Geological Journeys: a traveller's guide to South Africa's rocks and landforms is an essential companion for car journeys. How often have we wondered about the jaunty tilt of a mountain ahead, the unusual patterns of a road cutting, the colour and texture of the roadside soil, or the purpose of a distant minehead? This handy volume offers answers and explanations about features along all the major routes across South Africa, and some of the lesser, but geologically interesting, routes too. Also included are the three main metropolitan areas - Johannesburg, Cape Town and Durban - so that city r.

Annotation World Bank Living Standards Measurement Study No. 112. Assesses evidence of a negative correlation between the number of children born and levels of child schooling by examining their determinants. In many developing countries, as parents have fewer children, they invest more in the health, education, and welfare of each child. This "quantity-quality tradeoff" is vividly illustrated in the recent economic development of Southeast Asia and Latin America. In Sub-Saharan Africa, however, the existence of such a tradeoff has not been established. The few studies conducted to date reveal either no correlation or a slightly positive one, whereby higher fertility rates are linked to greater schooling per child. This study examines the determinants of fertility and of child schooling in C te d'Ivoire and Ghana to assess evidence of a tradeoff, using data from three surveys conducted between 1985 and 1987. The results are mixed. In C te d'Ivoire, there is

evidence of such a tradeoff in urban areas but not rural ones. In urban areas, female schooling, higher income, and improved child survival are associated with lower fertility and higher child schooling. In both rural and urban areas of Ghana, there is a tradeoff between fertility and child schooling with higher incomes, and, in rural Ghana, with increases in mothers' schooling. This book is divided into three sections. Entitled Critical Harm Reduction Policy: From Oppositional Social Movement to Institutionalised Public Health Policy, Part One encompasses a diverse array of issues relating to the cost/benefit analysis of harm reduction as measured in the terms of institutionalisation and (de-)politicisation. Part Two, Critical Harm Reduction Practice: Autonomy, Ideology, and Evidence-Based Interventions, consists of several concrete case studies concerning harm reduction practice in an array of (non-)traditional contexts. Comprised of a unique series of chapters that each interrogates a different issue relating to the philosophical underpinnings of harm reduction, Part Three is entitled Critical Harm Reduction Theory/Philosophy: Depoliticisation, Direct Action, and Drug/Service Users Experiential Knowledge. Although the emphasis of each section and corresponding set of chapters is remarkably diverse, several themes remain prominent throughout this book, including an overtly critical analysis of the multiplicity of contextual deployments of harm reduction, a recurring focus on elevating the value of experiential knowledge and the fundamentally important, central role of people with direct lived experience. Additionally, the centrality of direct action tactics in the innovation of user-based forms of harm reduction in policy, practice, and philosophically-based contexts are discussed.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.
