This book is a groundbreaking volume that will provide informed, balanced yet frank discussion of U.S. workplace diversity and diversity resistance issues. The chapters in this book put a name on behaviors and practices that have existed in the workplace for a long time, yet until recently have had no name. Further, the majority of the chapters innovatively link existing psychological and organizational factors such as fear, uncertainty, power, emotions and organizational change and development. The book editors and authors emphasize that we need to know more about diversity resistance, both in overt and covert forms. To guide us, we can draw on existing research and practice literature that have both theoretical and empirical depth. The book is appropriate for undergraduate and graduate students in industrial and organizational psychology, human resources management, diversity management, sociology of work, organizational change, and cultural diversity within organizations. It provides a central resource for classes on prejudice and discrimination in organizations, emotions at work, personnel psychology, strategic human resources management and cultural issues in human resources management. Professionals and practitioners who increasingly interact with diverse employees will find this book essential to their work

The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

The illustrated Workbook contains exercises that provide additional practice and reinforcement of language concepts and skills from the Summit Student's Book and its Grammar Booster. A two-level high-intermediate/advanced course, Summit is the perfect next step for learners who have completed a beginning to intermediate level course. Summit develops competence and confidence in all four skills.

An inside look at America's most controversial charter schools, and the moral and political questions around public education and school choice. The promise of public education is excellence for all. But that promise has seldom been kept for low-income children of color in America. In How the Other Half Learns, teacher and education journalist Robert Pondiscio focuses on Success Academy, the network of controversial charter schools in New York City founded by Eva Moskowitz, who has created something unprecedented in American education: a way for large numbers of engaged and ambitious low-income families of color to get an education for their children that equals and even exceeds what wealthy families take for granted. Her results are astonishing, her methods unorthodox. Decades of well-intended efforts to improve our schools and close the "achievement gap" have set equity and excellence at war with each other: If you are wealthy, with the means to pay private school tuition or move to an affluent community, you can get your child into an excellent school. But if you are poor and black or brown, you have to settle for "equity" and a lecture--about fairness. About the need to be patient. And about how school choice for you only damages public schools for everyone else. Thousands of parents have chosen Success Academy, and thousands more sit on waiting lists to get in. But Moskowitz herself admits Success Academy "is not for everyone," and this raises uncomfortable questions

we'd rather not ask, let alone answer: What if the price of giving a first-rate education to children least likely to receive it means acknowledging that you can't do it for everyone? What if some problems are just too hard for schools alone to solve?
