This is the second, completely updated edition of a comprehensive book in which many of the world's leading lung cancer specialists discuss the recent advances in the radiation oncology of lung cancer and reflect on the latest research findings. The first three sections cover the basic science of lung cancer, clinical investigations, including histology and staging, and a wide range of fundamental treatment considerations. Current treatment strategies for small cell and non-small cell lung cancer are then explained and evaluated in detail, with due attention to novel approaches that promise further improvements in outcome. The various types of treatment-related toxicity are discussed, and quality of life studies and prognostic factors are also considered. After evaluating the latest technological and biological advances, including IMRT, IMAT, cyber knife treatment, and tomotherapy, the book concludes by thorough consideration of specific aspects of clinical research in lung cancer.

This classic has been the most authoritative text in the field since 1924. The thoroughly revised Eleventh Edition continues to provide a sound, sophisticated, sociological treatment of the principal issues in criminology.

Information technology (IT) has brought about a major shift in the nature and speed of knowledge processing, thereby

transforming the way business and, indeed, governments, function. An integral aspect of social capital, IT can either be an empowering force for the marginalized, or be instrumental in creating a new dimension of inequality. Harnessing IT for effective socio-economic transformation into an epistemic society has created a need to revisit prevailing notions of governance and development in the country, which is confronted with resource constraints and a yawning digital divide. Conceived against this background, this volume consists of 21 chapters written by authorities responsible for planning and implementing IT in India, including the President of India, H.E. Dr A P J Abdul Kalam, senior government officials, IT professionals and scholars. The volume contains case studies of the application of IT in India, both in agriculture and in improving public service delivery systems.
