Nikki McClure's beautifully detailed illustrations divide this lovely baby journal into sections celebrating the first 1,000 days of life, from the story of birth to jumping into her first mud puddle. Modeled after the journal the author started when her son was born, the sections focus on recording a child's interaction with the natural world, including baby's first tree, moon, and garden.

This sweet-as-can-be baby book offers dozens of creative ways to capture the milestones and special memories from pregnancy through baby's first year: an envelope for ultrasound scans, a spin-wheel to display baby's astrological sign, a gatefold family tree, space for photos, mini envelopes to stash written notes, illustrated pop-ups, a pull-out growth chart to display in baby's room, and more. Packaged in a compact album with a fabric spine and foil-stamped cover, with whimsical color illustrations and thoughtful prompts throughout, this book is the ultimate keepsake for new parents.

Ask any mother and she will tell you there are just not enough hours in the day. By the time she has fed, clothed, and bathed the children, read Curious George for the 100th time, cut the crusts off the PB&J sandwiches, and removed the ground-in dirt from the play clothes, she does not have time to create a detailed scrapbook of each of her children's lives. It's no wonder that so many elaborate baby books remain incomplete, their pristine pages adding to the guilt and inadequacy that many moms already feel. That is why The Mommy Journal is so perfect for today's moms. It offers a quick and guilt-free way to record the special moments of childhood. Space for each entry is only about three inches long and undated, so there is no pressure to write lengthy narratives or to journal every day. In less than five minutes, mothers can quickly jot down the moments they want to remember forever. Plus, unlike traditional baby books, The Mommy Journal lets mothers record memories of all their children in one place. Charming illustrations of toys, hearts, and animals grace each page. Every few pages contain a bit of parenting wisdom such as, "The best thing you can give children next to good habits are good memories." Instructions for fun activities moms can do with their children, such as make edible finger paint from instant pudding, are included as well. The Mommy Journal will become a treasured keepsake, both for the mom who creates it and for the child who receives this precious record of childhood.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.
