This book presents a detailed, thorough, and comprehensive discussion of effective curriculum and instructional planning that leads to student success. Coaching rubrics facilitate implementation of the content so that teachers can improve their productivity.

Teachers Today Must Wear Many Hats! Professional and subject knowledge has long been part of the teacher education curriculum. However, skill training in the areas of selling, acting, managing and developing appears to have been overlooked in most programs. Research has shown that some of our best teachers are accomplished SELLERS! They are skilled in selling their subjects to students. Like good sales people successful teachers will know their audience, plan the campaign accordingly, and then motivate students to buy into their product, which is education! Selling for Teachers will contribute to the professional development of both new and experienced teachers by providing training in the selling skills that are desired. Complete Teacher Handbooks To help meet the needs of both new and experienced teachers, we now offer a series of interactive eTextbooks. These include: Selling Skills for Teachers Developing Skills for Teachers Managing Skills for Teachers Acting Skills for Teachers Skill acquisition for each of the above-mentioned titles is performance-based and evaluation is criterion-referenced. Both teachers and teacher wannabes will benefit from the use of these very practical, self-study materials. Together with professional and subject knowledge instruction, these titles should help to provide a more realistic approach for delivering practical training in the complete praxis of teaching. Selling Skills for Teachers runs on all tablets, smartphones and computers. This eTextbook can be downloaded at our newly designed web site -- www.completeteacher.com

An inside look at America's most controversial charter schools, and the moral and political questions around public education and school choice. The promise of public education is excellence for all. But that promise has seldom been kept for low-income children of color in America. In *How the Other Half Learns*, teacher and education journalist Robert Pondiscio focuses on Success Academy, the network of controversial charter schools in New York City founded by Eva Moskowitz, who has created something unprecedented in American education: a way for large numbers of engaged and ambitious low-income families of color to get an education for their children that equals and even exceeds what wealthy families take for granted. Her results are astonishing, her methods unorthodox. Decades of well-intended efforts to improve our schools and close the "achievement gap" have set equity and excellence at war with each other: If you are wealthy, with the means to pay private school tuition or move to an affluent community, you can get your child into an excellent school. But if you are poor and black or brown, you have to settle for "equity" and a lecture--about fairness. About the need to be patient. And about how school choice for you only damages public schools for everyone else. Thousands of parents have chosen Success Academy, and thousands more sit on waiting lists to get in. But Moskowitz herself admits Success Academy "is not for everyone," and this raises uncomfortable questions we'd rather not ask, let alone answer: What if the price of giving a first-rate education to children least likely to receive it means acknowledging that you can't do it for everyone? What if some problems are just too hard for schools alone to solve?

Easy, inexpensive, fun ways to celebrate students' writing.

We constantly hear cries from politicians for teachers to have high expectations. But what this means in practical terms is never spelled out. Simply deciding that as a teacher you will expect all your students to achieve more than other classes you have taught in the same school, is not going to translate automatically into enhanced achievement for students. *Becoming a High Expectation Teacher* is a book that every education student, training or practising teacher, should read. It details the beliefs and practices of high expectation teachers – teachers who have high expectations for all their students – and provides practical examples for teachers of how to change classrooms into ones in which all students are expected to learn at much higher levels than teachers may previously have thought possible. It shows how student achievement can be raised by providing both research evidence and practical examples. This book is based on the first ever intervention study in the teacher expectation area, designed to change teachers' expectations through introducing them to the beliefs and practices of high expectation teachers. A holistic view of the classroom is emphasised whereby both the instructional and socio-emotional aspects of the classroom are considered if teachers are to increase student achievement. There is a focus on high expectation teachers, those who have high expectations for all students, and a close examination of what it is that these teachers do in their classrooms that mean that their students make very large learning gains each year. *Becoming a High Expectation Teacher* explores three key areas in which what high expectation teachers do differs substantially from what other teachers do: the way they group students for learning, the way they create a

caring classroom community, and the way in which they use goalsetting to motivate students, to promote student autonomy and to promote mastery learning. Areas covered include:- Formation of teacher expectations Teacher personality and expectation Ability grouping and goal setting Enhancing class climate Sustaining high expectations for students Becoming a High Expectation Teacher is an essential read for any researcher, student, trainee or practicing teacher who cares passionately about the teacher-student relationship and about raising expectations and student achievement.

This book introduces readers to the principles of a fairly new branch of psychology – positive psychology – and demonstrates how they can be applied in the context of second language acquisition in a natural environment and in instructed foreign language (FL) learning. It focuses both on the well-being and success of the learner and the professional and personal well-being of the teacher. Further, the book stresses the importance of the positive emotions and character strengths of those involved in the process of language learning and teaching, as well as the significant role played by enabling institutions such as school and, at the micro-level, individual FL classes.

When teacher evaluations are fair, everyone wins. Poor evaluation systems don't just hurt teachers—they hurt students, too. That's why America can't afford to wait for the teacher-evaluation problem to be solved. To provide balanced, accurate, and rigorous evaluations that take into account each teacher's particular circumstances, only one system can work: evidence-governed collegial judgment. This book includes: A discussion of common evaluation systems, including testing, value-added models, and observations Analysis of federal guidelines and state responses Action steps teachers and school leaders can take to influence policy A clear rationale and strategies for implementing a teacher evaluation model based on human judgment Educators play a significant role in the intellectual and social development of children and young adults. Next-generation teachers can only be as strong as their own educational foundation which serves to cultivate their knowledge of the learning process, uncover best practices in the field of education, and employ leadership abilities that will inspire students of all ages. Teacher Education: Concepts, Methodologies, Tools, and Applications explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. China has attached great importance to teaching students to become proficient users of English. Yet, despite a plethora of studies and practice on Chinese ESL/EFL (English as a second/foreign language) learners, the large student population, its complicated composition and the complex nature of second and foreign language learning have rendered it difficult to offer a panoramic view on ESL/EFL teaching and learning of Chinese learners. This book provides a new and up-to-date perspective on the teaching and learning of Chinese ESL/EFL learners. The book collects 15 case studies, falling into two parts—Curriculum Development and Teaching Practice and Skills-Based Research. The collected studies deploy qualitative, quantitative or mixed methods to explore patterns, features, developments and causes and effects of a variety of issues in the sphere of ESL/EFL teaching and learning. Moreover, the cases offer insights that are relevant beyond the mainland Chinese context such as Hong Kong, Macau, Britain and Australia. Students and scholars of TESOL and applied linguistics will be interested in this title.

Whether you are practicing in an in-patient or an out-patient facility, academic institution, or clinical residency program, this well-respected handbook gives you the background and guidance you need to effectively educate individuals across the continuum of physical therapy practice. Practical, real-life examples show you how to: incorporate health literacy and needs of the learner; assess and adapt to the various learning styles of patients; use simulations in education; facilitate the development of clinical reasoning skills; and assess learning outcomes and the effectiveness of your teaching. Plus, four all-new chapters and major revisions of all content throughout the book keep you on top of the latest research and best practices. Coverage of the theory and application of educational principles across the continuum of PT practice provides the information you need to improve your skills in the educational process both in academic and clinical settings. Two section format divides content into two parts: designing academic and clinical education programs and teaching students in academic and clinical settings; and teaching patients and families in clinical and community settings. Variety of teaching and teaching assessment methods expands your teaching, learning, and assessment repertoires. Case stories at the beginning of each chapter allow you to see the relevance of the information in the chapter. Threshold concepts highlight key ideas that are important to know. Annotated bibliography at end of each chapter provides resources for further study. NEW! Chapter on Authentic Assessment: Simulation-Based Education reflects the new ways to facilitate student learning through the use of human simulation models. NEW! Chapter on Strategies for Planning and Implementing Interprofessional Education covers the fundamental concepts of team-based care and interprofessional learning. NEW! Chapter on What Makes a Good Clinical Teacher? translates current research on clinical teaching into clinical education and practice. NEW! Chapter on Facilitating the Teaching and Learning of Clinical Reasoning helps you apply current research on clinical reasoning in rehabilitation to clinical education and teaching. NEW! Two combined chapters on Patient Education and Health Literacy (previously chapters 8 and 12) and Applied Behavioral Theory and Adherence: Models for Practice (previously chapters 9 and 10) provide focused presentations on current thinking and practical strategies for addressing health literacy issues in the clinical environment. NEW! Expanded chapter on Post-Professional Clinical Residency and Fellowship Education offers more information on models and trends in residency education and mentoring.
