the occurrences on the D-Day for many years to no avail. But Holger Eckhertz has done a fantastic job in shedding light to and uncovering the intriguing aspects of the story. Therefore, it is a pleasure to bring you concise and summarized form of these fascinating pieces of information in such a way as to guarantee maximum benefit in the shortest possible time. The events narrated in this book is a compilation by a Military Journalist who wrote widely read articles and features for German troops. He retired after the war to work on this project; a compilation of interviews he conducted with German soldiers who fought in Normandy on the famed "D-day." This book was inspired by the initial interviews he conducted of the troops tasked with defending the Atlantic Wall from the invading Allies. After the Germans lost that battle-and consequently the war-their side of the story was never heard. The journalist then decided to locate the members of some of the units he interviewed before the battle in a bid to hear their side of the story and write a book based on these. Unfortunately, he died before he could complete the book. His son saw the folder that contained his father's research and he decided to finish it; what he found was a shocking narrative of how the battle looked from the eyes of the soldiers that tried to defend the Wall on that day. It contained stories of how the troops fought resolutely for hours to keep their ground even as they saw the impending

loss. The Allied forces invaded by way of 5 Normandy beaches; from the Utah beach in the west to the Sword beach in the east (the beaches were named so by the invading Allies). This book contains one narrative for each beach and it aims to reveal the other side of the story. Winners live to tell the tales of how a war went, but in this case, you have the opportunity to hear the story from the mouth of the vanquished and it is a fascinating tale indeed. This must-read for lovers of Stephen King's *The Shining* will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the

TEACHING CHILDREN ABOUT HEALTH takes a case study approach and is written especially for the elementary classroom teacher. The goal of this text is to help teachers become more knowledgeable about and comfortable with health topics, to be more reflective in their practice of teaching about health, and better equipped with activities for incorporating health subjects into their curriculum. Each chapter considers health from a physical, social, and emotional perspective, acknowledging the mind-body connection. The authors include topics that are relevant in children's lives using a wellness/preventive health model. In addition, each chapter provides activities that can be integrated into several disciplines found in most elementary-school curricula. This text is meant to provide elementary school classroom teachers with the incentive and knowledge base they will need to include interdisciplinary lessons about the various health content areas in their daily teaching. It recognizes that since most elementary-school programs do not have separate health education experiences for students, and since these are the primary learning years, it is the responsibility of the classroom teacher to initiate learning about health.

Contemporary Criminological Issues tackles some of today's most pressing social issues, from the

criminalization of Indigenous peoples to interpersonal violence, border control, and armed conflicts. This book advances cutting-edge theories and methods, with the aim of moving beyond the scholarship that reproduces insecurity and exclusion. The breadth of approaches encompasses much of the current critical criminological scholarship, serving as a counterpoint to the growth of managerial and administrative criminologies and the rise of explicitly exclusionary and punitive state policies and practices with respect to 'crime' and 'security.' This edited collection featuring two books, one in English and one in French, includes important contributions to knowledge and public policy by eminent experts and emerging scholars. This book is published in English.

Within the domains of morality, is there a distinction that can be properly drawn by using the concepts of applied and theoretical ethics? Could not all ethics be an application of something that has no theoretical foundation - or perhaps only another kind of foundation? Or, perhaps ethics could also be a theory about something that is altogether

inapplicable? Moral philosophers have not managed to rule out the possibilities indicated by questions such as these, and this fact could perhaps be taken as a reminder that a relevant moral philosophy should probably not distance itself too much from either the putatively theoretical or applied aspects of moral issues. In this volume, a number of writers wrestle with the problem concerning applied and theoretical ethics, illuminating it from different angles. The Choice Wine Buying Guide 2004 is the result of the widest wine test ever conducted by Choice. Now in its third year, the guide has established itself as a totally independent and reliable guide to over 400 of the most popular and best value wines available in Australia. Seasoned wineophiles and novices alike will appreciate The Choice Wine Buying Guide 2004. It includes a score out of 20 and taster's notes for each wine. From a panel of 16, each wine was tasted by at least four experts in the Australian wine industry--winemakers, retailers, educators and consultants--bringing a true range of experience and expectation to the process. You'll be amazed at the results. There are some great medal quality wines on the market for under \$15. And as for the long-held belief that you should drink red wine with red meat, and white wine with white meat--read this book and you'll see that it pays to think outside the

This analytical study examines the function of internal auditing from the viewpoint of its role within organizations and within the economics of societies and governments. Swanson and Marsh place internal auditing in the context of the scientific conceptual framework of Living Systems Theory, and thus provide a basis for a systematic theoretical framework and a theory based on observable, measurable entities. They identify the advantages of using this system to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies.

In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

A child must be able to do more than decode single words to become a skilled or fluent reader. This book explores the psychology of that process. Although it includes a summary of how children learn to read words, it concentrates on the development of reading comprehension. A distinction is made between the problems of poor word decoding and poor comprehension in children. The authors analyse both the skills of fluent adult readers and the development of children's language from the age of five when most are starting to read. Against this background they survey psychological research into the way children understand text, and discuss the differences between good and poor comprehenders. The book concludes with a chapter on the educational implications of this research, which discusses how comprehension problems can be identified, and how professional aids, training and remediation can help.

Today, interactive mobile technologies have become the core of many--if not all--fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend.

Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on

The first survey of the Pan-African movement this century, this book provides a history of the individuals and organisations that have sought the unity of all those of African origin as the basis for advancement and liberation. Initially an idea and movement that took root among the African Diaspora, in more recent times Pan-Africanism has been embodied in the African Union, the organisation of African states which includes the entire African Diaspora as its 'sixth region'. Hakim Adi covers many of the key political figures of the 20th century, including Du Bois, Garvey, Malcolm X, Nkrumah and Gaddafi, as well as Pan-African culture expression from Négritude to the wearing of the Afro hair style and the music of Bob Marley. The research-based Test of Basic Arithmetic and Numeracy Skills measures children's fluency in number skills - a core aim of the 2014 National Curriculum.
