This book describes an approach to engineering education that integrates a comprehensive set of personal, interpersonal, and professional engineering skills with engineering disciplinary knowledge in order to prepare innovative and entrepreneurial engineers. The education of engineers is set in the context of engineering practice, that is, Conceiving, Designing, Implementing, and Operating (CDIO) through the entire lifecycle of engineering processes, products, and systems. The book is both a description of the development and implementation of the CDIO model and a guide to engineering programs worldwide that seek to improve the education of young engineers.

This classic work on the nature of early Islamic art has now been brought up to date in order to take into consideration material that has recently come to light. In a new chapter, Oleg Grabar develops alternate models for the formation of Islamic art, tightens its chronology, and discusses its implications for the contemporary art of the Muslim world. Reviews of the first edition: "Grabar examines the possible ramifications of sociological, economic, historical, psychological, ecological, and archaeological influences upon the art of Islam. . . [He] explains that Islamic art is woven from the threads of an Eastern, Oriental tradition and the hardy, surviving strands of Classical style, and [he] illustrates this web by means of a variety of convincing and well-chosen examples."--Art Bulletin "A book of absorbing interest and immense erudition. . . All Islamic archaeologists and scholars will thank Professor Grabar for a profound and original study of an immense and complex field, which may provoke controversy but must impress by its mastery and charm by its modesty."--Times Literary Supplement "Oleg Grabar, in this book of exceptional subtlety and taste, surveys and extends his own important contributions to the study of early Islamic art history and works out an original and imaginative approach to the elusive and complex problems of understanding Islamic art."--American Historical Review

Learning from the Wounded: The Civil War and the Rise of American Medical Science  
In this collection of real-life, personal narratives on the theme of language and globalization, scholars from a range of different sub-disciplines of linguistics, time periods, and geographical spaces throughout the world examine the interaction and intersectionality of languages and globalization and the implications of such interactions for world languages and cultures. A feature of the book is the application of autoethnography as its underlying approach/method, in which contributors draw on their own lived experiences (of life, scholarship, and work) to investigate and reflect on linguistic globalization and its issues and challenges

against the backdrop of the globalized world of the 21st century.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

This book explores native-speakerism in modern language teaching, and examines the ways in which it has been both resilient and critiqued. It provides a range of conceptual tools to situate ideological discourses and processes within educational contexts. In turn, it discusses the interdiscursive nature of ideologies and the complex ways in which ideologies influence objective and material realities, including hiring practices and, more broadly speaking, unequal distributions of power and resources. In closing, it considers why the diffusion and consumption of ideological discourses seem to persist, despite ongoing critical engagement by researchers and practitioners, and proposes alternative paradigms aimed at overcoming the problems posed by the native-speaker model in foreign language education.

This book explores the ways and means by which English threatens the vitality and diversity of other languages and cultures in the modern world. Using the metaphor of the Hydra monster from ancient Greek mythology, it explores the use and misuse of English in a wide range of contexts, revealing how the dominance of English is being confronted and counteracted around the globe. The authors explore the language policy challenges for governments and education systems at all levels, and show how changing the role of English can lead to greater success in education for a larger proportion of children. Through personal accounts, poems, essays and case studies, the book calls for greater efforts to ensure the maintenance of the world's linguistic and cultural diversity.

The Handbook of Technology and Second Language Teaching and Learning presents a comprehensive exploration of the impact of technology on the field of second language learning. The rapidly evolving language-technology interface has propelled dramatic changes in, and increased opportunities for, second language teaching and learning. Its influence has been felt no less keenly in the approaches and methods of assessing learners' language and researching language teaching and learning. Contributions from a team of international scholars make up the Handbook consisting of four parts: language teaching and learning through technology; the technology-pedagogy interface; technology for L2 assessment; and research and development of technology for language learning. It considers how technology assists in all areas of language development, the emergence of pedagogy at the intersection of language and technology, technology in language assessment, and major research issues in research and development of technologies for language learning. It covers all aspects of language including grammar, vocabulary, reading, writing, listening, speaking, pragmatics, and intercultural learning, as well as new pedagogical and assessment approaches, and new ways of conceiving and conducting research and development. The Handbook of Technology and Second Language Teaching and Learning demonstrates the extensive, multifaceted implications of technology for language teachers, learners, materials-developers, and researchers.

Accounting is the discipline with the oldest historical culture, being the first to be recognized by humanity when Adam and Eve were made to account for what they did in paradise. It is also the only discipline that will come into play in the Hereafter, where everybody would be raised up as an accountant - to account for all they have done during their life time on earth!

Accounting is a service-providing discipline, with a rich theoretical background, which makes available information (especially financial) to guide various decision-making processes.

Business owners, creditors, managers, prospective investors, government and its agencies, employees and even the general public seek accounting information to guide them when taking various informed decisions about reporting entities and the environment within which they operate. This book addresses the historical accounting culture, its theories as well as its practices. It is made up of fifteen chapters, covering various historical, theoretical and practical

aspects of Accounting, ranging from accounting standardization to financial reporting. The book is an attempt to address some of the lacunae in advanced accounting issues, both in theory and in practice. Students of advanced accounting theory and practice at the professional and academic levels in Universities, Polytechnics and Professional Institutes would find the book an essential companion.

Presents definitions for over 35,000 entries and includes some 3,000 illustrations. Globalization, the Internet and an era of mass travel have combined to produce a world with a language mix on a huge scale. Linguanomics explains this multilingualism in a material, economic and cultural sense. What is the effect of this multilingualism on society, organizations and individuals? What are the economic benefits and drawbacks? Should we invest in language skills? Should there be interventionist policies, and if so, at what level? Should there be a global lingua mundi? The debate surrounding multilingualism is often clouded by emotion and misconception. With an analysis devoid of rhetoric, Gabrielle Hogan-Brun takes an objective look at this charged area. The result is *Linganomics*: a major step towards a clearer understanding of the market potential of multilingualism, its benefits, costs and points of contention. Asking significant questions of profound concern to the future of global collaboration, *Linganomics* is an essential guide to students, teachers, policy makers and politicians and anyone who cares about the role of language in the modern world. In South Korea, English is a language of utmost importance, sought with an unprecedented zeal as an indispensable commodity in education, business, popular culture, and national policy. This book investigates how the status of English as a hegemonic language in South Korea is constructed through the mediation of language ideologies in local discourse. Adopting the framework of language ideology and its current developments, it is argued that English in Korean society is a subject of deep-rooted ambiguities, with multiple and sometimes conflicting ideologies coexisting within a tension-ridden discursive space. The complex ways in which these ideologies are reproduced, contested, and negotiated through specific metalinguistic practices across diverse sites ultimately contribute to a local realization of the global hegemony of English as an international language. Through its insightful analysis of metalinguistic discourse in language policy debates, cross-linguistic humor, television shows, and face-to-face interaction, *The Local Construction of a Global Language* makes an original contribution to the study of language and globalization, proposing an innovative analytic approach that bridges the gap between the investigation of large-scale global forces and the study of micro-level discourse practices.

*Language and Neoliberalism* examines the ways in which neoliberalism, or the ideology of market rule, finds expression in language. In this groundbreaking original study, Holborow shows at once the misleading character of ideological meaning and the underlying social reality from which that meaning emerges. In universities, it is now the norm to use terms like entrepreneurial and business partnerships. How have these terms become a core component of education and gained such force? Markets have become, metaphorically, a power in their own right. They now tell governments how to act and warn them against too much public spending. Post-crash, the capitalist market continues to be crisis-prone, and in that context the neoliberal ideology remains contested. Free of jargon and assuming no specialist knowledge, this book will strike a chord internationally by showing how neoliberal ideology has, literally, gone global in language. Drawing on Vološinov and Bakhtin, Williams and Gramsci, and introducing concepts from Marxist political economy, *Language and Neoliberalism* is essential reading for all interested in the intersection of linguistics/applied linguistics and politics. In his own lifetime Alessandro Moreschi (1858-1922) was known as the “Angel of Rome”. He was the last surviving castrato singer of the Sistine Chapel choir, and the only one of the castrati whose voice survives in any solo recording. The ethereal, haunting quality of his voice hints at why this extraordinary sound was so highly prized for centuries in the opera houses of Europe. The castrato tradition became established in Italy in the late 16th century, when Pope Clement VIII gave it his sanction. By the 17th century the castrati had moved onto the secular operatic stage, where they were feted as the “pop stars” of their day. Few “normal” singers, male or female, came close to matching their fame and success. But by the 19th century their continued existence had become an embarrassment, and when Moreschi joined the Sistine Chapel in 1883, there were only six castrati left in the choir, and by 1903 they were officially no more. The strange and lonely life of Alessandro Moreschi was lived in the shadows of great events and great institutions, his personality glimpsed only by inference and allusion. Written by an acclaimed musicologist, who as a counter-tenor has performed much of the repertoire written for castrati, this is a perceptive and informed study of the last survivor of a perennially intriguing part of Western cultural history.
