Managerial Accounting is characterised by a strong pedagogical framework and a dynamic and practical approach that directly demonstrates how students can develop their careers in real life. The text introduces students to the underlying concepts and applications of management accounting tools based on the traditional allocation approach and absorption costing method, and uses 'Staircase' exercises in each chapter to build knowledge and help learners to link the content between chapters as they progress through the book. This title uses easy-to-understand, student-friendly language, uncomplicated examples, a logical discussion of concepts that matches student learning processes, and clear visual explanations that support student understanding.

Managerial Accounting teaches students the fundamental concepts of managerial accounting in a concise and easy to comprehend fashion. Stimulating review materials at the end of each section helps students develop their decision-making skills. Students are provided the tools and guidance to take more initiative in their learning, making them more engaged, more prepared, and more confident.

This book provides a systematic approach to legislation and legal practice concerning energy resources and production in International Energy Law. The book describes the broad international energy set up, administrative organization, regulatory framework, and relevant case law pertaining to the development, application, and use of such forms of energy as electricity, gas, petroleum, and coal, with attention as needed to the pervasive legal effects of competition law, environmental law and tax law. A general introduction covers the geography of energy

resources, sources and basic principles of energy law, and the relevant governmental institutions. Then follows a detailed description of specific legislation and regulation affecting such factors as documentation, undertakings, facilities, storage, pricing, procurement and sales, transportation, transmission, distribution, and supply of each form of energy. Case law, intergovernmental cooperation agreements, and interactions with environmental, tax, and competition law are explained. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for energy sector policymakers, negotiators, investors and energy firm counsel handling cases affecting International Energy Law. It will also be welcomed by researchers and academics for its contribution to the study of the complex field of energy law that has peculiar characteristics because of associated risks and rewards.

Risk assessment is an integral part of an institution's risk-based audit and controls for all products, services and activities. Time, new products, regulatory changes, competitive environment changes, and market conditions are just some of the factors that can impact risk assessments. In order for financial institutions to satisfy the regulators, they must constantly evaluate risks, weigh risks against rewards, and make decisions based on these evaluations. Risk Assessments for Financial Institutions is a compilation of all the best tools from our most popular risk and audit manuals; here is a reliable resource that you can trust to save you time, make your organization safer, and make your job easier. Updated regularly, there are now risk assessments for such topics as social media, liquidity management, cloud computing, asset management for trusts, and remote deposit capture. The risk assessments specify risks based on specific rating systems in the following areas: • Mobile Banking • Remote Deposit Capture • Information Security • Information Technology • Business Continuity • Electronic Banking • Compliance • Audit • Lending • Finance and Accounting • Enterprise Risk Management • BSA/AML
