X-Ray mammography is the most valuable imaging technique used in the detection and evaluation of breast disease. This title is intended to provide radiologists in-training and in practice with a practical guide to the acquisition, identification and interpretation of mammograms as well as adjunctive modalities such as ultrasound, FNA cytology, MRI and digital imaging. 400 high quality images provide the reader with a comprehensive guide to the radiologic indications of benign and malignant breast disease. The book also provides an overview of the crucial prerequisites for a successful breast cancer detection programme by integrating the imaging modalities with technical and quality control issues, epidemiologic data, and risk/benefit analysis.

This volume (5116) of Springer's Lecture Notes in Computer Science contains the th proceedings of the 9 International Workshop on Digital Mammography (IWDM) which was held July 20 – 23, 2008 in Tucson, AZ in the USA. The IWDM meetings traditionally bring together a diverse set of researchers (physicists, mathematicians, computer scientists, engineers), clinicians (radiologists, surgeons) and representatives of industry, who are jointly committed to developing technologies to support clinicians in the early detection and subsequent patient management of breast cancer. The IWDM conference series was initiated at a 1993 meeting of the SPIE Medical Imaging Symposium in San Jose, CA, with subsequent meetings hosted every two years at sites around the world. Previous meetings were held in York, England; Chicago, IL USA; Nijmegen, Netherlands; Toronto, Canada; Bremen, Germany; Durham, NC USA and Manchester, UK. th The 9 IWDM meeting was attended by a very international group of participants, and during the two and one-half days of scientific sessions there were 70 oral presentations, 34 posters and 3 keynote addresses. The three keynote speakers discussed some of the "hot" topics in breast imaging today. Karen Lindfors spoke on "Dedicated Breast CT: Initial Clinical Experiences." Elizabeth Rafferty asked the question is "Breast Tomosynthesis: Ready for Prime Time?" Finally, Martin Tornai discussed "3D Multi-Modality Molecular Breast Imaging.

Instrumentation and automatic control systems.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

Present trends indicate that in the years to come transnational science, whether basic or applied and involving persons, equipment or funding, will grow considerably. The main purpose of this volume is to try to understand the reasons for this denationalization of science, its historical contexts and its social forms. The Introduction to the volume sets out the socio-political, intellectual, and economic contexts for the nationalization and denationalization of the sciences, processes that have extended over four centuries. The articles examine the specific conditions that have given rise to the growth of transnational science in the 20th century. Among these are: the need for cognitive and technical standardization of scientific knowledge-products, pressure toward cost-sharing of large installations such as CERN, the voluntary and involuntary migration of scientists, and the global market for R&D products that has emerged at the end of the century. The volume raises many new questions for research by historians and sociologists of science and poses problems that are of concern both to scientists and science policy-makers.

Proceedings of the VIIth International Conference held in Lindau, Germany, May 4-8, 1998

Includes section: Cosmetic & fragrance retailing, a "magazine-within-a-magazine."

With more than eighteen thousand capsule film reviews and three hundred new entries, this updated version of this classic movie and video guide offers readers a comprehensive reference to the world of film, including more than six thousand DVD titles, along with valuable information on performers, ratings, running times, and helpful features. Original.
