The Mexican -- United States border represents much more than the meeting place of two nations. Our border communities are often a line of first defense -- absorbing the complex economic, environmental and social impacts of globalization that ripple through the region. In many ways, our success or failure in finding solutions for the environmental, social and economic issues that plague the region may well define our ability to meet similar challenges thousands of miles from the border zone. Border residents face the environmental security concerns posed by water scarcity and transboundary air pollution; the planning and infrastructure needs of an exploding population; the debilitating effects of inadequate sanitary and health facilities; and the crippling cycle of widespread poverty. Yet, with its manifold problems, the border area remains an area of great dynamism and hope -- a multicultural laboratory of experimentation and grass-roots problem-solving. Indeed, as North America moves towards a more integrated economy, citizen action at the local level is pushing governments to adapt to the driving forces in the border area by creating new institutional arrangements and improving old ones. If there is one defining feature of this ground-up push for more responsive transboundary policies and institutions, it is

a departure from the closed, formalistic models of the past to a more open, transparent and participatory model of international interaction.

Create modern heirlooms using vintage materials—a collection of 35 innovative projects showcasing the exceptional beauty in timeworn textiles. *Vintage Made Modern* is a book devoted to recycling just as generations before us have, utilizing timeworn textiles with histories of their own. With a little resourcefulness, gentle care, and some creative repurposing, the 35 innovative projects in this book breathe life back into these textiles, refresh their beauty, and create new memories. Whether it be Granny's well-worn apron, a threadbare family quilt, or a tattered tea towel you picked up at the thrift shop, each of these textiles has a tale to tell. *Vintage Made Modern* will have you collaborating with makers from the past and continuing stories composed long ago, with you becoming part of the narrative.

A revolutionary approach to writing that will teach you how to express yourself fluently and with confidence for the rest of your life.

This handbook attempts to address the political and social learning needs of women in Panchayati Raj Institutions in India. It develops thematic gender focused training modules on a range of subjects, including social mobilization and use of social capital formation for ushering development of a network of women PRIs at the grassroots level.

In *On Both Sides of the Strait of Gibraltar* Julio Samsó shows that astronomical sources, written in al-Andalus, the Maghrib and the Iberian Peninsula, belong to the same tradition and emphasizes the role of al-Andalus and the Iberian Peninsula in the transmission of Islamic astronomy to medieval Europe.

The story of Christine Jorgensen, America's first prominent transsexual, famously narrated trans embodiment in the postwar era. Her celebrity, however, has obscured other mid-century trans narratives—ones lived by African Americans such as Lucy Hicks Anderson and James McHarris. Their erasure from trans history masks the profound ways race has figured prominently in the construction and representation of transgender subjects. In *Black on Both Sides*, C. Riley Snorton identifies multiple intersections between blackness and transness from the mid-nineteenth century to present-day anti-black and anti-trans legislation and violence. Drawing on a deep and varied archive of materials—early sexological texts, fugitive slave narratives, Afro-modernist literature, sensationalist journalism, Hollywood films—Snorton attends to how

slavery and the production of racialized gender provided the foundations for an understanding of gender as mutable. In tracing the twinned genealogies of blackness and transness, Snorton follows multiple trajectories, from the medical experiments conducted on enslaved black women by J. Marion Sims, the “father of American gynecology,” to the negation of blackness that makes transnormativity possible. Revealing instances of personal sovereignty among blacks living in the antebellum North that were mapped in terms of “cross dressing” and canonical black literary works that express black men’s access to the “female within,” *Black on Both Sides* concludes with a reading of the fate of Phillip DeVine, who was murdered alongside Brandon Teena in 1993, a fact omitted from the film *Boys Don’t Cry* out of narrative convenience. Reconstructing these theoretical and historical trajectories furthers our imaginative capacities to conceive more livable black and trans worlds.

Anatomically, the central nervous system looks remarkably symmetrical--from the relatively simple structures of the spinal cord to the extensively convoluted folds of the cerebral hemispheres. At the functional level, however, there are striking differences between the left and right hemispheres. Although popular writings attribute language abilities to the left hemisphere and spatial abilities to the right, differences in hemispheric function appear to be more subtle. According to Ivry and Robertson, asymmetries over a wide range of perceptual tasks reflect a difference in strength rather than kind, with both hemispheres contributing to the performance of complex

tasks, whether linguistic or spatial. After an historical introduction, the authors offer a cognitive neuroscience perspective on hemispheric specialization in perception. They propose that the two hemispheres differ in how they filter task-relevant sensory information. Building on the idea that the hemispheres construct asymmetric representations, the hypothesis provides a novel account of many laterality effects. A notable feature of the authors' work is their attempt to incorporate hemispheric specialization in vision, audition, music, and language within a common framework. In support of their theory, they review studies involving both healthy and neurologically impaired individuals. They also provide a series of simulations to demonstrate the underlying computational principles of their theory. Their work thus describes both the cognitive and neurological architecture of hemispheric asymmetries in perception.

Between 1880 and 1940, Navajo and Ute families and westward-trending Anglos met in the “bullpens” of southwestern trading posts to barter for material goods. As the products of the livestock economy of Navajo culture were exchanged for the merchandise of an industrialized nation, a wealth of cultural knowledge also changed hands. In *Both Sides of the Bullpen*, Robert S. McPherson reveals the ways that Navajo tradition fundamentally reshaped and defined trading practices in the Four Corners area of southeastern Utah and southwestern Colorado.

Drawing on oral histories of Native peoples and traders collected over thirty years of research, McPherson explores these interactions from both perspectives, as wool, blankets, and silver crossed the counter in exchange for flour, coffee, and

hardware. To succeed, traders had to meet the needs and expectations of their customers, often interpreted through Navajo cultural standards. From the organization of the post building to gift giving, health care and burial services, and a credit system tailored to the Navajo calendar, every feature of the trading post served trader and customer alike. Over time, these posts evolved from ad hoc business ventures or profitable cooperative stores into institutions with a clearly defined set of expectations that followed Navajo traditional practices. Traders spent their days evaluating craft work, learning the financial circumstances of each Native family, following economic trends in the wool and livestock industry back east, and avoiding conflict. In detail and depth, the many voices woven throughout *Both Sides of the Bullpen* restore an underappreciated era to the history of the American Southwest. They show us that for American Indians and white traders alike in the Four Corners region during the late 1800s and early 1900s, barter was as much a cultural expression as it was an economic necessity.

Traces the development of the Christian understanding of revelation and how that understanding drifted away from its original meaning.

Annie Armitage was a successful nurse, dedicated to quality nursing care until,

aged 26, she was diagnosed with Lupus and given 5 years to live. As she became increasingly ill, she started to wonder how the standard of nursing had slipped so drastically since her own training. This is her must read account of her experiences. Annie Armitage was a successful career nurse, with a dedication to quality nursing and care as taught during her rigorous training in the 1960s. Taking her skills, Annie eventually worked as a consultant to the Department of Health, advising on the quality of nursing care in the NHS. However Annie had been diagnosed with Lupus, an illness that affects over 50 000 people in the UK; is more common than Leukemia, yet is virtually unheard of by the wider population. Lupus usually causes great pain, serious organ damage and is potentially fatal. At 26, Annie was given 5 years to live - she fought to look after her two young children while dealing with the insidious illness. As Annie became increasingly ill, she was able to reflect on her changed situation as a patient not a nurse. During the time she was in hospital under treatment she started to wonder how the standard of nursing had slipped so drastically since her own training. Her experiences as a Lupus sufferer - and previously as a nurse - have given her first-hand experience of the quality of care experienced in NHS hospitals. Annie's observations and knowledge make this essential reading - not just for those suffering from Lupus, but also for anyone concerned about standards of nursing

and care in hospitals, as well as those experiencing long-term incurable illness. Written from the perspectives of both a user interface designer and a software engineer, this book demonstrates rather than just describes how to build technology that cooperates with people. It begins with a set of interaction design principles that apply to a broad range of technology, illustrating with examples from the Web, desktop software, cell phones, PDAs, cameras, voice menus, interactive TV, and more. It goes on to show how these principles are applied in practice during the development process -- when the ideal design can conflict with other engineering goals. The authors demonstrate how their team built a full-featured instant messenger application for the wireless Palm and PC. Through this realistic example, they describe the many subtle tradeoffs that arise between design and engineering goals. Through simulated conversations, they show how they came to understand each other's goals and constraints and found solutions that addressed both of their needs -- and ultimately the needs of users who just want their technology to work.

Insight and intuition might be the most mysterious and fascinating fields of human thinking and problem solving. They are different from standard and analytical problem solving accounts and provide the basis for creative and innovative thinking. Until now they were investigated in separate academic fields with

differing tradition. Therefore, this eBook attempts to bridge the gap between both processes and to provide a more integrated perspective. Several experts address the underlying cognitive processes and provide a broad spectrum of new empirical, theoretical, and methodological insights.

A dream is not just white noise or something that happens to you while you sleep. Dreams are the secret language of your unconscious. This book will teach you how to: Unlock the secrets of your personal dream language Explore and interpret the meaning of your dreams Harness the power of the brain to uncover a life of greater richness and meaning So often when we awake we find that our dreams have either evaporated like mist or seem to be just on the edge of our memory. Many people cannot recall their dreams at all. Cohen has developed a 7-step process to let you tap into the rich repository of your subconscious: Recall and record. Title your dream. Read or repeat aloud. Consider what is uppermost in your life right now. Describe your dream's objects and qualities as if you were talking to a Martian. Summarize the message from the unconscious. Consider the dream's guidance for waking life. Drawing on years of clinical experience and her familiarity with Freud, myth, and sacred writings, Cohen presents a program that results in a life of abundance, texture, and self-awareness.

This book is the result of seven years of fear, uncertainty, and hardship as a family has attempted to cope with a child's unexpected life-threatening illness. This story differs from that of many other families coping with childhood illness in that we as parents already had intimate "insider" knowledge of serious illness. I was a specialist in critical care and pulmonary medicine when our son was born, while his mother Ruth was a practicing pediatrician. It was an ironic combination for two parents who were soon coping with their own newborn's critical condition. The past seven years have seen our family sink from the depths of desperation then rise to cautious optimism as Andrew currently is physically disabled with congenital muscular dystrophy but is as thriving and happy as any other seven-year-old boy. I have taken the insights gained through such an extraordinary combination of professional and personal experience and have created a guide for other parents overwhelmed by a child's illness and intimidated by the medical establishment. Parents will relate to our personal story, and will hopefully benefit from and become empowered by my insights as both a physician and parent. First published in 1978, Christmas Humphrey's autobiography presents the fascinating history of a life rich and varied in both private and in public. Spanning seven decades it touches on many events of historical interest in which he was

personally involved. Among them the abdication of Edward VIII, the Japanese War Trials and his time with the Dalai Lama after his flight from Tibet. The author gives a graphic portrait of life behind the Bar and on the Bench – of what it is like to prosecute and to defend, and of the immense difficulties which face a judge when passing sentence. Here too are recollections of many famous cases of the twentieth century, and of the many murder trials in which he appeared as prosecuting counsel or judge. Of equal interest is his fifty years' of work in the field of English Buddhism. In 1924 he and his wife founded the Buddhist Society, which would become hugely influential in the spread of Buddhism throughout the West. Both Sides of the Circle is rich in humour and humanity. There is the joyful account of the author's Edwardian Boyhood followed by the tragedy of his brother's death in World War 1, which led to the awakening of his interest in Buddhism and Theosophy. He speaks freely of his encounters with the Dalai Lama, with D.T. Suzuki, with Jung and with the Royal families of Thailand, Sikkim and Nepal, as well as his travels throughout Europe and in the Orient. Both sides of the Circle is more than autobiography – it is also a spiritual odyssey whose reissue will be of great interest to those who've enjoyed Christmas Humphreys' other work and wish to know more about his brilliant career. It will also be very welcome to those who wanted to learn about Buddhism in general, and

the origins of English Buddhism in particular.

On Both Sides of the Street is a real-life story about a man who experiences meteoric successes both personally and professionally, only to have them come crashing down through a series of life-changing disasters; some self-inflicted, some not. Taken in their totality, one would surely find these events to be unbelievable. The story begins in the midst of this downward spiral and then reverts to a chronology of the man's life, beginning in his upbringing in East Tennessee, followed by a normal ascent into adulthood, where he seemingly could do no wrong. His journeys take him to virtually every part of America, Europe and then, ultimately, Central America. His experiences include enviable successes both professionally and personally, with a propensity to attract the opposite sex, some to his painful bane. Life could hardly have been any

better. With a sense of premonition, he suffers the loss of a son, endures two divorces, the loss of all of his assets, and, ultimately, destitution. The story describes his reactions to these disasters and gives a profound sense of the pain associated with each of these. The reader will get an acute sense of the frailty of the human spirit and, in most cases, how not to react to them. The story spans over fifty years and includes a strong dose of historical perspective, describing some of the most significant events of the last half century. It also includes some colorful descriptions of many parts of America, Europe and, finally, the country of Belize. There are also sprinkled in some commentary on political, geopolitical and macroeconomic issues of our time; seemingly tongue in cheek, but actually not intended to be so. The story is a truly remarkable memorialization of a man's progression through life, with a shocking ending. It is a story of a man who has truly lived on both sides of the street.

teachers. The book covers a broad range of topics, highlighting important aspects of the relationship between research and innovation in the teaching of physics, and presenting fresh insights to help improve learning processes and instruction. Offering a contemporary vision of physics teaching and the learning process, the book is of interest to all teachers and researchers committed to teaching and learning physics on the basis of good evidence.

On Both Sides of the River paints a vignette of south Texas its people, history, and cultural diversity through interwoven tales of the scourge of drug-trafficking on both sides of the Rio Grande River and of the annual quest for the monster whitetail buck of Mexican and south Texas lore, El Cacaistón. Joe González, a south Texas criminal defense lawyer, finds himself embroiled in a situation involving drug-trafficking, corruption, and violence. He overhears young, violent American drug lord Mark Balbuena, heir to the Balbuena family ranch, talking to someone in a local restaurant about a drug deal. When young Balbuena makes the massive deal with a notorious Mexican drug lord, an unexpected double-cross begins a drug war. Despite Mark's plan to save it, the Balbuena ranch is purchased by entrepreneur Max Wadsworth. Even so, to González, the presence of Mark Balbuena on the ranch clearly suggests he was trafficking drugs from the family ranch. Only time would reveal now whether the Balbuenas would emerge from the trouble unscathed, or whether it would all fall apart.

Inspired by True Current Events. Dolores, Ernesto, and Emilio Sanchez are on a

quest to America to find work and to save their family, who has been devastated by their father's accident and the drought in their home country of Honduras. But making their way to America would be too expensive for a family stricken by poverty. With only their faith in God to see them through, the teenaged siblings set off for their new home, despite the threat from the cartel, corrupt police officers, starvation, and death.

Meanwhile, Eva Jordan is determined to start a new life on the American side of the Mexican border, hoping to shake off the scars from a horrible marriage. Despite her mother's concern for her daughter living so close to the border, Eva decides to take a vacation to the other side to sharpen up her Spanish and relax before her new job begins. She is struck by the beautiful towns of Mexico, but slowly, her eyes are opened to the dangers that are knocking at her front door. But when a hurricane washes away the border walls, will the two sides collide in hatred or unite in perfect harmony?
