The primary conspiracy of the late 20th century.

This guide to 45 great hikes on Oahu includes 2 new trips in the inland rainforests of Kailua and Waimanalo. Explore the beaches, cliffs, and rainforests, and learn about native plants, Hawaiian history, and local mythology.

Smearred by cheap innuendo and false accusations alleging he is responsible for having allowed a bomb aboard Pan Am 103, Micheal T. Hurley, career law enforcement veteran, faces a dilemma as real as his lifetime savings: bet everything that truth would win out in a court of law or just surrender to that which he knows to be wrong. Succumb or fight? Capitulate or resist? I Solemnly Swear captures his answer to that dilemma and presents a diverse group of heroes and traitors, lawmen and outlaws, the innocent and the guilty who bounce between Seattle, Larnaca, London, Washington, DC, Frankfurt, and Fort Lauderdale. In an international game of cat and mouse, Hurley spends his last three years as a DEA Supervisory Special Agent being jerked around by a media that is all too willing to criticize the US Government and to mar Hurley's reputation as a competent international narcotics agent.

This is his story.

Charges that the 1988 bombing of Pan Am Flight 103 over Lockerbie, Scotland, was the result of a drug smuggling operation managed by the U.S. Drug Enforcement Agency and the CIA, covered up by the U.S. and British governments. IP.

This book is about an octopus that has a dream to play in a band of his own. After a tragic event, he is met upon by an old sea snail that guides and encourages the octopus to follow his golden trail as he takes him on a journey to fulfil his hopes and dreams. The trail represents the journey of life and the snail represents his mentor or guardian angel. A fun approach to help educate children to follow their dreams and not to give up on what they truly desire, no matter what obstacles may come their way, as life takes them on a journey of ups and downs. It also indicates the forming of friendship and relationships that are made along their life's journey, while working together as a team. Life is just a journey!

“A pleasant, chatty book on a fascinating subject.” — Kirkus Reviews Octopuses have been captivating humans for as long as we have been catching them. Yet for all of our ancient fascination and modern research, we still have not been able to get a firm grasp on these enigmatic creatures. Katherine Harmon Courage dives into the mystifying underwater world of the octopus and reports on her research around the world. She reveals, for instance, that the oldest known octopus lived before the first dinosaurs; that two thirds of an octopus's brain capacity is spread throughout its arms, meaning each literally has a mind of its own; and that it can change colors within milliseconds to camouflage itself, yet appears to be colorblind.

Octopuses have captivated people's imagination for centuries. Young readers will be intrigued to discover how these tentacled animals move through water, how they hunt, how they use camouflage and other protection measures, and why octopuses are importance in oceans around the world.

in Europe in this rollicking celebration of the Greek table. He explores the traditions and history behind eight elements of Greek cuisine—olives, bread, fish, cheese, beans, wine, meat, and honey—and journeys through the country searching for the best examples of each. He picks olives on Thasos, bakes bread on Crete, eats thyme honey from Kythira with one of Greece's greatest poets, and learns why Naxos is the best place for cheese in the Cyclades. Working with local cooks and artisans, he offers an intimate look at traditional village life, while honoring the conversations, friendships, and leisurely ceremonies of dining around which Hellenic culture has revolved for thousands of years. A hymn to slow food and to seasonal and sustainable cuisine, *Honey, Olives, Octopus* is a lyrical celebration of Greece, where such concepts have always been a simple part of living and eating well.

An NPR Best Book of 2018! Some people can do their homework. Some people get to have crushes on boys. Some people have other things they've got to do. Seventh-grader Zoey has her hands full as she takes care of her much younger siblings after school every day while her mom works her shift at the pizza parlor. Not that her mom seems to appreciate it. At least there's Lenny, her mom's boyfriend—they all get to live in his nice, clean trailer. At school, Zoey tries to stay under the radar. Her only friend Fuchsia has her own issues, and since they're in an entirely different world than the rich kids, it's best if no one notices them. Zoey thinks how much easier everything would be if she were an octopus: eight arms to do eight things at once. Incredible camouflage ability and steady, unblinking vision. Powerful protective defenses. Unfortunately, she's not totally invisible, and one of her teachers forces her to join the debate club. Even though Zoey resists participating, debate ultimately leads her to see things in a new way: her mom's relationship with Lenny, Fuchsia's situation, and her own place in this town of people who think they're better than her. Can Zoey find the courage to speak up, even if it means risking the most stable home she's ever had? This moving debut novel explores the cultural divides around class and the gun debate through the eyes of one girl, living on the edges of society, trying to find her way forward.

"fascinating...touching...informative...entertaining" (Daily Beast) book explores the emotional and physical world of the octopus—a surprisingly complex, intelligent, and spirited creature—and the remarkable connections it makes with humans. In pursuit of the wild, solitary, predatory octopus, popular naturalist Sy Montgomery has practiced true immersion journalism. From New England aquarium tanks to the reefs of French Polynesia and the Gulf of Mexico, she has befriended octopuses with strikingly different personalities—gentle Athena, assertive Octavia, curious Kali, and joyful Karma. Each creature shows her cleverness in myriad ways: escaping enclosures like an orangutan; jetting water to bounce balls; and endlessly tricking companions with multiple "sleights of hand" to get food. Scientists have only recently accepted the intelligence of dogs, birds, and chimpanzees but now are watching octopuses solve problems and are trying to decipher the meaning of the animal's color-changing techniques. With her "joyful passion for these intelligent and fascinating creatures" (Library Journal Editors' Spring Pick), Montgomery chronicles the growing appreciation of this mollusk as she tells a unique love story. By turns funny, entertaining, touching, and profound, *The Soul of an Octopus* reveals what octopuses can teach us about the meeting of two very different minds.

sinks to the bottom of San Francisco Bay. By the time divers find the wreck, the cash is gone and the driver has vanished. The police are convinced it's an inside job, but local merchant Vera Young, whose boyfriend drove the armored car, claims it was much more than a simple heist. Vera swears the missing driver is innocent and wants him found before the police can throw him in jail. Private investigator Cape Weathers reluctantly takes the case but warns Vera that her boyfriend is likely guilty-or dead. What starts as a manhunt uncovers a criminal conspiracy of money laundering, illegal drug testing, and a network of corporations willing to do anything to protect their stock price. It's a case that Cape can't get his arms around, and his relationship with Vera is getting complicated while the list of people who want him dead is getting longer. *Boxing The Octopus* is a runaway tour of San Francisco's underworld which reminds us that when things get out of hand, having eight arms is always better than two.

*Shark and Octopus* is a comic caper telling the story of Griffin Gilmore, whose unique profession is retrieving items of value without anyone realizing they were ever missing. Griffin's been hired to steal a key in a museum exhibit and replace it with a lookalike key. As he grabs the key Griffin fears he has set off the museum alarm, but all he hears is that sweet, sweet sound of silence. A man dressed entirely in white arrives and takes the key. Griffin can't let this go. He learns the key is to the dungeon of an Italian castle, but the dungeon is empty. Who is this man and why does he want that key? Helping Griffin are Kit Covington, his best friend since kindergarten and a top ten lister of everything; Bobby Lowell, aspiring actor with the skill for uncovering information through his roles; and Annie Knaack, Griffin's girlfriend, calm

where he is impatient, sweet when he is sarcastic. Griffin is brilliant but undisciplined; restraint is not in his skill set. He's persistent and above all loyal to his friends. Griffin discovers that a former member of the Nazi's Special Task Force for Music covered one wall in a house in Baltimore with a musical score. The notes are a clue, Griffin realizes, to what the man in white is after. A trap is set, with Griffin as the bait. JC Sullivan's writing has appeared in the Wall Street Journal and the Christian Science Monitor as well as literary journals in this country and abroad. He is a lifelong Baltimorean. For more than three decades he has worked as a lawyer but hopes you won't hold that against him. JC has two daughters, Meredith and Kira. Here be Kraken! The Squid Cinema From Hell draws upon writers like Vilem Flusser, Donna J. Haraway, Graham Harman and Eugene Thacker to offer up a critical analysis of cephalopods and other tentacular creatures in contemporary media, while also speculating that digital media might themselves constitute a weird, intelligent alien. If this were not enough to shiver ye timbers, the book engages with contemporary discourses of posthumanism, speculative realism, object-oriented ontology and animal studies to suggest that humans are the products of media rather than media being the products of humans. Including case studies of films by Denis Villeneuve, Park Chan-wook and Celine Sciamma, The Squid Cinema From Hell also provides a daring engagement with various media beyond cinema, including literature, music videos, 4DX, advertising, websites, YouTube, Artificial Intelligence and more. Zounds! This unique and Lovecraftian book will change the way you think about, and with, our contemporary, media-saturated world. For as we contemplate the abyss, the abyss looks back at us - and chthulumedias, or media at the end of human times, begin to emerge.

While many fans remember The Lone Ranger, Ace Drummond and others, fewer focus on the facts that serials had their roots in silent film and that many foreign studios also produced serials, though few made it to the United States. The 471 serials and 100 series (continuing productions without the cliffhanger endings) from the United States and 136 serials and 37 series from other countries are included in this comprehensive reference work. Each entry includes title, country of origin, year, studio, number of episodes, running time or number of reels, episode titles, cast, production credits, and a plot synopsis.

With three hearts and blue blood, its gelatinous body unconstrained by jointed limbs or gravity, the octopus seems to be an alien, an inhabitant of another world. It's baggy, boneless body sprouts eight arms covered with thousands of suckers—suckers that can taste as well as feel. The octopus also has the powers of a superhero: it can shape-shift, change color, squirt ink, pour itself through the tiniest of openings, or jet away through the sea faster than a swimmer can follow. But most intriguing of all, octopuses—classed as mollusks, like clams—are remarkably intelligent with quirky personalities. This book, an inquiry into the mind of an intelligent invertebrate, is also a foray into our own unexplored planet. These thinking, feeling creatures can help readers experience and understand our world (and perhaps even life itself) in a new way.

From their heyday in the 1910s to their lingering demise in the 1950s, American film serials delivered excitement in weekly installments for millions of moviegoers, despite minuscule budgets, impossibly tight shooting schedules and the disdain of critics. Early heroines like Pearl White, Helen Holmes and Ruth Roland broke gender barriers and ruled the screen. Through both world wars, such serials as Spy Smasher and Batman were vehicles for propaganda. Smash hits like Flash Gordon and The Lone Ranger demonstrated the enduring mass appeal of the genre. Providing insight into early 20th-century American culture, this book analyzes four decades of productions from Pathe, Universal,

Mascot and Columbia, along with all 66 Republic serials, including The Adventures of Superman and Mysterious Doctor Satan.

A philosopher dons a wet suit and journeys into the depths of consciousness in *Other Minds*. Although mammals and birds are widely regarded as the smartest creatures on earth, it has lately become clear that a very distant branch of the tree of life has also sprouted higher intelligence: the cephalopods, consisting of the squid, the cuttlefish, and above all the octopus. In captivity, octopuses have been known to identify individual human keepers, raid neighboring tanks for food, turn off lightbulbs by spouting jets of water, plug drains, and make daring escapes. How is it that a creature with such gifts evolved through an evolutionary lineage so radically distant from our own? What does it mean that evolution built minds not once but at least twice? The octopus is the closest we will come to meeting an intelligent alien. What can we learn from the encounter? In *Other Minds*, Peter Godfrey-Smith, a distinguished philosopher of science and a skilled scuba diver, tells a bold new story of how subjective experience crept into being—how nature became aware of itself. As Godfrey-Smith stresses, it is a story that largely occurs in the ocean, where animals first appeared. Tracking the mind's fitful development, Godfrey-Smith shows how unruly clumps of seaborne cells began living together and became capable of sensing, acting, and signaling. As these primitive organisms became more entangled with others, they grew more complicated. The first nervous systems evolved, probably in ancient relatives of jellyfish; later on, the cephalopods, which began as inconspicuous mollusks, abandoned their shells and rose above the ocean floor, searching for prey and acquiring the greater intelligence needed to do so. Taking an independent route, mammals and birds later began their own evolutionary journeys. But what kind of intelligence do cephalopods possess? Drawing on the latest scientific research and his own scuba-diving adventures, Godfrey-Smith probes the many mysteries that surround the lineage. How did the octopus, a solitary creature with little social life, become so smart? What is it like to have eight tentacles that are so packed with neurons that they virtually "think for themselves"? What happens when some octopuses abandon their hermit-like ways and congregate, as they do in a unique location off the coast of Australia? By tracing the question of inner life back to its roots and comparing human beings with our most remarkable animal relatives, Godfrey-Smith casts crucial new light on the octopus mind—and on our own.

The world was too bright for Leo. And too loud. "I must be living on the wrong planet," Leo thought. Leo struggles to make sense of the world. He doesn't understand the other children in his class, and they don't seem to understand him. But then one day, Leo meets Maya. Maya is an octopus, and the more Leo learns about her, the more he thinks that perhaps he isn't alone in this world, after all. "The sensitive descriptions throughout the book of what it is like to have autism are accurate and perceptive on so many levels" (Professor Tony Attwood, author of *Asperger's Syndrome: A Guide for Parents and Professionals*).

In the first third of the twentieth century, the publishing industry in the United Kingdom and the United States was marked by well-established and comfortable traditions pursued by family-dominated firms. The British trade was the preserve of self-satisfied men entirely certain of their superiority in the world of letters; their counterparts in North America were blissfully unaware of development and trends outside their borders. In this unique historical analysis, Richard Abel and Gordon Graham show how publishing evolved post-World War II to embrace a different, more culturally inclusive, vision. Unfortunately, even among the learned classes, only a handful clearly understood either the nature or the likely consequences of the mounting geopolitical tensions that gripped pre-war Europe. The world was largely caught up in the ill-informed and unexamined but widely held smug and shallow belief that the huge price paid in "the war to end all wars" had purchased perpetual peace, a peace to be maintained by the numerous, post-war high-minded treaties ceremoniously signed thereafter. The history presented here has as its principals a handful of those who fled to the Anglo-Saxon shores in the pre-World War II era. The remainder made their way to

Britain and the United States following that war. They brought an entirely new vision of and energetic pursuit of the cultural role of the book and journal in a society, a vision which was quickly adopted and naturalized by a perspicacious band of post-war native-born book people. Logos – the international journal of the publishing community – celebrates its 25th anniversary in 2015. Since its first publication it has gained a reputation for publishing insightful and clear-headed articles about publishing, and this tradition continues to the present day, with the addition in recent years of academic articles reflecting the growth in the discipline of publishing studies. The present collection provides the opportunity to mark this milestone in the journal's history by reprinting over thirty articles in book form.

identity through love, hunger, and food. Jim Harrison says, "Trail of Crumbs reminds me of what heavily costumed and concealed waifs we all are. Kim Sunv©e tells us so much about the French that I never learned in 25 trips to Paris, but mostly about the terrors and pleasure of that infinite octopus, love. A fine book." When Kim Sunv©e was three years old, her mother took her to a marketplace, deposited her on a bench with a fistful of food, and promised she'd be right back. Three days later a policeman took the little girl, clutching what was now only a fistful of crumbs, to a police station and told her that she'd been abandoned by her mother. Fast-forward almost 20 years and Kim's life is unrecognizable. Adopted by a young New Orleans couple, she spends her youth as one of only two Asian children in her entire community. At the age of 21, she becomes involved with a famous French businessman and suddenly finds herself living in France, mistress over his houses in Provence and Paris, and stepmother to his eight year-old daughter. Kim takes readers on a lyrical journey from Korea to New Orleans to Paris and, along the way serving forth her favorite recipes. A love story at heart, this memoir is about the search for identity and a book that will appeal to anyone who is passionate about love, food, travel, and the ultimate search for self.
