In the last decade, the use of data sciences in the digital marketing environment has increased. Digital marketing has transformed how companies communicate with their customers around the world. The increase in the use of social networks and how users communicate with companies on the internet has given rise to new business models based on the bidirectionality of communication between companies and internet users. Digital marketing, new business models, data-driven approaches, online advertising campaigns, and other digital strategies have gathered user opinions and comments through this new online channel. In this way, companies are beginning to see the digital ecosystem as not only the present but also the future. However, despite these advances, relevant evidence on the measures to improve the management of data sciences in digital marketing remains scarce. Advanced Digital Marketing Strategies in a Data-Driven Era contains high-quality research that presents a holistic overview of the main applications of data sciences to digital marketing and generates insights related to the creation of innovative data mining and knowledge discovery techniques applied to traditional and digital marketing strategies. The book analyzes how companies are adopting these new data-driven methods and how these strategies influence digital marketing. Discussing topics such as digital strategies, social media marketing, big data, marketing analytics, and data sciences, this book is essential for marketers, digital marketers, advertisers, brand managers, managers, executives, social media analysts, IT specialists, data scientists, students, researchers, and academicians in the field.

Master's Thesis from the year 2011 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: A, The University of Liverpool, language: English, abstract: Marketing has always been one of the most crucial and critical functions in organizations for last several decades. Since several years, organizations have been depending on various marketing methods to promote products, services and brands. As time passes, the types of marketing strategies that are considered for have changed. Techniques that were used in 1950s shall not be helpful for organizations that operate in today's environment. In the same way, techniques that are currently used in today's environment shall not be useful after 50 to 60 years (Kotler and Keller, 2012). Unless marketing activities are planned based on present market conditions, it is not possible for organizations to reach wide-range of customers that spread across the world. As there are no boundaries in the target markets of most of the organizations, organizations have to use the combination of both traditional and online marketing methods. While traditional marketing methods such as print, radio or television marketing primarily restricted to tap domestic customers, it is online marketing strategy that helps organizations to reach customers, who spread across the world, with minimum marketing budget. Online marketing is the process of sending marketing communications and advertising messages to customers through various methods that used over internet. Internet marketing forms a wide-range of techniques such as search engine marketing, social media marketing, email marketing, affiliate marketing, blog marketing, and buzz marketing etc. As per the recent report revealed by Internet Advertising Bureau in 2009, the revenues of online ad sellers have increased to \$21 Billion. The global online advertising spending in 2001 was around \$82 Billion and it is expected to grow 12-14% every year to reach \$132 Billion by 2015 (Miller and Washington, 2012). Organizations use numerous of techniques that fall under online marketing techniques to market products and to reach potential customers. Moreover, in today's environment, organizations are focusing on techniques that help in reducing the cost in every aspect.

A powerful call to action, Customer Centricity upends some of our most fundamental beliefs

about customer service, customer relationship management, and customer lifetime value. Despite what the old adage says, the customer is not always right. Even companies that can seemingly do no wrong—like the coffeehouse giant Starbucks—have only recently started to figure this out. Starbucks is one of many companies that has successfully executed a pivot that puts the company in a customer-centric mindset, an approach that Wharton professor Peter Fader describes in *Customer Centricity*. Fader advocates that in the world of customer centricity, there are good customers ... and then there is pretty much everybody else. In a new preface and afterword to *Customer Centricity*, Fader reflects on how the landscape has changed over nearly a decade since he first proposed that businesses radically rethink how they relate to customers. Using examples from Starbucks, Nordstrom, and more, Fader provides insights to help you understand: Why customer centricity is the new model for success in today's data-driven environment. How the ideas of brand equity and customer asset value help us understand what kinds of companies naturally lend themselves to the customer-centric model and which ones don't; Why the traditional models for determining the value of individual customers are flawed; How executives can use customer lifetime value (CLV) and other customer-centric data to make smarter decisions about their companies; How the well-intended idea of customer relationship management (CRM) lost its way—and how your company can properly put CRM to use; How customer centricity will help you realign your performance metrics, product development, customer relationship management and organization to make sure you focus directly on the needs of your most valuable customers and increase profits for the long term. ALSO AVAILABLE: Once Fader convinces you of the value of customer centricity in this book, *The Customer Centricity Playbook*, with Sarah Toms, will show you where to get started to bring it to the forefront of your organization.
