It is 1492 when the discovery of the Americas by Columbus closes out the Middle Ages and sets the stage for the modern history of the New World. While new lands beckon adventure seekers focused on discovery, conquest, and settlement, a few hundred men sent forth by the King of Spain leave on expeditions to explore the new territories and search for gold and power. One of these adventurers, Pedro de Mérida, becomes a conquistador and chronicler of the New World – and one who will ultimately leave a vibrant record of his travels in Chile and Peru. In a fascinating retelling through six letters to the king, a sixty-year-old de Mérida documents his travels to the farthest regions of the Inca Empire. As he captures the spirit of adventure and invites others into his story of the conquest of Chile in his first three letters, the conquistador details the Diego de Almagro Expedition to Chile in 1535 to 1537 and the return to Peru, a distance of more than three thousand miles. The Adventure Chronicles of Conquistador Pedro de Mérida shares an unforgettable travel adventure back to a remote land and age when the search for gold and power dominated men's actions as historical events shook the foundation of the mighty Inca Empire.

The rise of the internet and mobile telecommunications has created the possibility of using large datasets to understand behavior at unprecedented levels of temporal and geographic resolution. Online social networks attract the most users, though users of these new technologies provide their data through multiple sources, e.g. call detail records, blog posts, web forums, and content aggregation sites. These data allow scholars to adjudicate between competing theories as well as develop new ones, much as the microscope facilitated the development of the germ theory of disease. Of those networks, Twitter presents an ideal combination of size, international reach, and data accessibility that make it the preferred platform in academic studies. Acquiring, cleaning, and analyzing these data, however, require new tools and processes. This Element introduces these methods to social scientists and provides scripts and examples for downloading, processing, and analyzing Twitter data.

These are the greatest poems of the Early 21st Century as determined by a consensus of the author's alter egos. The most obscure fictional critics who have appeared in the pages of the Great American Novel have, in their machinations, also lent tacit-ephemeral, imaginary praise to this magnificent tome of verse. Alice says strat-tea-tackfully, every poem must have a pie thrown at it to lend it color and flavor. Comb through these pages, and grow, or glow -- whichever comes first. But for the benefit of mankind and for the ultimate salvation of narcissists everywhere, I feel compelled to reveal a secret: I have received an official communication from the League of Benevolent Galaxies. I am shocked to learn that I have been named the Poet Laureate of the Primitive Planets. Secretary-General Chytchalrorix informs me that there is no stipend, but the paper certificate, made from the pulp of their long extinct keypapx tree is like hardy laurels.

All that changes the instant she locks eyes with Grace Kimura, America's reigning rom-com sweetheart, during the Nikkei Week Festival. From there, Rika embarks on a madcap adventure of hope and happiness—searching for clues that Grace is her long-lost mother, exploring Little Tokyo's hidden treasures with cute actor Hank Chen, and maybe . . . finally finding a sense of belonging. But fairy tales are fiction and the real world isn't so kind. Rika knows she's setting herself up for disappointment, because happy endings don't happen to girls like her. Should she walk away before she gets in even deeper, or let herself be swept away?

When Luke O'Neil isn't angry, he's asleep. When he's awake, he gives vent to some of the most heartfelt, political and anger-fueled prose to power its way to the public sphere since Hunter S. Thompson smashed a typewriter's keys. *Welcome to Hell World* is an unexpurgated selection of Luke O'Neil's finest rants, near-poetic rhapsodies, and investigatory journalism. Racism, sexism, immigration, unemployment, Marcus Aurelius, opioid addiction, Iraq: all are processed through the O'Neil grinder. He details failings in his own life and in those he observes around him: and the result is a book that is at once intensely confessional and an energetic, unforgettable condemnation of American mores. *Welcome to Hell World* is, in the author's words, a "fever dream nightmare of reporting and personal essays from one of the lowest periods in our country in recent memory." It is also a burning example of some of the best writing you're likely to read anywhere.

A compact, comprehensive, and very silly field guide featuring more than 200 of the rudest birds on earth. Effin' Birds is the most eagerly anticipated new volume in the grand and noble profession of nature writing and bird identification. Sitting proudly alongside Sibley, Kaufman, and Peterson, this book contains more than 150 pages crammed full of classic, monochrome plumage art paired with the delightful but dirty aphorisms (think "I'm going to need more booze to deal with this week") that made the Effin' Birds Twitter feed a household name. Also included in its full, Technicolor glory is John James Audubon's most beautiful work matched with modern life advice. Including never-before-seen birds, insults, and field notes, this guide is a must-have for any effin' fan or birder.

An exploration of minimal writing—texts generally shorter than a sentence—as complex, powerful literary and visual works. In the 1960s and 70s, minimal and conceptual artists stripped language down to its most basic components: the word and the letter. Barbara Kruger, Jenny Holzer, Carl Andre, Lawrence Weiner, and others built lucrative careers from text-based art. Meanwhile, poets and writers created works of minimal writing—visual texts generally shorter than a sentence. (One poem by Aram Saroyan reads in its entirety: eyeye.) In absence of clutter, Paul Stephens offers the first comprehensive account of minimal writing, arguing that it is equal in complexity and power to better-known, more commercial text-based art. Minimal writing, Stephens writes, can be beguilingly simple on the surface, but can also offer iterative reading experiences on multiple levels, from the fleeting to the ponderous. “absence of clutter,” for example, the entire text of a poem by Robert Grenier, is both expressive and self-descriptive. Stephens first sets out a theoretical framework for reading and viewing minimal writing and then offers close readings of works of minimal writing by Saroyan, Grenier, Norman Pritchard, Natalie Czech, and others. He “reverse engineers” recent works by Jen Bervin, Craig Dworkin, and Christian Bök that draw on molecular biology, and explores print-on-demand books by Holly Melgard, code poetry by Nick Montfort, Twitter-based work by Allison Parrish, and the use of Instagram by Hans-Ulrich Obrist and Saroyan. Text, it seems, is becoming ever more prevalent in visual art; meanwhile, poems are getting shorter. When reading has become scanning a screen and writing tapping out a text, absence of clutter invites us to reflect on how we read, see, and pay attention.

Imagine a jazz musician, improvising on a theme. Then imagine that he is able to play half a dozen instruments - not one after another, but almost simultaneously, switching effortlessly between instruments and musical styles with hardly a pause for breath. If you can countenance that, you are halfway towards appreciating the extraordinary song of the nightingale . . .

Wherever we are, there are birds. And wherever there are birds, there is birdsong. It's always a pleasure (and a relief) to hear sounds which prove the world's still spinning: whether it's the sighing of migrating redwings on a damp October night, the twitter of swallows fresh in from South Africa in April or the call of the cuckoo in May. Based on the scripts of BBC Radio 4's beloved year-long series, and distilling two lifetimes' knowledge, insight and enthusiasm into these pages, Brett Westwood and Stephen Moss take you month by month through the year, and the changing lives of our favourite birds. From peregrines swapping sea-cliffs for skyscrapers to swifts spending almost their entire lives on the wing; from charms of goldfinches to murmurations of starlings; from ptarmigans thriving in the Highland snow to the bright green parakeets thronging London's parks; this book is packed full of extraordinary insights and memorable facts.
