Updated and revised, with new producers included for 2020, the Guides to Wines

and Top Vineyards are the definitive guides to classic wine-producing regions. This guide discusses the wines of the Northern Rhône, including Cote Rôtie, Hermitage, Crozes-Hermitage, St. Joseph, and Cornas. The guide is divided into two parts. The first part of the guide discusses the regions, and explains the character and range of the wines. The second part profiles the producers. There are detailed profiles of the leading producers, showing how each winemaker interprets the local character, and mini-profiles of other important estates. A hundred producers are profiled. Description of each area includes its geography, the grape varieties that are grown, how these relate to the styles of wines that are produced, wines from entry level to icons, current trends and how styles are evolving. Reference wines are recommended for each region. The guide is illustrated with photographs of each area, topographical maps to show the terrain, road maps to identify the locations of estates, and information on recent vintages. Profiles range from producers who may dominate an appellation to small estates that define the cutting edge. The profiles identify the best of tradition and innovation in the region. Each estate profile describes the producer's aims for his wines, and the personality and philosophy behind them. Reference wines are suggested for each producer, together with essential information for planning a visit, including address and map location, phone and

email contact details, and whether appointments are needed. This Guide is the indispensable means for understanding the Northern Rhône, tasting its wines, and finding the top producers. It is updated regularly to have the latest information.

A new play from an award-winning playwright, published as part of the innovative Abbey Theatre playscript series On the day of her father's funeral, Eva - a young woman - is still haunted by the betrayal she witnessed from her childhood haven - the treehouse in the garden. On the same day another woman, Magda, relives the ghosts of another hiding place and a different betrayal - ghosts from which she still seeks forgiveness. Interweaving lives and secrets Treehouses is a

magical tale of refuge, treachery and of love lost and found.

Organic Chemistry: Mechanistic Patterns is the very first introductory organic chemistry title that holistically focuses on a mechanistic approach; an approach that has proven to achieve a deeper understanding of chemical reactivity. This mechanistic approach to the dynamic world of organic chemistry visualizes reactivity as a collection of patterns in electron movement, making it possible for students to describe why a reaction occurred. Recognizing patterns of electron flow between seemingly different reactions can allow students to predict how a chemical will react, even if they have never seen a particular reaction before. The text takes great care to establish a progression of reactivity, from simple to complex, introducing functional groups as necessary, while focusing on the reaction at hand rather than the various things that each functional group does. To help students further visualize key concepts, the text includes Ghislain Deslongchamps' acclaimed Organic ChemWare; interactive animations and simulations that bring static textbook molecular representations to life. Together, we seek to open students' eyes to the dynamic world of organic chemistry with a more powerful and systematic approach to learning.

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his

parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.

Inspired by Disney Animation Studios' latest film, Moana, this middle grade novel features characters and adventures based on the rich culture of Oceania. It includes original content in the form of mini folktales interspersed throughout the story of the film.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.

where padlocks are engraved with names and attached to bridges in declaration of romantic commitment. This custom became popular in the 2000s, and its dissemination was rapid, geographically unbound, and highly divisive, with love-locks emerging in locations as diverse as Paris and Taiwan; New York and Seoul; Melbourne and Moscow. This book explores the worldwide popularity of the love-lock as a ritual token of love and commitment by considering its history, symbolism, and heritage.

Continuing the heart-pounding, time-bending action of the TimeRiders series, *The Eternal War* brings readers back to a pivotal time period in American history: the Civil War. Only this alternate history is one where a young Abraham Lincoln has somehow followed Liam into the present from 1831, and the entire course of American history has changed. If the TimeRiders can't return Lincoln to the past, the country could be trapped in a dangerous state of never-ending civil war. Can Maddy persuade two colonels on either side of no man's land to cease fire long enough to save the future?

An encouraging account of the potential of foreign aid to reduce poverty and a challenge to all aid organizations to think harder about how they spend their money. With more than a billion people now living on less than a dollar a day, and with eight million dying each year because they are simply too poor to live, most would agree that the problem of global poverty is our greatest moral challenge. The large and pressing

practical question is how best to address that challenge. Although millions of dollars flow to poor countries, the results are often disappointing. In *Making Aid Work*, Abhijit Banerjee—an "aid optimist"—argues that aid has much to contribute, but the lack of analysis about which programs really work causes considerable waste and inefficiency, which in turn fuels unwarranted pessimism about the role of aid in fostering economic development. Banerjee challenges aid donors to do better. Building on the model used to evaluate new drugs before they come on the market, he argues that donors should assess programs with field experiments using randomized trials. In fact, he writes, given the number of such experiments already undertaken, current levels of development assistance could focus entirely on programs with proven records of success in experimental conditions. Responding to his challenge, leaders in the field—including Nicholas Stern, Raymond Offenheiser, Alice Amsden, Ruth Levine, Angus Deaton, and others—question whether randomized trials are the most appropriate way to evaluate success for all programs. They raise broader questions as well, about the importance of aid for economic development and about the kinds of interventions (micro or macro, political or economic) that will lead to real improvements in the lives of poor people around the world. With one in every six people now living in extreme poverty, getting it right is crucial.
