were known as the Anunnaki which in Sumerian signifies "Those Who from Heaven to Earth Came". It bloomed out overnight around 3800 BC in Mesopotamia the land between the two rivers Tigris and Euphrates, and arrived at a sudden end in 2024 BC when it was devastated by a dangerous radioactive cloud brought by easterly breezes from the Sinai peninsula, where as indicated by some ancient records an atomic war occurred. The gigantic dark scar on the Earth in the south-eastern part of the Sinai peninsula, and the darkened stones that hint at being in a flash softened by extraordinary heat. There is more proof, Higher than typical levels of radioactivity have been found in the Dead Sea, the site of Sodom and Gomorrah have been nuked at the same time. What's more, And in the land of Sumer itself a

current report has discovered that around the season of the obliteration of Sumer, there was a sudden environmental change there, the nature of which is predictable with an atomic aftermath. The date recommended by the examination is the same 2024 BC given by Sitchin. The Sumerian human advancement vanished around 2000 BC, similarly as all of a sudden as it showed up. Unmistakably its fall was extremely disastrous a number of Sumerian writings have been discovered bewailing the demolition and destruction of different Sumerian urban areas. All these grievance writings accuse the annihilation on the utilization of a few "Weapons of Terror" and some incredible savage cloud. The detailed descriptions of their effects leave no doubt that the Weapons of Terror were nuclear weapons. It is likewise the narrative of Sodom and Gomorrah. Incorporated into this book is proof of an ancient war that took place in the past, this book is unlike any you have read previously.
